Research Methodology for Social Sciences provides guidelines for designing and conducting evidence-based research in social sciences and interdisciplinary studies using both qualitative and quantitative data. Blending the particularity of different sub-disciplines and interdisciplinary nature of social sciences, this volume: Provides insights on epistemological issues and deliberates on debates over qualitative research methods; Covers different aspects of qualitative research techniques and evidence-based research techniques, including survey design, choice of sample, construction of indices, statistical inferences and data analysis; Discusses concepts, techniques and tools at different stages of research, beginning with the design of field surveys to collect raw data and then analyse it using statistical and econometric methods. With illustrations, examples and a reader-friendly approach, this volume will serve as a key reference material for compulsory research methodology courses at doctoral levels across different disciplines, such as economics, sociology, women's studies, education, anthropology, political science, international relations, philosophy, history and business management. This volume will also be indispensable for postgraduate courses dealing with quantitative techniques and data analysis.

Perjumpaan Islam Ideologis & Islam Kultural Kegan Paul International

Buku ini tidak menuntun pembaca tentang prosedur dan langkah-langkah untuk mengaplikasikan program SEM-Amos, —vi— disebabkan buku tentang itu telah banyak seperti karangan Imam Ghazali, Henky Latan, Kusnendi, Singgih Santosa, Dedi Rianto Rahadi yang banyak tersedia di Toko Buku. Buku ini mencoba mengimplementasikan antara bab tentang "Metode Penelitian" yang dihubungkan dengan bab tentang "Analisis dan Pembahasan". Membahas teori dan metode penelitian melalui pembahasan output SEM-Amos, maupun persoalan yang berhubungan dengan kendala yang dihadapi peneliti dalam

menganalisis data melalui program SEM-Amos. Model Penelitian Kuantitatif Berbasis SEM-AMOS Mengenal SEM-AMOS ini diterbitkan oleh Penerbit Deepublish dan tersedia juga dalam versi cetak.

The invited authors of this edited volume have been prolific in the arena of Real Data Analysis (RDA) as it applies to the social and behavioral sciences, especially in the disciplines of education and psychology. Combined, this brain trust represents 3,247 articles in refereed journals, 127 books published, US \$45.3 Million in extramural research funding, 34 teaching and 92 research awards, serve(d) as Editor/Assistant Editor/Editorial Board Member for 95 peer reviewed journals, and provide( d) ad hoc reviews for 362 journals. Their enormous footprint on real data analysis is showcased for professors, researchers, educators, administrators, and graduate students in the second text in the AERA/SIG ES Quantitative Methods series.

Historical Fiction in New Kingdom Egypt Springer Science & Business Media

This book explores why Ethiopian kings pursued long-distance diplomatic contacts with Latin Europe in the late Middle Ages. It traces the history of more than a dozen embassies dispatched to the Latin West by the kings of Solomonic Ethiopia, a powerful Christian kingdom in the medieval Horn of Africa. Drawing on sources from Europe, Ethiopia, and Egypt, it examines the Ethiopian kings' motivations for sending out their missions in the fifteenth and early sixteenth centuries – and argues that a desire to acquire religious treasures and foreign artisans drove this early intercontinental diplomacy. Moreover, the Ethiopian initiation of contacts with the distant Christian sphere of Latin Europe appears to have been intimately connected to a local political agenda of building monumental ecclesiastical architecture in the North-East African highlands, and asserted the Ethiopian rulers' claim of universal kingship and rightful descent from the biblical king

Solomon. Shedding new light on the self-identity of a late medieval African dynasty at the height of its power, this book challenges conventional narratives of African-European encounters on the eve of the so-called 'Age of Exploration'.

**A Cinematic Kushite Drama** Deepublish

This book includes selected papers presented at the international expert forum on "Mainstreaming Resilience and Disaster Risk Reduction in Education," held at the Asian Institute of Technology, Thailand on 1-2 December 2017. The journey towards disaster risk reduction and resilience requires the participation of a wide array of stakeholders ranging from academics to policymakers, to disaster managers. Given the multifaceted and interdependent nature of disasters, disaster risk reduction and resilience require a multidisciplinary problem-solving approach and evidence-based techniques from the natural, social, engineering, and other relevant sciences. Traditionally, hazard and disaster-related studies have been dominated by the engineering and social science fields. In this regard, the main purpose of this book is to capture the multidisciplinary and multisectoral nature of disaster risk reduction, and to gather existing data, research, conceptual work, and practical cases regarding risk reduction and its ties to sustainable development under a single "umbrella." Along with the sustainability aspect, the book also links disaster risk reduction with development, technology, governance, education, and climate change, and includes discussions on challenges, solutions, and best practices in the mainstreaming of disaster risk reduction.

