Developed by an experienced educator
and classroom tested for more than a
decade, the "I Love Math" program
presents a complete elementary math
curriculum! Each volume provides an
entire year's worth of challenging

exercises focused on standardsbased
topics. Using engaging color graphics
and easytofollow practical lessons, the
program is perfect for students of
various learning styles and skill levels.
The unique learning approach featured
in the program furnishes a funfilled
means of motivating students to think
more deeply, investigate, explain, and
understand problemsolving strategies.
Each workbook provides completed
coverage of the following concepts:
whole numbers, patterns & algebra,
mass, addition & subtraction, data, time,

multiplication & division, length, threedimensional space, chance, volume & capacity, and position. Concepts are divided into two sections one per semester. Each section is two or three pages in length and is followed by an assessment which allows for immediate and continuous feedback. Lesson extensions and suggestions for going forward are also included with each activity. The hands on activities can be performed using a variety of commonly available classroom materials.

Building Vocabulary from Word Roots provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more

syllables are of Greek or Latin origin. Instead of learning words and definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. Building Vocabulary from Word Roots: Level 4 kit includes: Teacher's Guide; Student Guided Practice Book (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); Assessments to support data-driven instruction; and Digital resources including modeled lessons, 50 bonus activities, and more.

This publication is the last volume to appear of Dame Kathleen Kenyon's excavations in Jerusalem, presenting the Bronze and Iron Age material. It contains a stratigraphical analysis of the architectural remains, a study of the pottery and an interpretation of the results. The volume includes a reconstruction of the occupational history of the site, currently a highly controversial issue, using not only Kenyon's results, but data from earlier and more recent published digs.

Designed to help all students to learn real chemistry, *Living By Chemistry* is a full-year high school curriculum that aligns with the new Next Generation Science Standards (NGSS) and the most rigorous of state standards.

Incorporating science practices with a guided-inquiry approach, students ask questions, collect evidence, and think like scientists when learning with *Living By Chemistry*.

Current Status of the Three Mile Island Nuclear Generating Station, Units 1 and 2 Peterson's

When the Nuclear Safety Commission in Japan reviewed safety-design guidelines for nuclear plants in 1990, the regulatory agency explicitly ruled out the need to consider prolonged AC power loss. In other words, nothing like the catastrophe at the Fukushima Daiichi Nuclear Power Station was possible—no tsunami of 45 feet could swamp a nuclear power station and knock out its emergency systems. No blackout could last for days. No triple meltdown could occur. Nothing

like this could ever happen. Until it did—over the course of a week in March 2011. In this volume and in gripping detail, the Independent Investigation Commission on the Fukushima Nuclear Accident, a civilian-led group, presents a thorough and powerful account of what happened within hours and days after this nuclear disaster, the second worst in history. It documents the findings of a working group of more than thirty people, including natural scientists and engineers, social scientists and researchers, business people, lawyers, and journalists, who researched this crisis involving multiple simultaneous dangers. They conducted over 300 investigative interviews to collect testimony from relevant individuals. The responsibility of this committee was to

act as an external ombudsman, summarizing its conclusions in the form of an original report, published in Japanese in February 2012. This has now been substantially rewritten and revised for this English-language edition. The work reveals the truth behind the tragic saga of the multiple catastrophic accidents at the Fukushima Daiichi Nuclear Power Station. It serves as a valuable and essential historical reference, which will help to inform and guide future nuclear safety and policy in both Japan and internationally.

Give your students a solid foundation in core accounting concepts while helping learners develop a true appreciation for why accounting is important to business

and a prosperous society. Warren/Reeve/Duchac's FINANCIAL AND MANAGERIAL ACCOUNTING, 14E clearly demonstrates how accounting is much more than simply data and black and white rules. Instead, students see how accounting provides key information used to make critical business decisions. A new chapter schema provides context for how each chapter's content fits into the big picture. The book focuses on why accounting is important and consistently reinforces connections to the big picture by connecting journal entries to the accounting equation. Fresh organization progresses from the simplest to the more complex topics with reorganized and fully integrated coverage of the new Revenue Recognition standard, reorganized coverage of adjustments,

and reorganized managerial accounting chapters Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Touted as the most successful NSF-funded project published, Chemistry in the Community (ChemCom) by the American Chemical Society (ACS) offers a meaningful and memorable chemistry program for all levels of high school students. ChemCom covers traditional chemistry topics within the context of societal issues and real-world scenarios. Centered on decision-making activities

where students are responsible for generating data in an investigating, analyzing that data and then applying their chemistry knowledge to solve the presented problem. The text is intensively laboratory-based, with all 39 of the investigations integrated within the text, not separate from the reading. With the ChemCom program, students learn more organic and biochemistry, more environmental and industrial chemistry, and more on the particulate nature of matter than other textbooks all within the relevance of solving problems that arise in everyday life. Meticulously updated to meet the needs of today's teachers and students, the new sixth edition of ChemCom adheres to the new science framework as well as the forthcoming next generation of science

standards. Incorporating advances in learning and cognitive sciences, ChemCom's wide-ranging coverage builds upon the concepts and principles found in the National Science Education Standards. Correlations are available showing how closely aligned ChemCom is to these and other state standards ChemCom Frequently Asked Questions The following link takes you to frequently asked questions about the high school chemistry textbook, Chemistry in the Community.
