 The Cliff Hardy Case Files
 It takes more than 10 billion years to create just the right conditions on one planet for life to begin. It takes another three billion years of evolving life forms until it finally happens, a primate super species emerges: mankind. In conjunction with History Channel's hit television series by the same name, Mankind is a sweeping history of humans from the birth of the Earth and hunting antelope in Africa's Rift

Valley to the present day with the completion of the Genome project and the birth of the seven billionth human. Like a Hollywood action movie, Mankind is a fast-moving, adventurous history of key events from each major historical epoch that directly affect us today such as the invention of iron, the beginning of Buddhism, the crucifixion of Jesus, the fall of Rome, the invention of the printing press, the Industrial Revolution, and the invention of the computer. With more than 300 color photographs and maps, Mankind is not only a visual overview of the broad story of civilization, but it also includes illustrated pop-out sidebars explaining distinctions between science and history, such as why there is 700 times more iron than bronze buried in the earth, why pepper is the only food we can taste with our skin, and how a wobble in the earth's axis helped bring down the Egyptian

Empire. This is the most exciting and entertaining history of mankind ever produced.

This inter-disciplinary edited volume critically examines the dynamics of the War on Terror, focusing on the theme of the politics of response. The book explores both how responses to terrorism - by politicians, authorities and the media - legitimise particular forms of sovereign politics, and how terrorism can be understood as a response to global inequalities, colonial and imperial legacies, and the dominant idioms of modern politics. The investigation is made against the backdrop of the 7 July 2005 bombings in London and their aftermath, which have gone largely unexamined in the academic literature to date. The case offers a provocative site for analysing the diverse logics implicated in the broader context of the War on Terror, for examining how terrorist events are framed, and how such framings serve to legitimise particular policies and political practices.

The Maya created one of the world's most brilliant civilizations, famous for its art, astronomy, and deep fascination with the mystery of time. Despite collapse in the ninth century, Spanish invasion in the sixteenth, and civil war in the twentieth, eight million people in Guatemala, Belize, and southern Mexico speak Mayan languages and maintain their resilient culture to this day. Traveling through Central America's jungles and mountains, Ronald Wright explores the ancient roots of the Maya, their recent troubles, and prospects for survival. Embracing history, anthropology, politics, and literature, *Time Among the Maya* is a riveting journey through past magnificence and the study of an enduring civilization with much to teach the present. "Wright's unpretentious narrative blends anthropology, archaeology, history, and politics with his own entertaining excursions and encounters." -- *The New Yorker*; "Time Among the Maya shows Wright to be far more than a mere storyteller or descriptive writer. He is an historical philosopher with a profound understanding of other cultures." -- Jan Morris, *The Independent* (London).
