Artificial Intelligence in Healthcare Cambridge University Press

This book highlights the analytics and optimization issues in healthcare systems, proposes new approaches, and presents applications of innovative approaches in real facilities. In the past few decades, there has been an exponential rise in the application of swarm intelligence techniques for solving complex and intricate problems arising in healthcare. The versatility of these techniques has made them a favorite among scientists and researchers working in diverse areas. The primary objective of this book is to bring forward thorough, in-depth, and well-focused developments of hybrid variants of swarm intelligence algorithms and their applications in healthcare systems.

His Life and Work Penguin UK

The ecosystem-literacy training employed in FFS is vital for enabling smallholder farmers to master the management skills required for sustainable crop production intensification and diversification. This is radically different from the approach used by more traditional extension systems which are designed for "technology-transfer" purposes. Agro Ecosystem Analysis (AESA) is the cornerstone of the field school approach and is based on the ecosystem concept, in which each element at the crop/farm/field has its own, unique role. It involves crops or commodity observations, data collection, analysis, interpretations or discussions, and recommendations. Farmers use AESA method to understand the situation of crop ecosystem in the FFS approach. However, the method still included a reasonable level of complexity where the farmer has to deal with numeric and textual data. This remained a challenge for the facilitator to communicate with the farming community, who cannot easily write and read the observations and perform analysis on a paper sheet and also in the presentation of the same AESA sheet. The New AESA Board is devised to mitigate the challenge of illiteracy and some other challenges in participatory group learning including the difference of age, education level, gender equality,

wealth position, social activism in the field school. The pre-designed AESA board provides equal opportunity to all participants including literate, illiterate or poor literacy services. This AESA board along with analytical color language named Jam's 4 Colors by FAO Pakistan remains among the top innovations of 2020.

Learn about the geography, culture, language, and much more in this in-depth overview of Pakistan. All books of the critically-acclaimed Cultures of the World® series ensure an immersive experience by offering vibrant photographs with descriptive nonfiction narratives, and interactive activities such as creating an authentic traditional dish from an easy-to-follow recipe. Copious maps and detailed timelines present the past and present of the country, while exploration of the art and architecture help your readers to understand why diversity is the spice of Life.

The Emergence of Pakistan Bloomsbury Publishing

"The book is based on the author's personal observations and analysis during thirty-nine years of diplomatic service as Pakistan's Ambassador and Special Envoy to various countries around the world."--Back cover.

Pakistan Affairs Hurst & Company Limited

Ladybirds are probably the best known predators of aphids and coccids in the world, though this greatly underestimates the diversity of their biology. Maximising their impact on their prey is an important element in modern conservation biological control of indigenous natural enemies in contrast to the classical approach of releasing alien species. Ivo Hodek is one of the most internationally respected experts on coccinellids who has researched these insects for his entire career. He has now brought together 14 scientists of international standing to author 12 chapters, making this book the definitive treatment of coccinellid biology and ecology. This volume covers the rapid scientific developments of recent years in the understanding of coccinellid phylogeny, the semiochemicals influencing their behaviour and of molecular genetics. Recent insights in relation to intraguild predation and the assessment of the predatory impact of coccinellids are also covered. Other special features of the

volume are the extensive references covering the literature from both East and West and a taxonomic glossary of the up-to-date nomenclature for species of coccinellids as well as of other organisms mentioned in the text. While aimed at researchers, university teachers and agricultural entomologists, the book is readable and appropriate for others who just have a liking for these interesting and attractive insects.

The Murder of History Oxford University Press, USA

While policy makers, media, and the international community focus their attention on Pakistan's ongoing security challenges, the potential of the rural economy, and particularly the agricultural sector, to improve Pakistanis' well-being is being neglected. Agriculture is crucial to Pakistan's economy. Almost half of the country's labor force works in the agricultural sector, which produces food and inputs for industry (such as cotton for textiles) and accounts for over a third of Pakistan's total export earnings. Equally important are nonfarm economic activities in rural areas, such as retail sales in small village shops, transportation services, and education and health services in local schools and clinics. Rural nonfarm activities account for between 40 and 57 percent of total rural household income. Their large share of income means that the agricultural sector and the rural nonfarm economy have vital roles to play in promoting growth and reducing poverty in Pakistan.

