What is a rubric? A rubric is a coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right? Unfortunately, rubrics are commonly misunderstood and

misused. The good news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential components of effective rubrics: (1) criteria that relate to the learning (not the “tasks”) that students are being asked to demonstrate and (2) clear descriptions of performance across a continuum of quality. She outlines the difference between various kinds of rubrics (for example, general versus task-specific, and analytic versus holistic), explains when using each type of rubric is appropriate, and highlights

examples from all grade levels and assorted content areas. In addition, Brookhart addresses* Common misconceptions about rubrics;* Important differences between rubrics and other assessment tools such as checklists and rating scales, and when such alternatives can be useful; and* How to use rubrics for formative assessment and grading, including standards-based grading and report card grades. Intended for educators who are already familiar with rubrics as well as those who are not, this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other

sources. And it makes the case that rubrics, when used appropriately, can improve outcomes by helping teachers teach and helping students learn.

By now it's clear that whether you're promoting a business, a product, or yourself, social media is near the top of what determines your success or failure. And there are countless pundits, authors, and consultants eager to advise you. But there's no one quite like Guy Kawasaki, the legendary former chief evangelist for Apple and one of the pioneers of business blogging, tweeting, Facebooking, Tumblring, and much, much more. Now Guy

has teamed up with Peg Fitzpatrick, who he says is the best social-media person he's ever met, to offer *The Art of Social Media*—the one essential guide you need to get the most bang for your time, effort, and money.

With over one hundred practical tips, tricks, and insights, Guy and Peg present a bottom-up strategy to produce a focused, thorough, and compelling presence on the most popular social-media platforms. They guide you through steps to build your foundation, amass your digital assets, optimize your profile, attract more followers, and effectively integrate social media and blogging. For beginners overwhelmed by too many choices as well as seasoned

professionals eager to improve their game, *The Art of Social Media* is full of tactics that have been proven to work in the real world. Or as Guy puts it, “great stuff, no fluff.”

This new Encyclopedia

draws upon articles in The International Encyclopedia of Education, 2nd Edition (described by Choice as being "a premier resource when judged on virtually every criteria applied to a reference work") with revisions as well as new articles. The purpose of the volume is to provide classroom researchers, teacher educators, and teachers with a sound, reasonable body of knowledge that can be used to guide their efforts to understand and improve the teaching-learning process. While individual research studies may yield different results and recommendations the compilation of such studies by experts in the field provide useful guidelines within which

researchers, teacher educators and teachers can operate. The entries in this encyclopedia will provide a body of knowledge to inform, guide and/or justify their teaching practices. The second edition is divided into two parts: teaching and teacher education. Part one contains eight sections: the nature and characteristics of teachers, theories and models of teaching, instructional programs and strategies, teaching skills and techniques, school and classroom factors, students and the teaching-learning process, teaching for specific objectives, and the study of teaching. Part two contains three sections: concepts and issues in teacher education, generic

initial teacher education, and continuing teacher education.

This second volume of papers from the ATC21STM project deals with the development of an assessment and teaching system of

21st century skills.

Readers are guided through a detailed description of the methods used in this process. The first volume was published by Springer in 2012 (Griffin, P., McGaw, B. & Care, E., Eds., *Assessment and Teaching of 21st Century Skills*, Dordrecht: Springer).

The major elements of this new volume are the identification and description of two 21st century skills that are amenable to teaching and learning: collaborative problem solving, and learning in digital networks.

Features of the skills that need to be mirrored in their assessment are identified so that they can be reflected in assessment tasks. The tasks are formulated so

that reporting of student performance can guide implementation in the classroom for use in teaching and learning. How simple tasks can act as platforms for development of 21st century skills is demonstrated, with the concurrent technical infrastructure required for its support. How countries with different languages and cultures participated and contributed to the development process is described. The psychometric qualities of the online tasks developed are reported, in the context of the robustness of the automated scoring processes. Finally, technical and educational issues to be resolved in global projects of this nature

are outlined.

This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that the increases in enrollment will continue into the next decades. More resources and more varied materials are

seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters authored by leaders in the field are organized around nine themes:

- *Background of Arabic Language Teaching;

- *Contexts of Arabic Language Teaching;
- *Communicative Competence in Arabic;
- *The Learners;
- *Assessment;
- *Technology Applications;
- *Curriculum Development, Design, and Models;
- *Arabic Language Program Administration and Management; and
- *Planning for the Future of Arabic Language Learning and Teaching.

The Handbook for Arabic Language Teaching Professionals in the 21st Century will benefit and be welcomed by Arabic language teacher educators and trainers, administrators, graduate students, and scholars around the world. It is intended to create dialogue among scholars and

professionals in the field and in related fields--dialogue that will contribute to creating new models for curriculum and course design, materials and assessment tools, and ultimately, better instructional effectiveness for all Arabic learners everywhere, in both Arabic-speaking and non-Arabic speaking countries.

CoRT 1 broadens perception by demonstrating directions thinking can follow. The simplest level of thinking is to identify the situation and react to it. The next stage is to expand the way we look at a situation - to broaden perception. By introducing thinking tools students look for plus and minus points, consider all factors (consequences, aims and objectives), assess priorities, and consider other people's views. By making a deliberate effort to direct their thinking toward these areas, students develop the habit of broadening their thinking.

This work is a sampling of the Hippocratic Corpus, a collection of ancient Greek medical

works. At the beginning, and interspersed throughout, there are discussions on the philosophy of being a physician. There is a large section about how to treat limb fractures, and the section called The Nature of Man describes the physiological theories of the time. The book ends with a discussion of embryology and a brief anatomical description of the heart.
