Leading the Way Routledge
 CompTIA-Authorized courseware for the Cloud Essentials Exam (CLO-001) What better way to get up to speed on cloud computing than with this new book in the popular Sybex Essentials series? Cloud Essentials covers the basics of cloud computing and its place in the modern enterprise. Explore public and private clouds; contrast the "as a service" models for PaaS, SaaS, IaaS, or XaaS platforms; plan security; and more. In addition, the book covers the exam objectives for the both the CompTIA Cloud Essentials (Exam CLO-001) exam and the EXIN Cloud Computing Foundation (EX0-116) certification exams and includes suggested exercises and review questions to reinforce your learning. Gets you up to speed on the hottest trend in IT--cloud computing Prepares IT professionals and those new to the cloud for and cover all of the CompTIA Cloud Essentials and EXIN Cloud Computing Foundation exam objectives Serves as CompTIA Authorized courseware for the exam Examines various models for cloud computing implementation, including public and private

clouds Contrasts "as a service" models for platform (PaaS), software (SaaS), infrastructure (IaaS), and other technologies (XaaS) Identifies strategies for implementation on tight budgets and goes into planning security and service management Get a through grounding in cloud basics and prepare for your cloud certification exam with Cloud Essentials.

Acoustic Design of Schools World Bank Publications
 Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be overwhelming for even

the most experienced practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.

Planning and Design World Health Organization

This book provides practising executives and academics with the theories and best practices to plan and implement the digital transformation successfully. Key benefits: an overview on how leading companies plan and implement digital transformation interviews with chief executive officers and chief digital officers of leading companies – Bulgari, Deutsche Bahn, Henkel, Lanxess, L'Oréal, Unilever, Thales and others – explore lessons learnt and roadmaps to successful implementation research and case studies on the digitalization of small and medium-sized companies cutting-edge academic research on business models, organizational capabilities and performance implications of the digital transformation tools and insights into how to overcome internal resistance, build digital capabilities, align the organization, develop the ecosystem and create customer value to implement digital strategies that increase profits Managing Digital Transformation is unique in its approach, combining rigorous academic theory with practical insights and contributions from companies that are, according to leading academic thinkers, at the forefront of global best practice in the digital transformation. It is a recommended reading both for practitioners looking to implement digital strategies within their own organisations, as well as for academics and postgraduate students studying digital transformation, strategy and marketing. [Selected Papers from ICOTTS20, Volume 2](#) Springer

Indonesia is the largest country in the Association of Southeast Asian Nations (ASEAN), accounting for around two fifths of the region's energy consumption. Energy demand across the country's more than 17,000 islands could increase by four fifths and electricity demand could triple between 2015 and 2030. While reliance on domestic coal and imported petroleum products has grown, Indonesia has started adding more renewables to its energy mix. The country has set out to achieve 23% renewable energy use by 2025, and 31% by 2050. REmap - the global roadmap from the International Renewable Energy Agency (IRENA) - addresses this challenge, presenting a range of technology and resource options, along with key insights on the opportunities and challenges ahead. As this REmap country report shows, Indonesia could feasibly exceed its current goals and deploy even more renewables. In fact, the country could reach its 2050 target two decades sooner - by 2030.

The Challenge of Slums Penguin

The normal means of compliance with Part E of Schedule 1 to the Building Regulations 2000 (as amended by SI 2002/2871) is to demonstrate that all the performance standards given in section

1.1 of this Building Bulletin, as appropriate, have been met. This Building Bulletin guides architects, acousticians, building control officers and building services engineers through the process of the acoustic design of schools in the context of the various types of spaces and activities. It contains performance standards, acoustic principles, good design practice, calculation procedures, case studies on existing schools and an example submission to a Building Control Body.

In order to do business effectively in contemporary South Asia, it is necessary to understand the culture, the ethos, and the region's new trading communities. In tracing the modern-day evolution of business communities in India, this book uses social history to systematically document and understand India's new entrepreneurial groups.

Readings in Cultural Anthropology World Bank Publications

The Challenge of Slums presents the first global assessment of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all level, from local to global, that underlie the formation of slums as well as their social, spatial and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics, case studies and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities and civil society organizations around the world.

The book presents a comprehensive discussion on software quality issues and software quality assurance (SQA) principles and practices, and lays special emphasis on implementing and managing SQA. Primarily designed to serve three audiences; universities and college students, vocational training participants, and software engineers and software development managers, the book may be applicable to all personnel engaged in a software projects Features: A broad view of SQA. The book delves into SQA issues, going beyond the classic boundaries of custom-made software development to also cover in-house software development, subcontractors, and readymade software. An up-to-date wide-range coverage of SQA and SQA related topics. Providing comprehensive coverage on multifarious SQA subjects, including topics, hardly explored till in SQA texts. A systematic presentation of the SQA function and its tasks: establishing the SQA processes, planning, coordinating, follow-up, review and evaluation of SQA processes. Focus on SQA implementation issues. Specialized chapter sections, examples, implementation tips, and topics for discussion. Pedagogical support: Each chapter includes a real-life mini case study, examples, a summary,

selected bibliography, review questions and topics for discussion. The book is also supported by an Instructor's Guide.