Ecology and Behaviour of the Ladybird Beetles (Coccinellidae)

Springer

Pakistan, since its independence in 1947, had to face tumultuous years for the first four decades. Despite the many challenges, both internal and external, the country was able to register a 6 per cent average annual growth rate during the first forty years of its existence. The country was ahead of India and Bangladesh in all economic and social indicators. Since 1990, the country has fallen behind its neighbouring countries and has had a decline in the growth rate. This book attempts to examine the reasons behind this slowdown, the volatile and inequitable growth of the last twenty-five years, and through a process of theoretical and empirical evidence argues that the most powerful explanatory hypothesis lies in the decay of institutions of governance. It also suggests a selective and incremental approach of restructuring

some key public institutions that pertain to accountability, transparency, security, economic growth, and equity.

This book is one of the many Islamic publications distributed by Talee throughout the world in different languages with the aim of conveying the message of Islam to the people of the world. Talee (www.talee.org) is a registered Organization that operates and is sustained through collaborative efforts of volunteers in many countries around the world, and it welcomes your involvement and support. Its objectives are numerous, yet its main goal is to spread the truth about the Islamic faith in general and the Shi`a School of Thought in particular due to the latter being misrepresented, misunderstood and its tenets often assaulted by many ignorant folks, Muslims and non-Muslims. Organization's purpose is to facilitate the dissemination of knowledge through a global medium, the Internet, to locations where such resources are not commonly or easily accessible or are resented, resisted and fought! In addition, Talee aims at encouraging scholarship, research and enquiry through the use of technological facilitates. For a complete list of our published books please refer to our website (www.talee.org) or send us an email to info@talee.org

Speeches In The United States And Canada, May And June, 1950, By The Prime Minister Of Pakistan. With An Appendix.

[Hidden Histories of Pakistan](#) Columbia University Press

This is one of the epics from Dr. Ambedkar. Written in 1945 the book really explains the dynamics of Hindu Mahasabha and Muslim League and how Congress and British Government played a role in partition. Although this book takes you to the unheard side of partition, it is interesting on how linguistic approach was chosen for a division of something that is unsure if it existed. Dr. Ambedkar takes a fine approach of giving a clarity of situation instead of been judgmental on the partition. No wonder the man was chosen to write our constitution. Of course if the war of majority and minority is kept away, the partition and its tragedy can be ready more fluently.

Hidden Histories of Pakistan Pocket Books

Seen through the lens of the outsider, Pakistan has often been reduced to a caricature. Its diversity and resilience have rarely figured in the single-issue focus of recent literature on the

country, be it journalistic or scholarly. This book seeks to present an alternate paradigm and to contribute a deeper understanding of the country's dynamics that may help explain why Pakistan has confounded all the doomsday scenarios. It brings together an extra-ordinary array of leading experts, including Ahmed Rashid, Ayesha Jalal and Zahid Hussain, and practitioners, such as the book's editor, Maleeha Lodhi, Akbar Ahmed and Munir Akram. Together they debate their country's strengths and weaknesses and offer ways out of its current predicament. This book provides a picture of how Pakistanis see themselves and their country's faultlines and spells out ways to overcome these. Pakistan's political, economic, social, foreign policy and governance challenges are assessed in detail. So too is the complex interplay between domestic developments and external factors including great power interests that are so central to the Pakistan story and explain the vicissitudes in its fortunes. Lodhi and her contributors contend that Pakistan and its people have the capacity to transform their country into a stable, modern Muslim state, but bold reforms will be needed to bring about this outcome.

Migration, Remittances, and Capital Flows Oxford University Press, USA

Emphasizing comprehensive treatment for quality patient care, this practical book integrates basic science with the clinical applications of fixed prosthodontics. Procedures are presented in a well-organized, systematic format that enhances comprehension.

Essays and articles on Mohammed Ali Jinnah, 1876-1948, statesman and founder of Pakistan.

