These proceedings represent the work of
researchers participating in the 9th

European Conference on Intellectual Capital (ECIC 2017) which is being hosted this year by the Instituto Universitário de Lisboa (ISCTE-IUL) on 6-7 April 2017. ECIC is a recognised event on the international research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Intellectual Capital. It provides an important opportunity for researchers and practitioners to come together to share their experiences of researching in this varied and expanding field. The conference this year will be opened with a keynote presentation by Dr José Maria Viedma Martí from U.P.C., Polytechnic University of Catalonia in

Barcelona, Spain and Prof. Maria Do Rosario Cabrita from Universidade Nova de Lisboa, Portugal who will together be talking about The Practice of Intellectual Capital in the Fourth Industrial Revolution. The second day of the conference will be opened by Dr Gregorio Martín-de Castro, from Complutense University of Madrid, Spain, who will address the topic Intellectual Capital: Linking Theory and Practice. With an initial submission of 98 abstracts, after the double blind, peer-review process there are 42 academic Research papers, 2 PhD Research, 1 Masters Research and 1 Work in Progress papers published in these Conference Proceedings. These papers represent truly global research in the field, with contributions from Australia,

Colombia, Croatia, Egypt, Finland, France, Greece, Iran, Italy, Kazakhstan, Latvia, Lithuania, Poland, Portugal, Romania, Russia, South Africa, Spain, The Netherlands, Turkey, United Arab Emirates, UK and USA.

Biopolymer Companies & Market, Held at Warsaw from March 20th to 28th, 1922 Springer

The European Union is becoming increasingly involved in health policy. The Treaties of Maastricht and Amsterdam require the EU to consider health issues in all that it does. Even though the Union has no direct involvement in the delivery of health services its range of responsibilities, including the ramifications for health of the Single European Market, make it a key player. This is the first major academic book solely devoted to EU health and health-related policy. *Organizing the 20th-Century World* Academic Conferences and publishing limited

By relating theoretical arguments to

specific landscapes Sarah Curtis develops the basis for a geographical analysis of health problems and proposes a range of strategies for reducing disadvantage and societal inequalities.

The Locarno Conference World Health
 Organization

International Organizations play a pivotal role on the modern global stage and have done, this book argues, since the beginning of the 20th century. This volume offers the first historical exploration into the formative years of international public administrations, covering the birth of the League of Nations and the emergence of the second generation that still shape international politics today such as the UN, NATO and OECD. Centring on Europe, where the multilateralization of international relations played out more intensely in the mid-20th century than in other parts of the world, it demonstrates a broad range of historiographical and methodological approaches to

institutions in international history. The book argues that after several 'turns' (cultural, linguistic, material, transnational), international history is now better equipped to restate its core questions of policy and power with a view to their institutional dimensions. Making use of new approaches in the field, this book develops an understanding of the specific powers and roles of IO-administrations by delving into their institutional make-up.

Available Open Access under CC-BY-NC license. Health literacy addresses a range of social dimensions of health including knowledge, navigation, communication as well as individual and

organizational skills for accessing, understanding, evaluating and using of information. Especially over the past decade, health literacy has become a major public health concern globally as an asset for promoting health, wellbeing and sustainable development. This comprehensive handbook provides an invaluable overview of current international thinking about health literacy, highlighting cutting edge research, policy and practice in the field. With a diverse team of contributors, the book addresses health literacy across the life-span and offers insights from different populations and settings. Providing a wide range of major findings, the book outlines current discourse in the field and examines necessary future dialogues and new perspectives.

These proceedings represent the work of presenters at the 7th European Conference on Intellectual Capital (ECIC 2015). This year the conference is being hosted by The Technical University of Cartagena, Spain on the 9-10 April 2015. The Conference Co-Chairs are Dr. Eva Martínez Caro, Dr. María Eugenia Sánchez & Dr. David Cegarra Leiva from the Technical University of Cartagena

and the Programme Chair is Dr. Juan Gabriel Cegarra Navarro also from the Technical University of Cartagena. The opening keynote address is by Constantin Bratianu, Bucharest University of Economic Studies, Romania on the topic of “A Dynamic Perspective on Intellectual Capital” Dr Scott Erickson from the School of Business, Ithaca College and Dr Helen Rothberg, Marist College, Poughkeepsie, USA will address the topic “Does intellectual capital have a role in making the big strategic decisions? On the second day of the conference Dr José Maria Viedma Marti from the Polytechnic University of Catalonia in Barcelona, Spain will talk about xxxx. The primary aim of this conference is to contribute to the further advancement of intellectual capital

theory and practice. The conference provides a platform for presenting findings and ideas for the intellectual capital community and associated fields. The range of people, issues and the mix of approaches followed will ensure an interesting two days. 115 abstracts were received for this conference. After the double blind, peer review process there are 43 academic papers, 13 PhD papers and 2 Masters Research Papers and 1 Work In Progress Paper published in these Conference Proceedings. These papers represent truly global research from some xx different countries, including the Albania, Australia, Austria, Canada, Czech Republic, Espana, Finland, France, Germany, Hungary, Indonesia, Italy, Kazakhstan, Malaysia Netherlands, Nigeria, Pakistan, Portugal,

