The Holy See, Social
Justice, and International
Trade Law: Assessing the
Social Mission of the

Catholic Church in the
GATT-WTO System
highlights the uniqueness
of the Catholic Church as
the foremost institution in
the world that can
confront issues in world
trade that affect the
common good. The
distinguished author Rev.
Dr. Alphonsus Ihuoma

provides a superbly broad and deep examination that is both scholarly and practical of the mission of the Catholic Church in the world as one that centers on the temporal and eternal needs of humanity. His discussion treats thoughtfully the mediatory role of the church in world affairs and argues persuasively that the church has been engaged in this role since its very beginning, even before nations embraced organized politics two thousand years ago. This remarkable book is a

great tool for any reader seeking to know more about the unique position of the church in world affairs, especially in the GATT-WTO system. The book rightly lauds the church's achievements in history. But it equally and rightly argues that the church must do more to address present challenges in the world trading system. Readers will be enlightened by the treatment of the failures of the GATT-WTO system in pursuing the objectives for which it was established, the church's

efforts to pursue vital related objectives, and the need for her to do more.

Distributive Justice and World Trade Law Oxford University Press

There are two oppositional narratives in relation to telling the story of indigenous peoples and minorities in relation to globalization and intellectual property rights. The first, the narrative of Optimism, is a story of the triumphant opening of brave new worlds of commercial integration and cultural

inclusion. The second, the narrative of Fear, is a story of the endangerment, mourning, and loss of a traditional culture. While the story of Optimism deploys a rhetoric of commercial mobilization and “innovation,” the story of Fear emphasizes the rhetoric of preserving something “pure” and “traditional” that is “dying.” Both narratives have compelling rhetorical force, and actually need each other, in order to move their opposing audiences into

action. However, as Picart shows, the realities behind these rhetorically framed political parables are more complex than a simple binary. Hence, the book steers a careful path between hope rather than unbounded Optimism, and caution, rather than Fear, in exploring how law functions in and as culture as it contours the landscape of intellectual property rights, as experienced by indigenous peoples and minorities. Picart uses, among a variety of tools derived from law, critical

and cultural studies, anthropology and communication, case studies to illustrate this approach. She tracks the fascinating stories of the controversies surrounding the ownership of a Taiwanese folk song; the struggle over control of the Mapuche’s traditional land in Chile against the backdrop of Chile’s drive towards modernization; the collaboration between the Kani tribe in India and a multinational corporation to patent an anti-fatigue chemical agent; the drive for

respect and recognition by Australian Aboriginal artists for their visual expressions of folklore; and the challenges American women of color such as Josephine Baker and Katherine Dunham faced in relation to the evolving issues of choreography, improvisation and copyright. The book also analyzes the cultural conflicts that result from these encounters between indigenous populations or minorities and majority groups, reflects upon the ways in which these

conflicts were negotiated or resolved, both nationally and internationally, and carefully explores proposals to mediate such conflicts.

Unilateral Sanctions in International Law Edward Elgar Publishing
The Oxford Handbook of the Politics of International Trade surveys the literature on the politics of international trade and highlights the most exciting recent scholarly developments. It examines the impact of

domestic societal actors, domestic institutions, and international interactions on trade policy and trade flows, as well as building on this basic analytical framework. Including contributions from prominent scholars around the globe, and from multiple theoretical and methodological traditions, the volume considers the development of concepts and policies about international trade; the influence of individuals, firms, and societies; the role of domestic and

international institutions; and the interaction of trade and other issues, such as monetary policy, environmental challenges, and human rights.

Showcasing both established theories and findings and cutting-edge new research, the Handbook is a valuable reference for scholars of political economy.

Trade Facilitation in the Multilateral Trading System Oxford University Press

An in-depth analysis of 'product likeness' in GATT law - the key concept for

the application of the non-discrimination principle.

Research Handbook on Intellectual Property and Climate Change Edward Elgar Publishing

Written by a global group of leading scholars, this wide-ranging Research Handbook provides insightful analysis, useful historical perspective, and a point of reference on the controversial nexus of climate change law and policy, intellectual property law and policy, innovation policy, technology transfer, and trade. The contributors

provide a unique review of the scientific background, international treaties, and political and institutional contexts of climate change and intellectual property law. They further identify critical conflicts and differences of approach between developed and developing countries. Finally they put forward and analyse the relevant intellectual property law doctrines and policy options for funding, developing, disseminating, and regulating the required

technologies and their associated activities and business practices. The book will serve as a resource and reference tool for scholars, policymakers and practitioners looking to understand the issues at the interface of intellectual property and climate change.

