FREDERICK EATON

The Celtic Tiger in Distress Farrar, Straus and Giroux
Bob Harig's *Tiger & Phil* provides an in-depth chronicle of the decades-long rivalry that drove the success of golf's two biggest stars, Tiger Woods and Phil Mickelson. For more than two decades, there have been two golfers who have captivated, bemused, inspired, frustrated, fascinated, and entertained us, and in doing so have demanded our attention – Tiger Woods and Phil Mickelson. Even with all the ink that has been spilled on Tiger, no one has ever written about his relationship with Phil and how their careers have been inextricably intertwined. Furthermore, very little has been written about Phil Mickelson, who is more than just an adversary. He is a fascinating Hall of Fame golfer in his own right. These two biggest names (and draws) in golf have, for better and for worse, been the ultimate rivals. But it is so much more complicated than that. Each player has pushed the other to be

better. They have teased each other and fought. They have battled to the bitter end on the course making for some of the greatest moments in the game for the last 20 years. They have each gone through injury and health problems, legal problems, falling in and out of favor with the press. And over the course of their time together in the game they have gradually become not just rivals but friends. In the tradition of major bestsellers such as Arnie & Jack, *When the Game Was Ours*, *The Rivals*, and *Brady vs. Manning*, *Tiger & Phil* will change the way we look at these players and the game itself. *Tiger & Phil* St. Martin's Griffin
Social Policy has been a key dimension of dynamic economic growth in East Asia's 'little tigers' and is also a prominent strand of their responses to the financial crisis of the late 1990s. This systematic comparative analysis of social policy in the region focuses on the key sectors of education, health, housing and social security. It sets these sectoral analyses in wider contexts of debates about developmental states, the East Asian welfare model and globalization.

This book explores the ways in which popular music can criticise political, social and

economic structures, through the lens of alternate rock band Manic Street Preachers. Unlike most recent work on popular music, Peters concentrates largely on lyrical content to defend the provocative claim that the Welsh band pushes the critical message shaped in their lyrics to the forefront. Their music, this suggests, along with sleeve art, body-art, video-clips, clothes, interviews and performances, serves to emphasise this critical message and the primary role played by the band's lyrics. Blending the disciplines of popular music studies, culture studies and philosophy, Peters confronts the ideas of German philosopher and social critic Theodor W. Adorno with the entire catalogue of Manic Street Preachers, from their 1988 single 'Suicide Alley' to their 2018 album *Resistance is Futile*. Although Adorno argues that popular music is unable to resist the standardising machinery of consumption culture, Peters paradoxically uses his ideas to show that Manic Street Preachers releases shape 'critical models' with which to formulate social and political critique. This

notion of the 'critical model' enables Peters to argue that the catalogue of Manic Street Preachers critically addresses a wide range of themes, from totalitarianism to Holocaust representation, postmodern temporality to Europeanism, and from Nietzsche's ideas about self-overcoming to reflections on digimodernism and post-truth politics. The book therefore persuasively shows that Manic Street Preacher lyrics constitute an intertextual network of links between diverse cultural and political phenomena, encouraging listeners to critically reflect on the structures that shape our lives.

This collection of critical essays explores the literary and visual cultures of modern Irish suburbia, and the historical, social and aesthetic contexts in which these cultures have emerged. The lived experience and the artistic representation of Irish suburbia have received relatively little scholarly consideration and this multidisciplinary volume redresses this critical deficit. It significantly advances the

nascent socio-historical field of Irish suburban studies, while simultaneously disclosing and establishing a history of suburban Irish literary and visual culture. The essays also challenge conventional conceptions of what constitutes the proper domain of Irish writing and art and reveal that, though Irish suburban experience is often conceived of pejoratively by writers and artists, there are also many who register and valorise the imaginative possibilities of Irish suburbia and the meanings of its social and cultural life.

