### **Systems Tools for Project Planning**

CABI

Biodiversity loss is one of the major resource problems facing the world, and the policy options available are restricted by inappropriate economic tools which fail to capture the value of species and their variety. This study describes in non-technical terms how cost-benefit analysis

techniques can be applied to species and species loss, and how they provide a measure of the efficiency of conservation measures. Only when conservation can be shown to pass such a basic economic test, the authors claim, will it be incorporated into policies.;David Pearce has also written *Blueprint for a Green Economy*.

*The Economic Value of Biodiversity Systems*  
 Tools for Project Planning  
 Genetics of the Dog  
 Systematics and phylogeny of the sheep;  
 Genetic aspects of domestication, common breeds and their origin;  
 Genetics of colour and hair texture;  
 Genetics of morphological traits and inherited disorders;  
 Biochemical genetics; Molecular genetics of sheep;  
 Molecular genetics of immune molecules;  
 Genetics of disease resistance and vaccine response;  
 Molecular biology and genetics of scrapie in sheep;  
 Cytogenetics: physical chromosome maps;  
 The sheep linkage map;  
 Genetics of behaviour;  
 Biology and genetics of reproduction;  
 Modern

reproduction technologies and transgenics;  
 Developmental genetics;  
 Genetic resources and conservation;  
 Genetic improvement of wool production;  
 Genetics of meat quality;  
 Genetics of milk production;  
 Genetic improvement of sheep;  
 Standardized genetic nomenclature for sheep.

*Genetics of the Dog*  
 Cabi

Recognizing the significant advances made in the field of animal genetics in the ten years since the first edition of "The Genetics of the Dog", this new edition of the successful 2001 book provides a comprehensive update on the subject, along with new material on topics of current and growing interest.

Existing chapters on essential topics such as immunogenetics, genetics of diseases, developmental genetics and the genetics of behaviour have been fully updated, while new authors report on the latest advances in areas such as genetic diversity of dog breeds, canine genomics, olfactor.
