 Process Cast In Stone Case
 Cast Stone fabricated using the EMVDT production system is made by vibratory ramming earth moist, zero-slump concrete against rigid formwork until it is densely compacted and ready for immediate removal from the form.; enabling as many as 100 pieces to be cast from a single mold in an eight-hour day thus it is ideally suited to fast-

track construction projects due to its production capability.
 Cast Stone Manufacturing Process - Corinthian Cast ...
 One of the most important and difficult aspects of the gemstone casting process is removal of the investment. Flasks should never be quenched in water. Quenching causes sudden contraction of the stones and metal, which leads to shattering or cracking of gemstones. Once cast, flasks should be allowed to cool for two hours.

 Cast in stone
 Synonyms | Collins English Thesaurus
 Industry-wide, thin stone veneer is typically manufactured through a wet-cast process, for which a mold is created by spraying latex over the surface of pre-arranged natural stones. During the manufacturing process, the latex mold is placed in a metal pan and handpainted with colorant

that will become the external colors of the manufactured stone units.
 Dry-Cast Manufacturing: Thin Masonry Veneer Evolution
 Cast Stone is defined as “a refined architectural concrete building unit manufactured to simulate natural cut stone, used in unit masonry applications.” Cast Stone is a masonry product, used as an architectural feature, trim, ornament or facing for buildings or other structures.
