### Mediterranean Migration and the Labour Markets

Simon and Schuster

This book constitutes the refereed proceedings of the 5th International Conference of the CLEF Initiative, CLEF 2014, held in Sheffield, UK, in September 2014. The 11

full papers and 5 short papers presented were carefully reviewed and selected from 30 submissions. They cover a broad range of issues in the fields of multilingual and multimodal information access evaluation, also included are a set of labs and workshops designed to test different aspects of mono and cross-language information retrieval

systems

### **Bibliografia Sobre Sanidad Vegetal**

Springer Science &  
Business Media

Cassava is the most important root and tuber crop grown in the tropical developing regions of the world. While the greater part of cassava production is destined for human food uses, the potential for the use of cassava and cassava

products in animal feeding has increased considerably over the past 20 years. The interest in the use of cassava as a carbohydrate source to replace, partially or totally, feed grains in rations for swine, poultry, ruminants, and other animals has generated a vast amount of information on the subject. With the objective of systematizing this information and of making it more widely available to researchers, producers, and agroindustrialists, CIAT

produced the bibliography "Cassava utilization in animal feed" in 1985 which contained 578 references. *Giants* Springer Nature With more restrictions upon animal experimentations, pharmaceutical industries are currently focusing on a new generation of experiments and technologies that are considerably more efficient and less controversial. The integration of computational and experimental strategies

has led to the identification and development of promising compounds. Computer Applications in Drug Discovery and Development is a pivotal reference source that provides innovative research on the application of computers for discovering and designing new drugs in modern molecular biology and medicinal chemistry. While highlighting topics such as chemical structure databases and dataset utilization, this publication delves into the

current panorama of drug discovery, where high drug failure rates are a major concern and properly designed virtual screening strategies can be a time-saving, cost-effective, and productive alternative. This book is ideally designed for chemical engineers, pharmacists, molecular biologists, students, researchers, and academicians seeking current research on the unexplored avenues and future perspectives of drug design.

**ECAI 2023** Springer

Nature

This book focuses on issues that are relevant for the Euro-Mediterranean Partnership. The depth and the extension of the current political crisis in the area have changed the perspectives of conventional Euro-Mediterranean integration policies. The book provides the grounds for new patterns of analysis and addresses policy guidelines which are able to respond to the dramatic challenges that Mediterranean regions are

facing. By implementing a multidisciplinary approach, the volume uncovers the structural determinants of migrations in the area: territorial and social imbalances, climate change, unemployment, weak institutions, poor governance, lack of efficient redistributive policies. Each chapter proposes innovative and rich analyses of the socio-economic conditions of all Mediterranean countries. The prevailing evidence suggests that while the North-South imbalances

still persist inside the basin, the recent world economic and financial crises have deepened social, intergenerational and gender inequalities. These inequalities cross all territories both nationally and internationally and affect the living conditions of large segments of population in Southern and Eastern Mediterranean countries. To bridge these gaps it is necessary to strengthen territorial cohesion, reduce income differentials, and improve

the access of marginal areas to basic infrastructure. These long term goals can be achieved through an inclusive development model for which young people and women can enjoy the same opportunities of education and work. Offering innovative and practical guidelines for future programs and policies, this book is essential reading for policy makers, researchers at policy think tanks as well as academics and post graduate students of

Mediterranean studies and Economic Policy. The general policy recipes, provided to govern migration flows, make useful reading for national and international research centres and major governmental agencies interested in migration issues.

**A Compendious German and English Dictionary**

Cambridge Scholars Publishing  
How do you use social media platforms, search engines, and other forms of digital media to explore the key issues of our

time? With this second edition, learn how to use the latest advancements in digital methods to answer your pressing research questions. The new edition includes: A new chapter on critical social media research, Tips for analysing content on TikTok, Instagram, Twitter and more, Exploration of Google critique and algorithmic auditing, Examination of YouTube's content removal politics and Facebook's 'fake news' problem. Whether you are new to digital research or

are exploring a new platform, this book equips you with tools to navigate the evolving digital landscape and conduct rigorous studies in the digital age.