If Tigers Disappeared
 Princeton alumni weekly Director of the Chapman journalism program—and mother of four recent college grads—Susan F. Paterno leads you through the admissions process to help you and your family make the best decision possible. How is it possible that Harvard is more affordable for most American families than their local state university? Or that up to half of eligible students receive no financial aid? Or that public universities are rejecting homegrown middle- and working-class applicants and instead enrolling wealthy out-of-

state students? College admission has escalated into a high-stakes game of emotional and financial survival. How is the deck stacked against you? And what can you do about it? Susan F. Paterno, a veteran academic and journalist, answers these questions and more in *Game On*. Paterno helped her four very different kids navigate the application process to a wide range of colleges, paying for their four-year educations on a finite budget. She incisively decodes the college admission industry—the consultants, the tutors, the rankers, the branding companies hawking “advantage”—and arms you with the knowledge you need to make the system work for you. You’ll learn how to narrow your focus, analyze who gets in and why, and look for the right financial fit before considering anything else, including geography, reputation, and, especially, ranking. Among the tools and insights in *Game On*: · Why forty years of failed free-market policies have led to skyrocketing tuition and historic levels of student debt · Why applying to college has become a bewildering maze and how to find

your way to a successful result · Why college costs are more terrifying than you think · How to read beyond the rack rate to negotiate the best financial package with the least debt · Why merit is a myth, but merit aid is essential · The difference between family debt and student debt and how to split it A playbook for the Hunger Games of higher education, *Game On* explains the anxiety, uncertainty, and chaos in college admission, explodes the myth of meritocracy, exposes the academy’s connection to America’s widening gap between rich and poor, and provides strategies to beat—and reform—a broken system.

#1 NEW YORK TIMES BESTSELLER The magnificent conclusion to Rick Atkinson's acclaimed Liberation Trilogy about the Allied triumph in Europe during World War II It is the twentieth century's unrivaled epic: at a staggering price, the United States and its allies liberated Europe and vanquished Hitler. In the first two volumes of his bestselling Liberation Trilogy, Rick Atkinson recounted how the American-led coalition

fought through North Africa and Italy to the threshold of victory. Now, in *The Guns at Last Light*, he tells the most dramatic story of all—the titanic battle for Western Europe. D-Day marked the commencement of the final campaign of the European war, and Atkinson's riveting account of that bold gamble sets the pace for the masterly narrative that follows. The brutal fight in Normandy, the liberation of Paris, the disaster that was Operation Market Garden, the horrific Battle of the Bulge, and finally the thrust to the heart of the Third Reich—all these historic events and more come alive with a wealth of new material and a mesmerizing cast of characters. Atkinson tells the tale from the perspective of participants at every level, from presidents and generals to war-weary lieutenants and terrified teenage riflemen. When Germany at last surrenders, we understand anew both the devastating cost of this global conflagration and the enormous effort required to win the Allied victory. With the stirring final volume of this monumental trilogy,

Atkinson's accomplishment is manifest. He has produced the definitive chronicle of the war that unshackled a continent and preserved freedom in the West. One of *The Washington Post's* Top 10 Books of the Year A Kirkus Reviews Best Nonfiction Book of 2013

Since the first edition there have been fundamental changes in the Irish growth model. The sudden collapse of the Irish economy in 2008 raises questions such as: why the sudden and deep decline in economic growth? What are the prospects for a return to growth? Answering these questions and more, this book is the definitive work on the Celtic Tiger.

Herbert Hoover Tiger Time

A fascinating exploration into the world of turtles across the globe; Laufer charts the lore, love, and peril to a beloved species. *Dreaming in Turtle* is a compelling story of a stalwart animal prized from prehistory through to today—an animal threatened by human greed, pragmatism, and rationalization. It stars turtles and shady and heroic human characters both, in settings ranging from luxury redoubts to degraded habitats, during a time when the confluence of easy global trade, limited supply, and inexhaustible demand has accelerated the stress on species. The growth of the middle class in high-population regions like China, where the turtle is particularly valued, feeds

this perfect storm into which the turtle finds itself lashed. This is a tale not just of endangered turtles but also one of overall human failings, frailties, and vulnerabilities—all punctuated by optimistic hope for change fueled by dedicated turtle champions.