The Relevant Market in International Economic Law Springer Nature

Since the beginnings of the GATT and the Bretton Woods institutions, and on to the creation of the WTO, states have

continued to develop institutions and legal infrastructure to promote global interdependence. International lawyers are experts in understanding how these institutions operate in practice, but they tend to uncritically accept comparative advantage as the principal normative criterion to justify these institutions. In contrast, moral and political philosophers have developed accounts of global justice, but these accounts have had relatively little influence

on international legal scholarship and on institutional design. This volume reflects the results of a symposium held at Tillar House, the American Society of International Law headquarters in Washington, DC, in November 2008, which brought together philosophers, legal scholars and economists to discuss the problems of understanding international economic law from the standpoints of rights and justice, in particular from the

standpoint of distributive justice.

Trade Remedies in North America Cambridge University Press

This accessible, comprehensive and pertinent Handbook will be of interest to academics, researchers and students working in the fields of international politics, in particular political economy and foreign policy, and the economics of trade.^{3/4}

Handbook of the International Political Economy of Trade

Oxford Handbooks International Trade LawLexisNexisInternational Trade LawDictionary of International Trade LawLexisNexis Human Rights and International Trade Cambridge University Press

This title provides a comprehensive introduction to the key issues in trade and liberalization of services. Providing a useful overview of the players involved, the barriers to trade, and case studies in a number of service

industries, this is ideal for policymakers and students interested in trade.

Dictionary of International Trade

Law Kluwer Law International B.V. Non-communicable diseases, associated with risk factors such as tobacco consumption, poor diet and alcohol use, represent a growing health burden around the world. The seriousness of non-communicable diseases is reflected in the adoption of international instruments

such as the WHO Framework Convention on Tobacco Control; the WHO Global Strategy on Diet, Physical Activity and Health; and the WHO Global Strategy to Reduce the Harmful Use of Alcohol. In line with these instruments, states are beginning to use measures such as taxes, restrictions on marketing, product regulation and labeling measures for public health purposes. This book examines the extent to which the law of the World Trade Organization restricts

domestic implementation of these types of measures. The relationship between international health instruments and the WTO Agreement is examined, as are the WTO covered agreements themselves. Strengthening Regional Trade Integration in South Asia Cambridge University Press International Trade Law: Interdisciplinary Theory and Practice has been completely revised in its Third Edition, building upon the global successes of its two predecessor

editions. Truly a "world law" Textbook applicable in any of the approximately 152 WTO countries, the Third Edition places much emphasis on coverage of developing and least developed countries in Asia, Africa, and Latin America, highlighting the significance of their demographics, politics, culture, and economic dynamism. Europe and the high-profile trade disputes between the United States and the European Union is another chief focal point of this

distinctively comprehensive book. Notably, the Textbook avoids two pitfalls: an American-centric approach, and the suggestion that international trade law is only about the WTO. The Textbook contains 50 Chapters dedicated to all aspects of the field, from ancient and medieval views about the morality of trade to the mysteries of adjustments to Constructed Export Price in a dumping margin calculation. The Textbook covers fully the Doha

Round and the new, post-9/11 trade security rules. It includes 6 Chapters on free trade agreements (FTAs), 2 Chapters each on agriculture, services, and intellectual property (IP), and plenty of excerpts from key WTO and U.S. court cases. Overall, the Textbook is both a tour de force and user friendly. Not surprisingly, the Textbook has been used at roughly 100 law schools around the world, and translated into Vietnamese. Each chapter is manageably-sized and

offers a user-friendly structure, allowing the flexibility of choosing the chapters that best serve the needs of a professor's individual course. The topics in each chapter help students establish a fundamental foundation upon which to build their knowledge of international trade law. Useful notes appear throughout the text, carefully constructed and organized to guide and challenge students, without abandoning them to trying to play "find-the-ball" on their own,

piecemeal. The author sets forth five clear and fundamental themes in the preface which resonate throughout the text, providing not only coherence and integration, but also the passion that will ensure lively classroom discussion and debate. The author covers hot topics, such as protectionism, regionalization, labor, the environment, and sanctions, from both a practical and theoretical standpoint. Interesting and substantive

interdisciplinary readings provide further penetration of a subject on not only the economics of international trade law, but on perspectives brought to the field by political scientists, international relations specialists, and philosophers.

International Investment Management

Edward Elgar Publishing
What does justice demand in international trade regulation? And how far does World Trade Organization (WTO) law

respond to those demands? Whether our focus is developing countries, struggling industries, or environmental protection, distributive conflict is a pervasive feature of international economic law. Despite this, we lack an adequate theory of distributive justice for this domain. Drawing on philosophical approaches to global justice, this book advances a novel theory of justice in trade regulation, and applies this to explain and critique the law of the

WTO. Integrating theoretical and doctrinal approaches, it demonstrates the potential for political theory to illuminate and inform the progressive development of WTO law, including rules on border measures, discrimination, trade remedies and domestic regulation. Written from an interdisciplinary perspective, accessible to lawyers, philosophers and political scientists, the book will appeal both to theorists interested in building bridges from

theory to practice, and practitioners seeking new perspectives on existing problems. International Trade Law Oxford University Press, USA Bringing together several contrasting views of each topic, this book addresses highly topical issues including institutional cooperation and lawmaking, and the interaction between trade and human rights in dispute settlement. Conceptual analysis is combined with case studies.

