The field of sports history is no longer a fledgling area of study. There is a great vitality in the field and it has matured dramatically over the past decade. Reflecting changes to traditional approaches, sport historians need now to engage with contemporary debates about history, to be encouraged to position themselves and their methodologies in relation to

current epistemological issues, and to promote the importance of reflecting on the literary or poetic dimensions of producing history. These contemporary developments, along with a wealth of international research from a range of theoretical perspectives, provide the backdrop to the new Routledge Companion to Sports History. This book provides a comprehensive guide to the international field of sports history as it has developed as an academic area of study. Readers are guided through the development of the field across a range of thematic and geographical contexts and are introduced to the latest cutting edge approaches within the field. Including contributions from

many of the world's leading sports historians, the Routledge Companion to Sports History is the most important single volume for researchers and students in, and entering, the sports history field. It is an essential guide to contemporary research themes, to new ways of doing sports history, and to the theoretical and methodological foundations of this most fascinating of subjects.

Economists say there is a limit to what we gain by buying consumer goods. Americans say they want to work less. Yet we continue toiling away and use the proceeds to buy, buy, buy. Why? Stephen Rosenberg offers a novel theory, arguing that workers have learned to treat goods as stores of potential free time, legitimating endless wage work.

The Holy Spirit, being given as a gift in the opening chapters of Acts, initiates and sustains the early Jesus community, empowering their teaching, unity, meals, sharing of possessions and worship.

This work inquires into the impact of dissident sensibilities on the writings of the major Neronian authors. It offers a detailed and innovative analysis of essays, poetry and fiction written by Seneca, Lucan and Petronius, and illuminates their psychological and moral anguish. The study is intended as a companion volume to Vasily Rudich's earlier work *Political Dissidence under Nero: The Price of Dissimulation*, where he discussed the ways in which 'dissident sensibilities' of the Neronians affected their actual behaviour. *Dissidence and Literature under Nero* extends this analysis to show how the same sensibilities became manifest in the texts written by the Neronian authors. It explores the pressures on authors under a repressive regime, who strive to maintain their artistic integrity. Thus the argument of this book can be seen as a comparison between the predicament of a Neronian dissident and the situation of the postmodern intellectual. It will interest professional classicists and the wider audience concerned with the ongoing debate on the benefits and perils of rhetorical discourse.

In the Roman social hierarchy, the equestrian order stood second only to the senatorial aristocracy in status and prestige. Throughout more than a thousand years of Roman history, equestrians played prominent roles in the Roman government, army, and society as cavalrymen, officers, businessmen, tax collectors, jurors, administrators, and writers. This book offers the

first comprehensive history of the equestrian order, covering the period from the eighth century BC to the fifth century AD. It examines how Rome's cavalry became the equestrian order during the Republican period, before analysing how imperial rule transformed the role of equestrians in government. Using literary and documentary evidence, the book demonstrates the vital social function which the equestrian order filled in the Roman world, and how this was shaped by the transformation of the Roman state itself.

This book traces the relations between the organization of violence and social and political order from ancient Rome to early modern Europe. Following the work of Michel Foucault, the author studies the ways authority, obedience and forms of self-conduct were produced by the micro-techniques used to govern the bodies of violence deployed in different forms of warfare.

into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

*A Companion to the Neronian Age* Oxford University Press

Refusing a false dichotomy between 'politics' and 'religion' in Jesus' world (and our own), Richard A. Horsley explores Jesus' response to the imperial power of his day. Jesus and the Powers highlight the relevance of political realities under great empires for the rise of covenantal theology and apocalyptic vision in Israel's history; situates aspects of Jesus' prophetic and exorcising activity in the context of the Roman Empire; and shows how the character of his death by crucifixion itself galvanized the movement around him as his followers shaped a new community life in the shadow of imperial powers.

*Time for Things* Viking Adult

In 2018, journalist Jamal Khashoggi was murdered by Saudi regime operatives, shocking the international community and tarnishing the reputation of Muhammad bin Salman, the kingdom's young, reformist crown prince. Domestically, bin Salman's reforms have proven divisive, and his adoption of populist nationalism and fierce repression of diverse critical voices--religious scholars, feminists and dissident youth--have failed to silence a vibrant and well-connected Saudi society.

Madawi Al-Rasheed lays bare the world of repression behind the crown prince's reforms. She dissects the Saudi regime's propaganda and progressive new image, while also dismissing Orientalist views that despotism is the only pathway to stable governance in the Middle East. Charting old and new challenges to the fragile Saudi nation from the kingdom's very inception, this blistering book exposes the dangerous contradictions at the heart of the Son King's Saudi Arabia.

Never has there been so little need to cook. Yet Michael Symons maintains that to be truly human we need to become better cooks: practical and generous sharers of food. Fueled by James Boswell's definition of humans as cooking animals (for "no beast can cook"), Symons sets out to explore the civilizing role of cooks in history. His wanderings take us to the clay ovens of the prehistoric eastern Mediterranean and the bronze cauldrons of ancient China, to fabulous banquets in the temples and courts of Mesopotamia, Egypt, and Persia, to medieval English cookshops and southeast Asian street markets, to palace kitchens, diners, and to modern fast-food eateries. Symons samples conceptions and perceptions of cooks and cooking, from Plato and Descartes to Marx and Virginia Woolf, asking why cooks, despite their vital and central role in sustaining life, have remained in the shadows, unheralded, unregarded, and underappreciated. "People think of meals as occasions where you share food," he notes. "They rarely think of cooks as sharers of food." Considering such notions as the physical and political consequences of sauce, connections between food and love, and cooking as a regulator of clock and calendar, Symons provides a spirited and diverting defense of a

cook-centered view of the world. Michael Symons is the author of *One Continuous Picnic: A History of Eating in Australia and The Shared Table*.

