This cookbook, based on the game-changing web series Chef's Night Out, features stories of the world's best chefs' debauched nights on the town, and recipes for the food they cook to soak up the booze afterwards. MUNCHIES brings the hugely popular show Chef's Night Out (on VICE Media's food website, MUNCHIES) to the page with snapshots of food culture in cities around the world, plus tall tales and fuzzy recollections from 70 of the world's top chefs, including Anthony Bourdain, Dominique Crenn, David Chang, Danny Bowien, Wylie Dufresne, Inaki Aizpitarte, and Enrique Olvera, among others. Then there are the 65 recipes: dishes these chefs cook when

they're done feeding customers, and ready to feed their friends instead. With chapters like "Drinks" (i.e., how to get your night started), "Things with Tortillas," "Hardcore" (which includes pizzas, nachos, poutines, and more), and "Morning After" (classy and trashy dishes for the bleary-eyed next day), MUNCHIES features more than 65 recipes to satisfy any late-night craving and plenty of drinks to keep the party going. Chefs include: Shion Aikawa Jen Agg Iñaki Aizpitarte Erik Anderson Sam Anderson Wes Avila Joaquin Baca Kyle Bailey Jonathan Benno Noah Bernamoff Jamie Bissonnette April Bloomfield Robert Bohr And Ryan Hardy Danny Bowien Anthony Bourdain Stuart Briozza

How to Be a Capitalist
 Without Any Capital
 Random House
 In this volume of 15
 articles, contributors
 from a wide range of
 disciplines present
 their analyses of
 Disney movies and
 Disney music, which
 are mainstays of
 popular culture. The
 power of the Disney
 brand has heightened
 the need for academics
 to question whether
 Disney's films and
 music function as a

tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in

the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

Nachos are the ultimate comfort food and the extreme guilty pleasure. As the team behind Nachos NY, authors Lee Frank and Rachel Anderson have set off on a mission to reinvent the nacho and elevate it from its status as neon-yellow-cheese-smothered snack food to delectable gooey treats to dig into and share with friends. As Nachos NY, Frank and Anderson have put

their extensive nacho knowledge to work and show you how to play off the flexibility of the nacho with eighty-four creative recipes that are inspired by comfort foods and international flavors. From making homemade tortilla chips, to whipping up Avocado Horseradish Crema, and mixing up delicious margaritas, the recipes in this book provide you with everything you need to throw a Mexican fiesta with a twist! Recipes include: - Fried Calamari Nachos - Croque Monsieur Nachos - Philly Cheesesteak - Roasted Beet, Apple, and Goat Cheese - Pork Ginger - Poached Pear Gorgonzola Dessert Nachos - and much more! With recipes contributed by Guactacular contest

winners, Ivy Stark of Dos Caminos, The Brooklyn Salsa Company, Hugo Ortega, J. Kenji Lopez-Alt of Serious Eats, and Melissa Clark of The New York Times, this book will have you cooking sweet and savory recipes all year round at backyard bbqs, on Super Bowl Sunday, or for Tex-Mex night with the family. And, of course, nachos aren't complete without salsa, guacamole, and queso. A range of sauces to dip into and drizzle on to your chips are provided, including Clementine Pico de Gallo, Bacon Apple Guac, Mango Chipotle Sauce, and much more! Then pair your nachos with the complementary drink recipes for margaritas, horchata, and sangria

and throw yourself a real fiesta!

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That*

Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

"Johnson and Suskewicz have raised a battle cry for the kind of leadership we need in these uncertain times." -- Sandi Peterson, Member, Board of Directors, Microsoft We all know a visionary leader when we see one. They're bold and prophetic and at the same time pragmatic. They don't just promote change--they drive it, while inspiring and mobilizing others to do the same. Visionaries like Steve

Jobs and Jeff Bezos possess a host of innate qualities that make them extraordinary, but what truly sets them apart is their ability to turn vision into action. In *Lead from the Future*, Innosight's Mark W. Johnson and Josh Suskewicz introduce a new way of thinking and managing, called "future-back," that enables any manager to become a practical visionary. Addressing the many barriers to change that exist in established organizations, they present a systematic approach to overcoming them that includes: The principles and mind-set that allow leadership teams to look beyond typical short-term planning horizons A method for turning emerging

challenges into the growth opportunities that can define an organization's future A step-by-step approach for translating a vision into a strategic plan that teams can align around and commit to Ways to ensure that visionary thinking becomes a repeatable organizational capability As practical as it is inspiring, *Lead from the Future* is the guide you and your team need to develop a vision and translate it into transformative growth.

