Any engineering drawing should show everything: a complete understanding of the object should be possible from the drawing. If the isometric drawing can show all details and all dimensions on one drawing, it is ideal. One can pack a great deal of information into an isometric drawing.

the drawing. Fig. 40 may be shown straightened out or aligned in one view. This is to avoid drawing in a foreshortened position. When the space available is limited to allow a satisfactory scale to be

used for the representation of a

symmetrical piece, it is a good practice to make one view a half, as shown in Fig. 41.