Pakistan Or the Partition of India Oxford University Press, USA

"A Pocket History of the United States" traces the history of the nation that is, today, the oldest constitutional democracy in the world. Written by distinguished American historians, it has more than 2,000,000 copies in print worldwide and is one of the classic works in its field.

Oxford University Press, USA

This text covers the syllabi prescribed by the major public sector universities in Pakistan. The book provides a complete overview of the historical background and political development of

Pakistan, the breakup of 1971, and the nuclearization of Pakistan. The foreign relations section deals with the role of world powers during the wars fought by Pakistan and Pakistan's relations with South Asian and Middle Eastern countries. The economy and culture of Pakistan are also covered in great detail.

Life and Times of Ahmad Raza Khan Bareilvi John Wiley & Sons

Rethinking Pakistan is a wide-ranging analytical dissection of the Pakistani polity and offers a well-meaning, progressive prescription for present-day Pakistan, stitched together by an eclectic list of experts spanning diverse backgrounds and subjects. From energy self-sufficiency and scientific development to freedom of the press and the essential question of the dominance of the military over civilian affairs, this compendium offers a suitable guide for anyone who seeks to understand the striking mix of contemporary and historic challenges faced by Pakistan in the twenty-first century. The book deals with Pakistan's contemporary realities and future prospects.

The Heart of Asia. Speeches in the United States and Canada, May and June 1950 - by the Prime Minister of Pakistan Oxford University Press, USA

First published in 1932, this slim volume of short stories created a firestorm of public outrage for its bold attack on the hypocrisy of conservative Islam and British colonialism. Inspired by British modernists like Woolf and Joyce as well as the Indian independence movement, the four young trailblazers who penned this collection were eager to revolutionize Urdu literature. Instead, they invited the wrath of the establishment: the book was burned in protest and then banned by the British authorities.

Nevertheless, Angaaray spawned a new generation of Urdu writers and gave birth to the Progressive Writers' Association, whose members included, among others, stalwarts like Chughtai, Manto, Premchand and Faiz. This edition also provides a compelling account of the furore surrounding this explosive collection.

[Water Resources of Pakistan](#) Simon and Schuster

Censorship, Urdu literature, Islam, and progressive secular nationalisms in colonial India and Pakistan have a complex, intertwined history. Sarah Waheed offers a timely examination of the role of progressive Muslim intellectuals in the Pakistan movement. She delves into how these left-leaning intellectuals

drew from long-standing literary traditions of Islam in a period of great duress and upheaval, complicating our understanding of the relationship between religion and secularism. Rather than seeing 'religion' and 'the secular' as distinct and oppositional phenomena, this book demonstrates how these concepts themselves were historically produced in South Asia and were deeply interconnected in the cultural politics of the left. Through a detailed analysis of trials for blasphemy, obscenity and sedition, and feminist writers, Waheed argues that Muslim intellectuals engaged with socialism and communism through their distinctive ethical and cultural past. In so doing, she provides a fresh perspective on the creation of Pakistan and South Asian modernity.

Pakistan's Foreign Policy Cavendish Square Publishing, LLC
After 9/11, madrasas have been linked to international terrorism. They are suspected to foster anti-western, traditionalist or even fundamentalist views and to train al-Qaeda fighters. This has led to misconceptions on madrasa-education in general and its role in South Asia in particular. Government policies to modernize and 'pacify' madrasas have been precipitous and mostly inadequate. This book discusses the educational system of madrasas in South Asia. It gives a contextual account of different facets of madrasa education from historical, anthropological, theological, political and religious studies perspectives. Some contributions offer recommendations on possible – and necessary – reforms of

religious educational institutions. It also explores the roots of militancy and sectarianism in Pakistan, as well as its global context. Overall, the book tries to correct misperceptions on the role of madrasas, by providing a more balanced discussion, which denies neither the shortcomings of religious educational institutions in South Asia nor their important contributions to mass education.

Geology and Tectonics of Pakistan Taylor & Francis
Contributors offer an in-depth look at the dynamics of cultural and political change in Pakistan and the Pakistani Diaspora. Moving past static viewpoints, this volume demonstrates the multidirectional nature of the flow of ideas and people that create the social landscape experienced by Pakistanis globally.