Instant Wall Street
Journal Bestseller! You
don't need to be Ivy
League educated, have
money, be creative, or
even have an idea to
get rich. You just need
to be willing to break
the rules. At nineteen, I
founded a software
company with \$119 in
my bank account. Five
years later, it was
valued at \$10.5 million.
I don't consider myself
exceptionally brilliant. I
just realized something
few people know: You
don't need lots of
money or an original
idea to get really rich.
Now, I make more than
\$100,000 in passive
income every month,
while also running my
own private equity firm
and hosting The Top
Entrepreneurs podcast,
which has more than
10 million downloads.
This book will show you

how I went from
college dropout to
member of the New
Rich. And I'm holding
nothing back. You'll
see my tax returns, my
profit and loss
statements, my email
negotiations when
buying and selling
companies. It's time to
forget your
grandfather's advice.
I'll teach you how to be
a modern opportunist--
investor, entrepreneur,
or side hustler--by
breaking these four
golden rules of the old
guard: 1.Focus on one
skill: Wrong. Don't
cultivate one great skill
to get ahead. In
today's business world,
success goes to the
multitaskers. 2.Be
unique: Wrong. The
way to get rich is not
by launching a new
idea but by
aggressively copying
others and then adding

your own twist. 3.Focus on one goal: Wrong. Focus instead on creating a system to produce the outcome you want, not just once, but over and over again. 4.Appeal to the masses: Wrong. The masses are broke (\$4k average net worth in America?). Let others cut a trail through the jungle so you can peacefully walk in and capitalize on their hard work. By rejecting these defunct rules and following my unconventional path, you can copy other people's ideas shamelessly, bootstrap a start-up with almost no funding, invest in small local businesses for huge payoffs, and reap all the benefits. This book was written

as a help for individual persons who want to organize their creativity, be it for science (incl. engineering and commercial projects), art, or private projects. Its aim is to enlarge your options when having ideas and to improve the chance of realizing creative projects. It is written as a practical handbook and describes how organization can support generating, capturing, collecting (incl. enlarging, restructuring, etc.) and realizing ideas. While creativity "techniques" are dealt with, the focus is on the infrastructure to enable you to capture your fleeting ideas and cultivate them to finally realize them as creative projects.

What if we could unlock the potential in every child? As it turns out, we can. Apple's iconic cofounder Steve Jobs had a powerful vision for education: employing technology to make an enormous impact on the lives of millions of students. To realize this vision, Jobs tapped John D. Couch, a trusted engineer and executive with a passion for education. Couch believed the real purpose of education was to help children discover their unique potential and empower them to reach beyond their perceived limitations. Today, technology is increasingly integrated into every aspect of

our lives, rewiring our homes, our jobs, and even our brains. Most important, it presents an opportunity to rewire education to enrich and strengthen our schools, children, and society In *Rewiring Education*, Couch shares the professional lessons he's learned during his 50-plus years in education and technology. He takes us behind Apple's major research study, *Apple Classrooms of Tomorrow (ACOT)*, and its follow-up (*ACOT 2*), highlighting the powerful effects of the *Challenge-Based Learning* framework. Going beyond Apple's walls, he also introduces us to some of the most extraordinary parents, educators, and entrepreneurs from around the world who

have ignored the failed promises of memorization and, instead, utilize new science-backed methods and technologies that benefit all children, from those who struggle to honor students. Rewiring Education presents a bold vision for the future of education, looking at promising emerging technologies and how we—as parents, teachers, and voters—can ensure children are provided with opportunities and access to the relevant, creative, collaborative, and challenging learning environments they need to succeed.

"The Frédéric Chopin Annik LaFarge presents here is not the melancholy, sickly,

romantic figure so often portrayed. The artist she discovered is, instead, a purely independent spirit: an innovator who created a new musical language, an autodidact who became a spiritually generous, trailblazing teacher, a stalwart patriot during a time of revolution and exile. In Chasing Chopin she follows in his footsteps during the three years, 1837-1840, when he composed his iconic "Funeral March"-dum dum da dum-using its composition story to illuminate the key themes of his life: a deep attachment to his Polish homeland; his complex relationship with writer George Sand; their harrowing but consequential sojourn on Majorca; the rapidly developing

technology of the piano, which enabled his unique tone and voice; social and political revolution in 1830s Paris; friendship with other artists, from the famous Eugène Delacroix to the lesser known, yet notorious in his time, Marquis de Custine. Each of these threads-musical, political, social, personal-is woven through the "Funeral March" in Chopin's Opus 35 sonata, a melody so famous it's known around the world even to people who know nothing about classical music. But it is not, as LaFarge discovered, the piece of music we think we know. As part of her research into Chopin's world, then and now, LaFarge visited piano makers, monuments, churches, and

archives; she talked to scholars, jazz musicians, video game makers, software developers, music teachers, theater directors, and of course dozens of pianists. The result is extraordinary: an engrossing, page-turning work of musical discovery and an artful portrayal of a man whose work and life continue to inspire artists and cultural innovators in astonishing ways"--