Romania, Russia, Slovakia, Spain Thailand, United Arab Emirates, UK and the USA

The prevention and treatment of diseases is a primary concern for any nation in modern society. To maintain an effective public health system,

procedures and infrastructure must be analyzed and enhanced accordingly. Public Health and Welfare: Concepts, Methodologies, Tools, and Applications provides a comprehensive overview of the latest research perspectives on public health initiatives and promotion efforts. Highlighting critical analyses and emerging innovations on an international scale, this book is a pivotal reference source for professionals, researchers, academics, practitioners, and students interested in the improvement of public health infrastructures.

Health and Inequality SAGE

With the background of the 10 years' existence of the European Public Health Association (EUPHA) the present book deals with the developments and results of European Public Health in Science and

Practice. The contributions involve actual aspects and issues of different topics in Public Health: - Health care management and quality assurance in various settings - Health promotion and prevention for different population groups - Health related information and communication - Health care policy and science.

Proceedings of 5th European Conference on Clinical and Medical Case Reports 2017 Academic Conferences and publishing limited

This highly-readable text provides grounds on how to plan and conduct animal experiments that can be reproduced by others. The book touches on factors that may impact the reproducibility of animal studies including: the animal genetic background, the animal microbial flora,

environmental and physiological variables affecting the animal, animal welfare, statistics and experimental design, systematic reviews of animal studies, and the publishing process. The book addresses advanced undergraduates, graduate students and all scientists working with animals.

Proceedings of the 7th International Conference on the Assessment of Animal Welfare at the Farm and Group Level Academic Conferences Limited

How are public health services in Europe organized and financed? With European health systems facing a plethora of challenges that can be addressed through public health interventions there is renewed interest in strengthening public health services. Yet there are

enormous gaps in our knowledge. How many people work in public health? How much money is spent on public health? What does it actually achieve? None of these questions can be answered easily. This volume brings together current knowledge on the organization and financing of public health services in Europe. It is based on country reports on the organization and financing of public health services in nine European countries and an in-depth analysis of the involvement of public health services in addressing three contemporary public health challenges (alcohol obesity and antimicrobial resistance). The focus is on four core dimensions of public health services: organization financing the public health workforce and quality assurance. The questions the volume

seeks to answer are: o How are public health services in Europe organized? Are there good practices that can be emulated? What policy options are available? o How much is spent on public health services? Where do resources come from? And what was the impact of the economic crisis? o What do we know about the public health workforce? How can it be strengthened? o How is the quality of public health services being assured? What should quality assurance systems for public health services look like? This study is the result of close collaboration between the European Observatory on Health Systems and Policies and the WHO Regional Office for Europe Division of Health Systems and Public Health. It accompanies two other Observatory publications: Organization

and financing of public health services in Europe: country reports and The role of public health organizations in addressing public health problems in Europe: the case of obesity alcohol and antimicrobial resistance.

ECIW2008 Imprensa da Universidade de Coimbra / Coimbra University Press

This book analyses 4 central pieces of EU pharmaceutical regulation: the Orphan Drugs Regulation, the Paediatric Regulation, the Supplementary Protection Certificate Regulation, and the ATMP (Advanced Therapy Medicinal Products) Regulation. These four regulatory instruments constitute focal points in the pharmaceutical industry's approach to modern business and legal strategy. Their central role is justified by the way these regulatory instruments

interact with each other and with the patent system, and by the considerable impact they (as a whole) have for the evergreening of exclusive rights on pharmaceutical products. The book guides the reader through the latest case law and legislative developments and discusses how these influence strategic legal and business choices in the pharmaceutical industry. It brings to the forefront the often-overlooked significance of the legislative architecture of the EU pharmaceutical regulatory framework, and evaluates its results through the lens of the efficiency test. The book is an important resource for academics and practitioners interested in updated case law and an in-depth analysis of these four regulations. It is also important for those

interested in legislative studies, evaluation of legislation and a critical approach to legislative architecture.
