 Improved Operation, Maintenance, and Financing of the Nation's Water Transportation System, Including Coastal and Great Lakes Ports, the St. Lawrence Seaway, and the Inland and Intracoastal Waterways  
 Ohio River Navigation Project Operation and Maintenance  
 Kaskaskia Navigation Project, Illinois (operation and Maintenance): Draft Environmental Statement  
 Energy and Water Development Appropriations for Fiscal Year 1999  
 Project Management for Construction  
 In compliance with the National Environmental Policy Act, this Draft Environmental Impact Statement evaluates the environmental effects of the construction, operation, and maintenance of a gold mine known as the Gold Rock Mine Project in White Pine County, Nevada, on lands managed by the Ely District Office of the Bureau of Land Management.

### Environmental Assessment & Draft Finding of No Significant Impact

Chris Hendrickson  
 The Proposed Action is to construct, operate, and maintain a new U.S. Border Patrol (USBP) station in Detroit, Michigan.

### Draft Environmental Impact Statement

Two years ago, BPA released its first-ever Operations, Maintenance, and Replacement (OM R) 10-Year Plan. That effort broke new ground and was an extensive look at the condition of Operations, Maintenance, and Replacement on BPA's power system. This document -- the 1992 OM R 10-Year Plan -- uses that original plan as its foundation. It takes a look at how well BPA has accomplished the challenging task set out in the 1990 Plan. The 1992 Plan also introduces the Construction Program. Construction's critical role in these programs is explored, and the pressures of construction workload -- such as the seasonal nature of the work and the broad swings in workload between projects and years -- are discussed. The document then looks at how situations may have changed with issues explored initially in the 1990 Plan. Importantly, this Plan also surfaces and explains some new issues that threaten to impact BPA's ability to accomplish its OM R workload. Finally, the document focuses on the revised strategies for Operations, Maintenance, Replacement, Construction, and Environment for the 1992 to 2001 time period, including the financial and human resources needed to accomplish those strategies.
