mysteries of the twentieth century, and one with huge political resonance, is the death of Dag Hammarskjold and his UN team in a plane crash in central Africa in 1961. Just minutes after midnight, his aircraft plunged into thick forest in the British colony of Northern Rhodesia (Zambia), abruptly ending his mission to bring peace to the Congo. Across the world, many suspected sabotage, accusing the multi-nationals and the governments of Britain, Belgium, the USA and

South Africa of involvement in the disaster. These suspicions have never gone away. British High Commissioner Lord Alport was waiting at the airport when the aircraft crashed nearby. He bizarrely insisted to the airport management that Hammarskjold had flown elsewhere - even though his aircraft was reported overhead. This postponed a search for so long that the wreckage of the plane was not found for fifteen hours. White mercenaries were at the airport that night too,

including the South African pilot Jerry Puren, whose bombing of Congolese villages led, in his own words, to 'flaming huts ...destruction and death'. These soldiers of fortune were backed by Sir Roy Welensky, Prime Minister of the Rhodesian Federation, who was ready to stop at nothing to maintain white rule and thought the United Nations was synonymous with the Nazis. The Rhodesian government conducted an official inquiry, which blamed pilot error. But as this

book will show, it was a massive cover-up that suppressed and dismissed a mass of crucial evidence, especially that of African eye-witnesses. A subsequent UN inquiry was unable to rule out foul play - but had no access to the evidence to show how and why. Now, for the first time, this story can be told. Who Killed Hammarskjöld follows the author on her intriguing and often frightening journey of research to Zambia, South Africa, the USA, Sweden, Norway, Britain, France

and Belgium, where she unearthed a mass of new and hitherto secret documentary and photographic evidence. At the heart of this book is Hammarskjöld himself - a courageous and complex idealist, who sought to shield the newly-independent nations of the world from the predatory instincts of the Great Powers. It reveals that the conflict in the Congo was driven not so much by internal divisions, as by the Cold War and by the West's determination to keep

real power from the hands of the post-colonial governments of Africa. It shows, too, that the British settlers of Rhodesia would maintain white minority rule at all costs.

Un Buen General Simon and Schuster As the 1990s place

greater demands on the UN, this inspiring biography shows how Hammarskjold perfected the active but quiet diplomacy that proved successful in a series of seemingly hopeless situations, from the Suez Crisis to Indochina, and how he stood up for principle against the greatest powers. Photos. The New Science of Cause and Effect Dag Heward-Mills A Turing Award-winning computer scientist and statistician shows how understanding causality

has revolutionized science and will revolutionize artificial intelligence "Correlation is not causation." This mantra, chanted by scientists for more than a century, has led to a virtual prohibition on causal talk. Today, that taboo is dead. The causal revolution, instigated by Judea Pearl and his colleagues, has cut through a century of confusion and established causality -- the study of cause and effect -- on a firm scientific basis. His work explains how we can know easy things, like

whether it was rain or a sprinkler that made a sidewalk wet; and how to answer hard questions, like whether a drug cured an illness. Pearl's work enables us to know not just whether one thing causes another: it lets us explore the world that is and the worlds that could have been. It shows us the essence of human thought and key to artificial intelligence. Anyone who wants to understand either needs *The Book of Why*, *The Death of Dag Hammarskjöld* and the

In their successful, internationally published book *A Boat in Our Baggage*, Maria Coffey and Dag Goering described their year-long, worldwide expedition by kayak. Since then, they have continued to travel many parts of the globe, including some of the last truly wild places of the British Columbia coast. Their latest adventure - a 1,000-plus kilometre journey circumnavigating Vancouver Island in its entirety - is detailed and

illustrated in *Visions of the Wild*. Coffey and Goering set off from their home on Protection Island, BC, in July 1999. For three months they confronted some of the most exposed, storm-battered coastlines British Columbia has to offer: infamous places such as Cape Scott, Estevan Point and the imposing Brooks Peninsula, all of which have become the sites of shipwrecks and fatalities. The voyagers experienced deadly currents, whirlpools and enormous waves, were buffeted

relentlessly by wind and rain and spent many a wet, miserable camping trip ashore. But they also explored the serene waters of Nootka Sound, the Gulf Islands and the Broken Group Islands, where they saw stands of ancient rainforests interspersed with raw clearcuts, and spectacular vistas of ocean and sky juxtaposed with intricate coves, rocks and reefs. They had encounters with whales, bears, wolves, sea lions and puffins; and as they stopped at different Native villages,

fishing ports and old homesteads, they made friends with many of the diverse people who call the island home. Brimming with breathtaking colour photographs and compelling journal entries from all stages of their exciting kayaking journey, *Visions of the Wild* is at once an inspiring chronicle of the adventure of a lifetime, and a beautiful book of photographs that rejoices in the untamed spirit of Canada's west coast. *Model Marriage* Dag

 Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual

contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned

with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."