This book constitutes the thoroughly refereed postproceedings of the 7th Workshop of the Cross-Language Evaluation Forum, CLEF 2006, held in Alicante, Spain, September 2006. The revised papers presented together with

an introduction were carefully reviewed and selected for inclusion in the book. The papers are organized in topical sections on Multilingual Textual Document Retrieval, Domain-Specific Information Retrieval, i-CLEF, QA@CLEF, ImageCLEF, CLSR, WebCLEF and GeoCLEF. .NET Internationalization  
IOS Press

As business becomes more and more global, software developers increasingly need to make applications multi-lingual and culturally aware. The

.NET Framework may well have the most comprehensive support for internationalization and globalization of any development platform to date, and .NET Internationalization teaches developers how to unlock and utilize that support. Experienced international application developer Guy Smith-Ferrier covers the internationalization of both Windows Forms and ASP.NET applications, using both Versions 1.1 and 2.0 of the .NET Framework. Smith-Ferrier

not only teaches you the best ways to take advantage of the globalization and internationalization features built in to the .NET Framework and Visual Studio, he also provides original code to take globalized applications to the next level of international utility and maintainability. Key topics include • An introduction to the internationalization process and how localization and globalization are supported in Windows and

the .NET Framework • The use of resource managers, cultures, resource DLLs, and localized strings, images, and files—including strongly typed resources • Detailed coverage of form localization in Windows Forms and Web Forms • Dealing with regional cultures and their casing, collation, and calendars • Managing right-to-left Middle-Eastern text and pictographic East Asian languages • How to use the book's original resource administration

utilities • How to translate resources with machine translation • How to create custom cultures and integrate them with the .NET Framework 2.0 and Visual Studio 2005 • How resource managers work and how to write custom resource managers, including a resource manager that uses a database • How to test your internationalization with FxCop using new and existing globalization rules • How to effectively include the translator in the internationalization

process Whether you are a developer, architect, or manager, if you are involved in international applications with the .NET Framework, this is the one book you need to read and understand before you start development. Guy Smith-Ferrier is an author, developer, trainer, and speaker with more than 20 years of software engineering experience. He has internationalized applications in four development platforms, including the .NET Framework. A frequent conference speaker, Guy

is the author of C# and .NET courseware and has written numerous articles. You can read his blog at [www.guysmithferrier.com](http://www.guysmithferrier.com). Corpus-Based Translation Studies Springer Nature This book provides a comprehensive introduction on opinion analysis for online reviews. It offers the newest research on opinion mining, including theories, algorithms and datasets. A new feature presentation method is highlighted for sentiment classification. Then, a three-phase framework

for sentiment classification is proposed, where a set of sentiment classifiers are selected automatically to make predictions. Such predictions are integrated via ensemble learning. Finally, to solve the problem of combination explosion encountered, a greedy algorithm is devised to select the base classifiers.

*E-Marketing in Developed and Developing Countries: Emerging Practices* A&C Black

Artificial intelligence, or AI, now affects the day-to-

day life of almost everyone on the planet, and continues to be a perennial hot topic in the news. This book presents the proceedings of ECAI 2023, the 26th European Conference on Artificial Intelligence, and of PAIS 2023, the 12th Conference on Prestigious Applications of Intelligent Systems, held from 30 September to 4 October 2023 and on 3 October 2023 respectively in Kraków, Poland. Since 1974, ECAI has been the premier venue for presenting AI research in

Europe, and this annual conference has become the place for researchers and practitioners of AI to discuss the latest trends and challenges in all subfields of AI, and to demonstrate innovative applications and uses of advanced AI technology. ECAI 2023 received 1896 submissions – a record number – of which 1691 were retained for review, ultimately resulting in an acceptance rate of 23%. The 390 papers included here, cover topics including machine learning, natural language

processing, multi agent systems, and vision and knowledge representation and reasoning. PAIS 2023 received 17 submissions, of which 10 were accepted after a rigorous review process. Those 10 papers cover topics ranging from fostering better working environments, behavior modeling and citizen science to large language models and neuro-symbolic applications, and are also included here. Presenting a comprehensive overview of current research and

developments in AI, the book will be of interest to all those working in the field.

