Kilala was an ordinary girl living an ordinary life, until a magical tiara and a miraculous portal led her on an incredible journey through the worlds of her favorite Disney princesses, and gave her the strength she needed to save a kingdom and become a true princess. But being a princess isn't easy, and Kilala's tiara sends her on a new quest... this time to ancient China's greatest warrior, Mulan! Bandits are storming the countryside, and Mulan and Shang are on an imperial mission to help the villagers relocate to safer grounds. Kilala and her friends stop to help, but when they're overpowered by a team of bandits they must all work together to free themselves.

Is a film watched on a video screen still cinema? Have digital compositing, motion capture, and other advanced technologies remade or obliterated the craft? Rooted in their hypothesis of the "double birth of media," André Gaudreault and Philippe Marion take a positive look at cinema's ongoing digital revolution and reaffirm its central place in a rapidly expanding media landscape. The authors begin with an overview of the extreme positions held by opposing camps in the debate over cinema: the "digitalphobes" who lament the implosion of cinema and the "digitalphiles" who celebrate its new, vital incarnation. Throughout, they remind readers that cinema has never been a static medium but a series of processes and transformations powering

a dynamic art. From their perspective, the digital revolution is the eighth major crisis in the history of motion pictures, with more disruptions to come.

Brokering a peace among all sides, Gaudreault and Marion emphasize the cultural practice of cinema over rigid claims on its identity, moving toward a common conception of cinema to better understand where it is headed next.

Despite coming from different ends of the world, John, Slack, Akane, and Salome, age 12, have plenty in common. They love computers, coding, hacking, gaming—it literally flows through their veins. One more thing: they are all technically dead. The group comes together at the Wolf's Den in deepest Alaska, one of several top-secret schools for technological excellence around the globe. The place seems like a coder's dream come true at first, but things take a dark turn when the group realizes they are not like the other kids there. They uncover that the center is working on a potentially dangerous, secret project known as Project 31. What's worse, the guinea pigs are the kids themselves. The gang realizes that John's father implanted artificial intelligence in their bloodstream, in order to protect them, before going missing under mysterious circumstances. They are not only wanted by those in power, but are now being hunted. There's only one way out: to escape across the brutal Alaskan tundra where the truth will be revealed.
