Introduce Sustainability Into Your Productions Adams Media

We often picture life on the Canadian home front as a time of austerity, as a time when women went to work and men went to war. Graham Broad explodes this myth of home front sacrifice by bringing to light the contradictions of consumer society in wartime. Governments pressured Depression-weary citizens to save for the sake of the nation, but Canadians had money in their pockets, and advertisers tempted them with fresh groceries, glamorous movies, and new cars and appliances. Broad reveals that our "greatest generation" was not impervious to temptation but rather embarked on one of the biggest spending booms in our nation's history.

This invaluable guide takes a step-by-step approach to the most common and popular theatre production practices and covers important issues related to the construction of wooden, fabric, plastic, and metal scenery used on the stage. This new edition of the *Illustrated Theatre Production Guide* uniquely shows you how to build scenery through detailed lessons and hundreds of

drawings. The illustrations make this book like no other and offers solutions to problems that you face, from rigging and knot tying, to drapery folding and the most detailed information on metal framing available. Written for the community theatre worker who has to be a jack of all trades and the student who needs to learn the fundamentals, respected author John Holloway teaches in a way that covers the necessities but doesn't bog you down with heavy language and boring verbosity. New features in this book range from expanded information on metal framing and foam construction to brand new elements such as a chapter on stage management and an extremely helpful Website with videos -- meant to go along with the informative section on projects. These videos take you from the drawings and descriptions in the book to the video instructions that will help you learn visually. A must have for the theatre professional as a guide to refer back to over and over again.

This book highlights the shortcomings of the present Digital Rights Management (DRM) regulations in China. Using literature reviews and comparative analysis from theoretical and empirical perspectives, it appraises different DRM restriction regulations and practices as well as current advice on balance of interests to analyze the dilemma faced by the DRM system. This research intends to help China establish a comprehensive DRM regulatory model through comparative theoretical and empirical critiques of systems in America and Europe. A newly designed DRM regulatory model should be suitable for specific Chinese features, and should consist of government regulated, self-regulated, and even unregulated sections. The new regulation model might be an addition to existing legal structures, while self-regulations/social enforcement also would be as important as legislation based on case studies.

Hands on Media History explores the whole range of hands on media history techniques for the first time, offering both practical

guides and general perspectives. It covers both analogue and digital media; film, television, video, gaming, photography and recorded sound. Understanding media means understanding the technologies involved. The hands on history approach can open our minds to new perceptions of how media technologies work and how we work with them. Essays in this collection explore the difficult questions of reconstruction and historical memory, and the issues of equipment degradation and loss. Hands on Media History is concerned with both the professional and the amateur, the producers and the users, providing a new perspective on one of the modern era's most urgent questions: what is the relationship between people and the technologies they use every day? Engaging and enlightening, this collection is a key reference for students and scholars of media studies, digital humanities, and for those interested in models of museum and research practice.

Teachers, principals, school administrators, even school support staff know that it "takes a village to educate a child". Unfortunately, educators, parents and tax payers are often on different sides of issues, and work at cross purposes. Teachers get frustrated and stressed, and parents get angry, upset, and often aggressive and hostile towards school staff, often because they care so much. In this practical and hands-on book, teachers, administrators and school staff can learn to deal with even the most difficult parents, even those who are insulting and challenging. You'll learn over 100 hands-on, practical tactics to: Take control of difficult conversations with parents Maintain your own self-control when interacting with upset, and even abusive parents and members of the community. Reduce the time and stress involved in dealing with uncooperative parents. Apply the Psychology of anger, and basic psycholinguistic elements to establish rapport and bridges when conflict happens. Apply basic principles of Jiu_Jitsu and Aikido to difficult conversations. Stop verbal abuse cold, while maintaining a professional demeanor and focusing on the welfare of the student. Handle non-verbal intimidation tactics smoothly and safely. Set limits and apply them to difficult interactions when the gentler methods of verbal self-defense fail. Ideal for teaching staff, but also school principals, school superintendents and school board officials -- anyone who deals directly with parents and community members. Included is a special chapter for principals and administrators with tactics to use to support teachers and staff in building bridges with the community, rate payers, and parents.