*Opinion Analysis For Online Reviews*  
Pearson Education

Written by an expert with twenty years' experience in regulatory affairs in a number of multi-national companies, this book guides readers through

the legislative minefield of registering medicinal products in the European Union. Taking a step-by-step approach, the book demystifies all of the regulatory requirements and gives a clear understanding of how to achieve compliance. The author gathers all the relevant requirements, puts them into context, and provides regulatory information in an easily accessible format. Headings, subheadings, and key points organized in tabular format make the information easy for

readers to find and the book easy for readers to use.

*Information Access Evaluation -- Multilinguality, Multimodality, and Interaction* Springer

This book constitutes the refereed proceedings of the 11th International Conference of the CLEF Association, CLEF 2020, held in Thessaloniki, Greece, in September 2020.\* The conference has a clear focus on experimental information retrieval with special attention to the

challenges of multimodality, multilinguality, and interactive search ranging from unstructured to semi structures and structured data. The 5 full papers and 2 short papers presented in this volume were carefully reviewed and selected from 9 submissions. This year, the contributions addressed the following challenges: a large-scale evaluation of translation effects in academic search, advancement of assessor-driven aggregation methods for

efficient relevance assessments, and development of a new test dataset. In addition to this, the volume presents 7 “best of the labs” papers which were reviewed as full paper submissions with the same review criteria. The 12 lab overview papers were accepted out of 15 submissions and represent scientific challenges based on new data sets and real world problems in multimodal and multilingual information access. \* The conference was held

virtually due to the COVID-19 pandemic.

**Fachsprachen /

Offers a concise and thorough presentation of engineering mechanics theory and application. The material is reinforced with numerous examples to illustrate principles and imaginative, well-illustrated problems of varying degrees of difficulty. The book is committed to developing users' problem-solving skills.

*Information Sources in Patents* Springer Science & Business Media  
Drawing on work from both eminent and emerging scholars in translation and interpreting studies, this collection offers a critical reflection on current methodological practices in these fields toward strengthening the theoretical and empirical ties between them. Methodological and technological advances have pushed these respective areas of study forward in the last few

decades, but advanced tools, such as eye tracking and keystroke logging, and insights from their use have often remained in isolation and not shared across disciplines. This volume explores empirical and theoretical challenges across these areas and the subsequent methodologies implemented to address them and how they might be mutually applied across translation and interpreting studies but also brought together toward a coherent

empirical theory of translation and interpreting studies. Organized around three key themes—target-text orientedness, source-text orientedness, and translator/interpreter-orientedness—the book takes stock of both studies of translation and interpreting corpora and processes in an effort to answer such key questions, including: how do written translation and interpreting relate to each other? How do technological advances in these fields shape process

and product? What would an empirical theory of translation and interpreting studies look like? Taken together, the collection showcases the possibilities of further dialogue around methodological practices in translation and interpreting studies and will be of interest to students and scholars in these fields.

*Multilingual Dictionary of Electronic Publishing*  
Netbiblo

The third part of the Digital Plant Atlas presents illustrations of

subfossil remains of plants with economic value. These plant remains mainly derive from excavations in the Old World (Europe, Western Asia and North Africa) that the Deutsches Archäologisches Institut (DAI, Berlin) and the Groningen Institute of Archaeology (GIA) have conducted or participated in. Plant material is usually very perishable, but can nevertheless be preserved in archaeological sites if the biological decay of the material is blocked. Many

plant remains are discovered during excavations in carbonized form, where despite having been in contact with fire, they have not been completely reduced to ash. Extremely dry climatic conditions, like those in Egypt, can also preserve plant material in a completely desiccated condition. Most of the economically valuable plants illustrated here have been carbonized or desiccated. So this atlas links up very well with the Digital Atlas of Economic Plants. Like the other

atlases, this atlas is a combination of a book and a website. The Book: Just as in part two of the series, this part will not only include illustrations of seeds and fruits, but also of other plant parts. The resulting variety in seed and fruit forms will be illustrated by examples from different excavations. To support their identification and determination, also pictures of recent plants and relevant plant parts have been included. The Website: To supplement the photographs, the

website will also include morphometric measurements of the subfossil seeds and fruits. These measurements can be compared with own measurements of the plant taxa in question. Summary: Plant families: 56 Plant species (Taxa): 191 Photographs: 773 photographs of subfossil plant parts, 1137 photographs of recent plants and plant parts Languages: English and 15 indices (scientific plant name, pharmaceutical plant name, English, German, French, Dutch,

Spanish, Arab, Arab in transliteration, Turkish, Chinese, Pinyin (Chinese in transliteration), Hindi, Sanskrit, and Malayalam)

Purchase of the book grants access to the protected parts of the websites of the project.