There are fewer grounds today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of the UNESCO Science Report: towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda, in order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries, but innovation of some kind is now occurring across the full spectrum of income

levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10–20 years. Among higher-income countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards ‘green’ technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the UNESCO Science Report: towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come.

*Writing Your Journal Article in Twelve Weeks* BRILL

From the first major discoveries a century ago, the painted portraits of Roman Egypt were a revelation to scholars and the public alike, and the recent finding of a new cache of these gilded images, which made national headlines, have only heightened their mystery and appeal. Published to coincide with a new major exhibition of these portraits, *Ancient Faces* is the most comprehensive, up-to-date survey of these astonishing works of art. Dating from the later period of Roman rule in Egypt, shortly before the birth of Christ, the painted mummy portraits are among the most remarkable products of the ancient world, a fusion of the traditions of pharonic Egypt and the Classical world. They are historical and cultural objects of outstanding importance and beauty, superb works of art that represent some of the earliest known examples of life-like portraiture. Though the subjects of the portraits believed in the traditional Egyptian cults, which offered them a firm prospect of life after death, they also wished to be commemorated in the Roman manner, with their fashion of dress and adornment signaling their status in life. Despite their ancient history, these portraits speak to the modern eye with a beauty and intensity that would be lost to portraiture

until the Renaissance.

*International Literary Market Place, 1995* Taylor & Francis

This work of Kamal begins with archaeologists who were faced by a whole kingdom of Kush revealing itself before them in a fantasy that transcends history itself where time and ages overlap and intertwine and where personalities that lived centuries ago meet and enter into a dialogue where the author expresses and show a number of human values taking advantage from his abundant wealth of historical and archaeological knowledge.

**Topics in Geometry** African BiographiesAida and the Rattles Players in the Presence of King BeyeA Cinematic Kushite Drama Featuring the theme, From Sources to Solution, this book is based on the research papers presented during the International Conference on Environmental Forensics 2013. It covers multi-disciplinary areas of environmental forensics featuring major themes: characterization, assessment, and monitoring; new approach, rapid assessment, and analytical techniques; pollution control technology; environmental health risk assessment; and policy, governance and management. It present information for researchers from the science and social sciences disciplines and contribute to the advancement of Environmental Forensics. It also aims at evaluating the environmental damages as the result of indiscriminating discharge of toxic environmental pollutants.

**Aida and the Rattles Players in the Presence of King Beye** Springer Nature

Islam ideologis dan Islam kultural merupakan “rumah besar” Islam Indonesia era modern. Di dalam dua rumah itu, ternyata kita menemukan varian “label” yang cukup heterogen: tradisional, modernis, neo-modernis, post-tradisional, liberal, revivalis-puritan, Islamis, modernis-reformis, dan lain-lain. Namun, di dalam buku ini, kita akan melihat bahwa tipologi tersebut sebenarnya cukup longgar sehingga mudah mencair dan meleleh: satu paham atau satu kelompok dapat tercampur bersama-sama dengan paham atau kelompok lain sehingga memunculkan bentuk-bentuk pemahaman dan tipologi keislaman yang baru. Hal ini dikarenakan mereka berjumpa dalam ruang “sejarah”, yang perjumpaan tak jarang melahirkan pemikiran-pemikiran baru yang mencerahkan, di samping juga konflik horizontal yang memilukan. Buku ini berisi delapan hasil penelitian yang telah dimuat di jurnal baik dalam maupun luar negeri. Prof. Dr. Media Zainul Bahri, M.A. meneliti secara

mendalam perbandingan pemikiran Gus Dur dengan Abraham J. Heschel, peran Jaringan Islam Liberal (JIL) dalam diskursus pemikiran Islam, wacana relasi agama dan sains dalam lanskap pemikiran Muslim Indonesia, fenomena ustadz selebritis dan dakwahtainment, upaya Edwin Wieringa dalam menguak eksotisme Muslim Nusantara, ketegangan pemikiran antara Edward Said dan Ibnu Warraq, serta meneropong misteri dan mitor Protokol Tetua Zion melalui novel Prague Cemetery karya Umberto Eco. Tema-tema tersebut diurai dan diberi signifikansi dengan gambaran mutakhir pandangan dan pemikiran Islam Indonesia dalam “rumah besar” Islam ideologis dan Islam kultural. Selamat membaca!

