FIXTURES 1. It is a work holding device that holds, supports and locates the workpiece and guides the cutting tool for a specific operation 1. It is a work holding device that holds, supports and locates the workpiece for a specific operation but does not guide the cutting tool 2. Introduction to JIGS AND FIXTURES
 This jig is designed to utilize the table saw fence to help locate these splines and make for repeatable cuts. As described in the video, this jig starts with the base that is designed to fit the intended table saw fence being used. It's important that this base doesn't fit too tightly on the fence or it won't slide easily. Table Saw Jigs : 8 Steps (with Pictures) - Instructables
 Tenon Jig. If you have a lot of tenons to cut then, being able to cut quickly and easily on your table saw will save you a lot of time. Now there are a lot of different commercially available tenon jigs available like this one from Rockler. But there are also some brilliant examples of DIY tenon jigs. The Ultimate List of Table Saw Jigs
 Table Fixing : Jigs are usually not fixed to the table and often come in a portable and compact variant. The fixtures are fixed on the tables for providing the proper support to the workpiece. Weight : Jigs are lighter in construction for quicker handling and clamping, with the table is often unnecessary. 12 Difference Between Jig And Fixture (With Advantages ...
 Note: Except for the thin-rip jig, these jigs rely on an initial cut to define a zero-clearance edge. Because blade kerfs vary slightly, it's important to select and use the same blade each time you use the jig. So that you won't forget, note the blade used on the face of each jig. Small-Parts Jig