This comprehensive guide is an ideal reference work for film specialists and enthusiasts. First published in 1984 but continuously updated ever since, CineGraph is

the most authoritative and comprehensive encyclopedia on German-speaking cinema in the German language. This condensed and substantially revised English-language edition makes this important resource available to students and researchers for the first time outside its German context. It offers a representative historical overview through bio-filmographical entries on the main protagonists, from the beginnings to the present day. Included are

directors and actors, writers and cameramen, composers and production designers, film theorists and critics, producers and distributors, inventors and manufacturers. An appendix includes short introductory essays on specific periods and movements, such as Early Film, Weimar, Nazi Cinema, DEFA, New German Cinema, and German film since unification, as well as on cinematic developments in Austria and Switzerland. Sections that crossreference names

around specific professional groups and themes will prove equally invaluable to researchers.

### **Building and Using Comparable Corpora for Multilingual Natural Language Processing**

Walter de Gruyter

This book presents the thoroughly refereed post-proceedings of a workshop by the Cross-Language Evaluation Forum Campaign, CLEF 2002, held in Rome, Italy in September 2002. The 43 revised full papers presented together with an introduction and run

data in an appendix were carefully reviewed and revised upon presentation at the workshop. The papers are organized in topical sections on systems evaluation experiments, cross language and more, monolingual experiments, mainly domain-specific information retrieval, interactive issues, cross-language spoken document retrieval, and cross-language evaluation issues and initiatives.

*Evaluation of Multilingual and Multi-modal Information Retrieval*

Managing Plurilingual and Intercultural Practices in the Workplace

This two-volume set of LNAI 11838 and LNAI 11839 constitutes the refereed proceedings of the 8th CCF Conference on Natural Language Processing and Chinese Computing, NLPCC 2019, held in Dunhuang, China, in October 2019. The 85 full papers and 56 short papers presented were carefully reviewed and selected from 492 submissions. They are organized in the following topical sections:

Conversational Bot/QA/IR;  
 Knowledge graph/IE;  
 Machine Learning for NLP;  
 Machine Translation; NLP  
 Applications; NLP for  
 Social Network; NLP  
 Fundamentals; Text  
 Mining; Short Papers;

 Books

With iText, one can  
 transform PDF documents  
 into live, interactive  
 applications quickly and  
 easily. This free and open

source library for Java and  
 .NET is the leading tool of  
 its kind, and was primarily  
 developed and  
 maintained by Bruno  
 Lowagie, the author of  
 this book. iText in Action,  
 Second Edition offers an  
 introduction and a  
 practical guide to iText  
 and the internals of PDF.  
 While at the entry level  
 iText is easy to learn,  
 there's an astonishing  
 range of things you can  
 do once you dive below  
 the surface. This book  
 lowers the learning curve  
 and, through numerous  
 innovative and practical

examples, unlocks the  
 secrets hidden in Adobe's  
 PDF Reference. This  
 totally revised new edition  
 introduces the new  
 functionality added to  
 iText in recent releases,  
 and it updates all  
 examples from JDK 1.4 to  
 Java 5. The examples are  
 in Java but they can be  
 easily adapted to .NET.  
 Purchase of the print book  
 comes with an offer of a  
 free PDF, ePub, and Kindle  
 eBook from Manning. Also  
 available is all code from  
 the book.

[Cassava Utilization in  
 Animal Feed](#) Netbiblo

This book provides a comprehensive overview of methods to build comparable corpora and of their applications, including machine translation, cross-lingual transfer, and various kinds of multilingual natural language processing. The authors begin with a brief history on the topic followed by a

comparison to parallel resources and an explanation of why comparable corpora have become more widely used. In particular, they provide the basis for the multilingual capabilities of pre-trained models, such as BERT or GPT. The book then focuses on building comparable corpora,

aligning their sentences to create a database of suitable translations, and using these sentence translations to produce dictionaries and term banks. Then, it is explained how comparable corpora can be used to build machine translation engines and to develop a wide variety of multilingual applications.
