Or, rather, there are not three distinct regions, but three sorts of components which in most theses and questions are combined: a metaphysical, a psychological, and a logical component. *Philosophy and Logical*

Syntax (1935) - GORE ME DICENPhilosophy is considered as having three components, Metaphysics, Psychology and Logic, the present work falling into the latter category and being characterised as Logical Analysis. The purpose of Logical Analysis is to analyse assertions and make clear their sense, which involves determining their method of verification. notes on - "Philosophy and Logical Syntax" Though, as we have seen, the distinction between syntax and semantics was not entirely clear yet in the Logical Syntax, the goal of developing a philosophical or scientific meta-language referring solely to linguistic artifacts in an object language (leaving reference to any actual things or processes in the "world" to the scientific object language itself) is clearly spelled out and developed astonishingly far, considering how recently the Hilbert-Gödel-Tarski efforts at formalization ... Rudolf Carnap > G. Logical Syntax of Language (Stanford ... Moreover, the theory of logical syntax expounds a method with which one can talk about a language: it is a formal meta-theory about the pure forms of language. In the end, because Carnap argues that philosophy

aims at the logical analysis of the language of science and thus is the logic of science, the theory of the logical syntax can be considered as a definite language and a conceptual framework for philosophy.
