 Edexcel (A) Advanced Geography meets the specific needs of AS (A) and A2 students by providing comprehensive and accessible coverage of the Edexcel (A) specification. Printed in full colour and

highly illustrated throughout, the textbook will guide students through the specification, helping them to develop the required knowledge and understanding of the core topics in physical and human geography examined in each unit. Written by Andy Palmer and Nigel Yates, both experienced authors and senior examiners, the textbook comprises 17 chapters, each covering in detail the subject content of one of the three sub-sections to each AS and A2 unit. Key terms are clearly explained and geographical processes and topics illustrated with up-to-date case studies and full-colour maps, graphs, diagrams and photographs. Regular examiner's advice explains the important points about a topic that students need to understand and apply correctly in the exam. Each chapter concludes with sample examination-style questions written to reflect the demands placed on students by the examination papers, and synoptic links to show how the topics relate to other parts of the specification.

series brings a fresh approach to topics of current interest.

Communities in Action Research & Education Association

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and

structural barriers that need to be overcome.

This book serves as a sequel to two distinguished volumes on capitalism: *Continuity and Change in Contemporary Capitalism* (Cambridge, 1999) and *Order and Conflict in Contemporary Capitalism* (1985). Both volumes took stock of major economic challenges advanced industrial democracies faced, as well as the ways political and economic elites dealt with them. However, during the last decades, the structural environment of advanced capitalist democracies has undergone profound changes: sweeping deindustrialization, tertiarization of the employment structure, and demographic developments. This book provides a synthetic view, allowing the reader to grasp the nature of these structural transformations and their consequences in terms of the politics of change, policy outputs, and outcomes. In contrast to functionalist and structuralist approaches, the book advocates and contributes to a 'return of electoral and coalitional politics' to political economy research.