Based on the records of a murder trial that transfixed all of Italy in the late 1870s, this study makes use of a dramatic court case to develop a new paradigm for the history of emotions - the 'emotional arena'. Set in the decade following Italian unification, the context was one of notable cultural variety. An as-yet unexplored aspect of this was that the experience and expression of emotions were as variable as the regions making up the new nation. Through a close examination of the spaces in which daily lives, loves, and deaths unfolded - from marital homes to places of socializing and entertainment, to a Roman court room - Mark Seymour explores the way social 'arenas' are crucial to the historical development of emotional cultural rules. The narrative is driven by the failed marriage of a decorated but allegedly impotent Risorgimento soldier, his wife's scandalous affair with a virile circus artiste (who had a string of previous lovers), and the illicit new couple's murder of the hapless husband. Hundreds of witnesses - from local professionals to servants and even circus clowns - interviewed across the length and breadth of the peninsula, left their personal views on marriage, sexuality, and infidelity. These provide an extraordinary series of peepholes into little-known areas of the new nation's social fabric. A careful yet imaginative reading of the prosecution records, as well as contemporary newspaper coverage, allows reconstruction of the highly emotional experiences of all those touched by this

extraordinary story. The result is a classic Italian micro-history with relevance for today's emotionally volatile times.

**Jesus and the Powers** BRILL

From the first cave paintings to Britta Jaschinski's provocative animal photography, it seems we have been describing and portraying animals, in some form or another, for as long as we have been human. This book provides a broad historical overview of our representations of animals, from prehistory to postmodernity, and how those representations have altered with changing social conditions. Taking in a wide range of visual and textual materials, Linda Kalof unearths many surprising and revealing examples of our depictions of animals. She also examines animals in a broad sweep of literature, narrative and criticism: from Pliny the Elder's *Natural History* to Donna Haraway's writings on animal-human-machine interaction; and from accounts of the Black Plague and histories of the domestic animal and zoos, to the ways that animal stereotypes have been applied to people to highlight hierarchies of gender, race and class. Well-researched and scholarly, yet very accessible, this book is a significant contribution to the human-animal story. Featuring more than 60 images, *Looking at Animals in Human History* brings together a wealth of information that will appeal to the wide audience interested in animals, as well as to specialists in many disciplines. Linda Kalof is professor of sociology at Michigan State University. Her books include *The Earthscan Reader in Environmental Values* and *The Animals Reader: The Essential Classic and Contemporary Writings*.

**Wealth and Poverty in Jewish Tradition** Cambridge University Press

'The overall conception of the volume is absolutely splendid, and the editors skilfully place the material in the context of disciplinary and post-disciplinary developments in sociology. This is a major contribution to the field, as well as a comprehensive and reliable guide to its main components' - William Outhwaite, Professor of Sociology, School of European Studies, University of Sussex  
 'It is hard to think of anything that has been left out in this masterly survey of contemporary historical sociology. The editors have done a superb job in the selection of both themes and contributors. We now at last have an up-to-date book to assign in our graduate courses on comparative historical sociology. There's really nothing else like it out there.... The editors' introduction is one of the best things I have read on how the field developed, and the problems it has encountered' - Krishan Kumar, William R Kenan, Jr Professor of Sociology, University of Virginia  
 'The range of topics covered and the number of distinguished scholars who have contributed to the handbook is impressive, with leading figures such as Bryan S Turner, John R Hall, Gianfranco Poggi and Craig Calhoun among the contributors to a book that covers areas as diverse as post-colonial historiography and the historical sociology of the city... the handbook fills a void within the sizable literature on historical sociology and undoubtedly will be a useful addition to graduate reading lists' - *The British Journal of Sociology*  
 What is important in historical sociology? What are the main routes of development in the subject? This Handbook consists of 26 chapters on historical sociology. It is divided into three parts. Part One is devoted to Foundations and covers Marx, Weber, evolutionary and functionalist approaches, the Annales School, Elias, Nelson

and Eisenstadt. Part Two moves on to consider major approaches, such as modernization approaches, late Marxist approaches, historical geography, institutional approaches, cultural history, intellectual history, postcolonial and genealogical approaches. The third part is devoted to the major substantive themes in historical sociology ranging from state formation, nationalism, social movements, classes, patriarchy, architecture, religion and moral regulation to problems of periodization and East-West divisions. Each part includes an introduction that summarizes and contextualizes chapters. A general introduction to the volume outlines the current situation of historical sociology after the cultural turn in the social sciences. It argues that historical sociology is deeply divided between explanatory 'sociological' approaches and more empirical and interpretative 'historical' approaches. Systematic and informative the book offers readers the most complete and authoritative guide to historical sociology.