This book addresses issues of monitoring populations of tigers, ungulate prey species and habitat occupancy, with relevance to similar assessments of large mammal species and general biodiversity. It covers issues of rigorous sampling, modeling, estimation and adaptive management of animal populations using cutting-edge tools, such as camera-traps, genetic identification and Geographic Information Systems (GIS), applied under the modern statistical approach of Bayesian and likelihood-

based inference. Of special focus here are animal survey data derived for use under spatial capture-recapture, occupancy, distance sampling, mixture-modeling and connectivity analyses. Because tigers are an icons of global conservation, in last five decades, enormous amounts of commitment and resources have been invested by tiger range countries and the conservation community for saving wild tigers. However, status of the big cat remains precarious. Rigorous monitoring of surviving wild tiger populations continues to be essential for both understanding and recovering wild tigers. However, many tiger monitoring programs lack the necessary rigor to generate the reliable results. While the deployment of technologies, analyses, computing power and human-resource investments in tiger monitoring have greatly progressed in the last couple of decades, a full comprehension of their correct deployment has not kept pace in practice. In this volume, Dr. Ullas Karanth and Dr. James Nichols, world leaders in tiger biology and

quantitative ecology, respectively, address this key challenge. They have collaborated with an extraordinary array of 30 scientists with expertise in a range of necessary disciplines - biology and ecology of tigers, prey and habitats; advanced statistical theory and practice; computation and programming; practical field-sampling methods that employ technologies as varied as camera traps, genetic analyses and geographic information systems. The book is a 'tour de force' of cutting-edge methodologies for assessing not just tigers but also other predators and their prey. The 14 chapters here are lucidly presented in a coherent sequence to provide tiger-specific answers to fundamental questions in animal population assessment: why monitor, what to monitor and how to monitor. While highlighting robust methods, the authors also clearly point out those that are in use, but unreliable. The managerial dimension of tiger conservation described here, the task of matching monitoring objectives with skills and resources to integrate tiger conservation under an adaptive framework,

also renders this volume useful to wildlife scientists as well as conservationists.

Do you understand who you really are? Or how others really see you? We all know people with a stunning lack of self-awareness - but how often do we consider whether we might have the same problem? Research shows that self-awareness is the meta-skill of the 21st century - the foundation for high performance, smart choices, and lasting relationships. Unfortunately, we are remarkably poor judges of ourselves and how we come across, and it's rare to get candid, objective feedback from colleagues, employees, and even friends and family. Integrating hundreds of studies with her own research and work in the Fortune 500 world, organizational psychologist Tasha Eurich shatters conventional assumptions about what it takes to truly know ourselves - like why introspection isn't a bullet train to insight, how experience is the enemy of self-knowledge, and just how far others will go to avoid telling us the truth about ourselves. Through stories of people who've made dramatic

self-awareness gains, she offers surprising secrets, techniques and strategies to help readers do the same - and therefore improve their work performance, career satisfaction, leadership potential, relationships, and more. At a time when self-awareness matters more than ever, *Insight* is the essential playbook for surviving and thriving in an unaware world.

yellow-eyed, and elusive birds that hunt fish by wading in icy water . . . Even on the hottest summer days this book will transport you.”

—Helen Macdonald, author of *H is for Hawk*, in *Kirkus I saw my first Blakiston’s fish owl in the Russian province of Primorye, a coastal talon of land hooking south into the belly of Northeast Asia . . . No scientist had seen a Blakiston’s fish owl so far south in a hundred years . . . When he was just a fledgling birdwatcher, Jonathan C. Slaght had a chance encounter with one of the most mysterious birds on Earth. Bigger than any owl he knew, it looked like a small bear with decorative feathers. He snapped a quick photo and shared it with experts. Soon he was on a five-year journey, searching for this enormous, enigmatic creature in the lush, remote forests of eastern Russia. That first sighting set his calling as a scientist. Despite a wingspan of six feet and a height of over two feet, the Blakiston’s fish owl is highly elusive. They are easiest to find in winter, when their tracks mark the snowy banks of the rivers where they feed. They are also*

endangered. And so, as Slaght and his devoted team set out to locate the owls, they aim to craft a conservation plan that helps ensure the species’ survival. This quest sends them on all-night monitoring missions in freezing tents, mad dashes across thawing rivers, and free-climbs up rotting trees to check nests for precious eggs. They use cutting-edge tracking technology and improvise ingenious traps. And all along, they must keep watch against a run-in with a bear or an Amur tiger. At the heart of Slaght’s story are the fish owls themselves: cunning hunters, devoted parents, singers of eerie duets, and survivors in a harsh and shrinking habitat. Through this rare glimpse into the everyday life of a field scientist and conservationist, *Owls of the Eastern Ice* testifies to the determination and creativity essential to scientific advancement and serves as a powerful reminder of the beauty, strength, and vulnerability of the natural world.
