Letizia Shaikh  
For every story of optimism about the growth of medical tourism to India, there are multiple others about medical neglect. Scratch the surface and you find a thick layer of corruption in

this life-sustaining sector. This hard-hitting volume shows a mirror to society and, more specifically, to those associated with the health sector—on how healers, in many cases, are shifting shape to becoming predators. In the essays by contributors from within and outside the medical fraternity, we see the many faces, the many facets of corruption—from exorbitant billing by corporate hospitals to the non-merit-based selection in medical colleges to questionable motives playing strong in the area of organ transplantation. But *Healers or Predators?* is not only about the illness affecting the sector. It also offers solutions, and some

stories of hope. The Foreword by Amartya Sen is an added bonus. 'This splendid, if depressing, book will do a lot to remedy [the] momentous neglect [of healthcare]. We have excellent reasons to be grateful to the authors and editors of this important collection of investigative studies.'—Amartya Sen

Seeking to extend existing scholarship on gender and colonialism and on women and American religion, this cross-cultural study examines the work of American missionary women in South Asia at several levels. A primary concern of the study is to historicize the interventions of these women and situate them within the dual contexts of the sending society and the receiving culture. It focuses on missionaries Isabella Thoburn and Ida

Scudder, who founded some of the premier women's colleges and hospitals in British colonial India. The book also draws upon the narratives and reminiscences of South Asian women, now in their seventies, who attended such institutions in the 1940s, and whose voices texture our understanding of American women's missionary work in "Other" cultures.
