 Reactor Design Lectures Notes
 Type of Reactor
 •Continuous-Stirred Tank Reactor
 CSTR
 •Run at steady state ,the flow rate in must equal the mass flow rate out, otherwise the tank will overflow or go empty (transient state).
 •The feed assumes a uniform composition throughout the reactor, exit stream has the same composition as in the tank.
 Reactor Design Lectures Notes - University of Technology, Iraq
 Lecture (9) Reactor Sizing. Chemical kinetics is the study of chemical reaction rates and reaction mechanisms. The study of chemical reaction engineering (CRE) combines the study of chemical kinetics with the reactors in which the reactions occur. Chemical kinetics and reactor design are at the heart of producing almost all industrial chemicals.
 Lecture (9) Reactor Sizing
 Reactor Design Andrew Rosen May 11, 2014
 Contents ... For batch reactors, conversion is a function of time whereas for flow reactors at steady state it is a function of volume
 2.2.2 CSTR Design Equation Using the expression for the volume of a given CSTR derived earlier, we can eliminate F
