Software, Solutions and Outsourced Services | ProcessFlows Understanding the Difference Between Workflow Management and BPM Posted on May 24, 2018 by Elizabeth Quirk in Best Practices Workflow management and Business Process Management (BPM) are two important terms to modern business, but some have difficulties finding the difference between them. Understanding the Difference Between Workflow Management ... Business process management (BPM) is a discipline in operations management in which people use various methods to discover, model, analyze, measure, improve, optimize, and automate business processes. Any combination of methods used to manage a company's business processes is BPM. Processes can be structured and repeatable or unstructured and variable.