The Oxford Handbook of the Political Economy of International Trade LexisNexis Over the past 10 years, the content and application of international trade law has grown dramatically. The WTO created a binding dispute settlement process and in resolving disputes, the judicial organs of the WTO have built up a substantial amount of new international trade law. Emerging from this new WTO process is an international trade law

system that is in some respects self-contained and in other respects overlapping and linked to other international legal, economic and political regimes. The 'boundaries' of trade law are now generating enormous interest and controversy which, at a broader level, is subsumed within the debate over globalisation. The detailed development of the rules of international trade is being examined with increasing frequency by scholars, government officials and trade law

practitioners. But how does it fit with existing systems? How is it modified by them? How does the international trade law system affect and modify other regimes? This Handbook places international trade law within its broader context, providing comment and critique on a range of questions both related specifically to the discipline of international trade law itself and to the outside face of international trade law and its intersection with

States and other aspects of the international system. It examines the economic and institutional context of the world trading system, its substantive law (including regional trade regimes) and the settlement of disputes. The final part of the book explores the wider framework of the world trading system, considering issues including the relationship of the WTO to civil society, the use of economic sanctions, state responsibility, and the regulation of multinational

corporations. Oxford Handbooks offer authoritative and up-to-date surveys of original research in a particular subject area. Specially commissioned essays from leading figures in the discipline give critical examinations of the progress and direction of debates. Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social sciences.

Asian Approaches to

International Law and the Legacy of Colonialism
Cambridge University Press

This timely and thought-provoking work analyses Mexico's conduct of its international trade dispute litigation from 1986 to 2007 in both multilateral and bilateral fora (i.e., GATT/WTO) as well as preferential trade agreements such as NAFTA. It exhaustively examines all cases and provides a well-reasoned explanation of Mexico's conduct, looking at factors such as bargaining power

and political economy-type considerations. It also touches upon the strengths and weaknesses of the various dispute settlement systems that Mexico has used, analyzing their procedural aspects and their more important substantive elements. In addition, It suggests a methodology for assessing the results of litigation, based on inputs and outputs. This methodology may be used for assessing the cases of other WTO Members. It compares the dispute settlement

system of the WTO and NAFTA, including other preferential trade agreements. This is useful in the context of any WTO Member with ? potential or existing ? regional dispute settlement systems. Based on Mexico's data, it evidences the limitations of country v. country legal remedies by highlighting the issues left unresolved. It analyzes the conflicts of law between NAFTA and the WTO dispute settlement systems.

Democracy in Decline
Edward Elgar Publishing

This timely book brings clarity to the debate on the new legal phenomenon of environmental border tax adjustments. It will help form a better understanding of the role and limits these taxes have on environmental policies in combating global environmental challenges, such as climate change.

The Oxford Handbook of International Trade Law
McGill-Queen's Press - MQUP

Global Constitutionalism and the Path of

International Law offers an account of the most important growth and features of international law in the form of global constitutionalism. This book demonstrates how global constitutionalism is shaping the path of international law.

Torture and Its Definition in International Law
Kluwer Law International B.V.

This is the first book that explores whether there are any rules in international law applicable to unilateral sanctions and if so, what

they are. The book examines both the lawfulness of unilateral sanctions and the limitations within which they should operate. In doing so, it includes an analysis of State practice, the provisions of various international legal instruments dealing with such sanctions and their impact on other areas of international law such as freedom of navigation, aviation and transit, and the principles of international trade, investment, regional economic integration, and

the protection of human rights and the environment. This study finds that unilateral sanctions by a state or a group of states against another state as opposed to 'smart' or targeted sanctions of limited scope would be unlawful, unless they meet the procedural and substantive requirements stipulated in international law. Importantly, the book identifies and consolidates these requirements scattered in different areas of international law,

including the additional rules of customary international law that have emerged out of the recent practice of States and that increase the limitations on the use of unilateral sanctions.

International Trade Law Oxford University Press

World trade is governed by the rules of the World Trade Organization (WTO), the successor to the General Agreement on Tariffs and Trade (GATT). The WTO sets rules of conduct for the international trade of

goods and services and for intellectual property rights, provides a forum for multinational negotiations to resolve trade problems, and has a formal mechanism for dispute settlement. It is the primary institution working, through rule-based bargaining, at freeing trade. In this book, Kyle Bagwell and Robert Staiger provide an

economic analysis and justification for the purpose and design of the GATT/WTO. They summarize their own research, discuss the major features of the GATT agreement, and survey the literature on trade agreements. Their focus on the terms-of-trade externality is particularly original and ties the book together.

Topics include the theory of trade agreements, the origin and design of the GATT and the WTO, the principles of reciprocity, the most favored nation principle, terms-of-trade theory, enforcement, preferential trade agreements, labor and environmental standards, competition policy, and agricultural export subsidies.