**Ancient Faces** Springer Science & Business Media

This book examines post-secession and post-transition state building in Somaliland, Somalia, South Sudan and Sudan. It explores two intimately linked, yet analytically distinct themes: state building and national identity reconstruction following secession and collapse. In Somaliland and South Sudan, rearranging the state requires a complete metamorphosis of state institutions so that they respond to the needs and interests of the people. In Sudan and Somalia, the reconfiguration of the remains of the state must address a new reality and demands on the ground. All four cases examined, although highly variable, involve conflict. Conflict defines the scope, depth and momentum of the state building and state reconstruction process. It also determines the contours and parameters of the projects to reconstitute national identity and rebuild a nation. Addressing the contested identity formation and its direct relation to state building would therefore go a long way in mitigating conflicts and state crisis.

**Climate Change and Northern Fish Populations** Czech Institute of Egyptology Charles University

This collection of articles serves to commemorate the legacy of Joseph D'Atri, who passed away on April 29, 1993, a few days after his 55th birthday. Joe D' Atri is credited with several fundamental discoveries in geometry. In the beginning of his mathematical career, Joe was interested in the generalization of symmetrical spaces in the E. Cartan sense. Symmetric spaces, differentiated from other homogeneous manifolds by their geometrical richness, allows the development of a deep analysis. Geometers have been constantly interested and challenged by the problem of extending the class of symmetric spaces so as to

preserve their geometrical and analytical abundance. The name of D'Atri is tied to one of the most successful generalizations: Riemann manifolds in which (local) geodesic symmetries are volume-preserving (up to sign). In time, it turned out that the majority of interesting generalizations of symmetrical spaces are D'Atri spaces: natural reductive homogeneous spaces, Riemann manifolds whose geodesics are orbits of one-parameter subgroups, etc. The central place in D'Atri's research is occupied by homogeneous bounded domains in  $\mathbb{R}^n$ , which are not symmetric. Such domains were discovered by Piatetskii-Shapiro in 1959, and given Joe's strong interest in the generalization of symmetric spaces, it was very natural for him to direct his research along this path.

These documents summarize some of the recent studies of the relationships among climate, the aquatic environment, and the dynamics of fish populations. The studies are mostly from the North Pacific ocean, but there are reports of investigations from the North Atlantic Ocean and from fresh water. Various papers include numerous examples of the relationships between fish abundance trends and the environment.

*Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971* SAGE

In colonial Egypt, the state introduced legal reforms that claimed to liberate Egyptians from the inhumanity of pre-colonial rule and elevate them to the status of human beings. These legal reforms intersected with a new historical consciousness that distinguished freedom from force and the human from the pre-human, endowing modern law with the power to accomplish but never

truly secure this transition. Samera Esmeir offers a historical and theoretical account of the colonizing operations of modern law in Egypt. Investigating the law, both on the books and in practice, she underscores the centrality of the "human" to Egyptian legal and colonial history and argues that the production of "juridical humanity" was a constitutive force of colonial rule and subjugation. This original contribution queries long-held assumptions about the entanglement of law, humanity, violence, and nature, and thereby develops a new reading of the history of colonialism.

*Issues in Peace and Conflict Studies* Deepublish

'A comprehensive, well-written and beautifully organized book on publishing articles in the humanities and social sciences that will help its readers write forward with a first-rate guide as good company.' - Joan Bolker, author of *Writing Your Dissertation in Fifteen Minutes a Day* 'Humorous, direct, authentic ... a seamless weave of experience, anecdote, and research.' - Kathleen McHugh, professor and director of the UCLA Center for the Study of Women Wendy Laura Belcher's *Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success* is a revolutionary approach to enabling academic authors to overcome their anxieties and produce the publications that are essential to succeeding in their fields. Each week, readers learn a particular feature of strong articles and work on revising theirs accordingly. At the end of twelve weeks, they send their article to a journal. This invaluable resource is the only guide that focuses specifically on publishing humanities and social science journal articles.