The Safety of Foods Chris Hendrickson

Passivhaus is the fastest growing energy performance standard in the world, with almost 50,000 buildings realised to date. Applicable to both domestic and non-domestic building types, the strength of Passivhaus lies in the simplicity of the concept. As European and global energy directives move ever closer towards Zero (fossil) Energy standards, Passivhaus provides a robust 'fabric first' approach from which to make the next step. The Passivhaus Designers Manual is the most comprehensive technical guide available to those wishing to design and build Passivhaus and Zero Energy Buildings. As a technical reference for architects, engineers and construction professionals The Passivhaus Designers Manual provides: State of the art guidance for anyone designing or working on a Passivhaus project; In depth information on building services, including high performance ventilation systems and ultra-low energy heating and cooling systems; Holistic design guidance encompassing: daylight design, ecological materials, thermal comfort, indoor air quality and economics; Practical advice on procurement methods, project management and quality assurance; Renewable energy systems suitable for Passivhaus and Zero Energy Buildings; Practical case studies from the UK, USA, and Germany amongst others; Detailed worked examples to show you how it's done and what to look out for; Expert advice from 20 world renowned Passivhaus designers, architects, building physicists and engineers. Lavishly illustrated with nearly 200 full colour illustrations, and presented by two highly experienced specialists, this is your one-stop shop for comprehensive practical information on Passivhaus and Zero Energy buildings.

Asset Recovery Handbook Seven Stories Press

Sixteenth in a series of annual reports comparing business regulation in 190 economies, *Doing Business 2019* measures aspects of regulation affecting areas of everyday business activity.

Caste, Business, and Industry in a Modern Nation John Wiley & Sons

This book features a collection of high-quality research papers presented at the International Conference on Tourism, Technology & Systems (ICOTTS 2020), held at the University of Cartagena, in Cartagena de Indias, Colombia, from 29th to 31st October 2020. The book is divided into two volumes, and it covers the areas of technology in tourism and the tourist experience, generations and technology in tourism, digital marketing applied to tourism and travel, mobile technologies applied to sustainable tourism, information technologies in tourism, digital transformation of tourism business, e-tourism and tourism 2.0, big data and management for travel and tourism, geotagging and tourist mobility, smart destinations, robotics in tourism, and information systems and technologies.

How Our Greatest Invention Makes Us Richer, Smarter, Greener, Healthier, and Happier Routledge

"Leading the way describes how the men and women of Air Force civil engineering have provided the basing that enabled the Air Force to fly, fight, and win. This book depicts how engineers built hundreds of bases during World Wars I and II, Korea, Vietnam, the Gulf War, and Operations Enduring Freedom and Iraqi Freedom. At the same time, these engineers operated and maintained a global network of enduring, peacetime bases. It describes the engineers' role in special projects such as the ballistic missile program, the Arctic early warning sites, and construction of the U.S. Air Force Academy. Using hundreds of sources, this detailed narrative tells the story of how civil engineers have been organized, trained, equipped, and employed for more than 100

years. From the beaches of Normandy to the mountains of Afghanistan, civil engineers have forged an unmatched record of success and built a solid foundation for today's Air Force."--Back cover.

Who's Who in Science and Engineering 2008-2009 UNESCO

The Global Investment Competitiveness Report 2019-2020 provides novel analytical insights, empirical evidence, and actionable recommendations for governments seeking to enhance investor confidence in times of uncertainty. The report's findings and policy recommendations are organized around "3 ICs" - they provide guidance to governments on how to increase investments' contributions to their country's development, enhance investor confidence, and foster their economies' investment competitiveness. The report presents results of a new survey of more than 2,400 business executives representing FDI in 10 large developing countries: Brazil, China, India, Indonesia, Malaysia, Mexico, Nigeria, Thailand, Turkey, and Vietnam. The results show that over half of surveyed foreign businesses have already been adversely affected by policy uncertainty, experiencing a decrease in employment, firm productivity, or investment. Foreign investors report that supporting political environments, stable macroeconomic conditions, and conducive regulatory regimes are their top three investment decision factors. Moreover, the report's new global database of regulatory risk shows that predictability and transparency increase investor confidence and FDI flows. The report also assesses the impact of FDI on poverty, inequality, employment, and firm performance using evidence from various countries. It shows that FDI in developing countries yields benefits to their firms and citizens-including more and better-paid jobs-but governments need to be vigilant about possible adverse consequences on income distribution. The report is organized in 5 chapters: Chapter 1 presents the results of the foreign investor survey. Chapter 2 explores the differential performance and development impact of greenfield FDI, local firms acquired by multinational corporations (i.e. brownfield FDI), and domestically-owned firms using evidence from six countries. Chapter 3 assesses the impact of FDI on poverty, inequality, employment and wages, using case study evidence from Ethiopia, Turkey and Vietnam. Chapter 4 presents a new framework to measure FDI regulatory risk that is linked to specific legal and regulatory measures. Chapter 5 focuses on factors for increasing the effectiveness of investment promotion agencies.

Global Report on Human Settlements 2003 Marquis Whos Who

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. The book provides comprehensive, easy-to-understand introductory coverage of mechanical and electrical systems in buildings. Elementary engineering concepts and step-by-step design principles are introduced in a straightforward manner and supported by over 320 illustrations and 500 photographs. It includes new chapters on emerging sustainability (green) technologies and building science. It presents material that can provide the future architect, architectural engineer, and architectural engineering technician with a basic working-level knowledge of principles and practices. This book is written specifically for those interested in building heating, ventilating and air conditioning (HVAC), plumbing and piping (water supply and sanitary drainage), storm drainage, illumination, electrical power distribution, building telecommunications, acoustics and acoustical control, vertical/horizontal transportation and conveying, fire protection and suppression, and building renewable energy and energy conservation systems.

Recommended Minimum Requirements for Plumbing World Bank Publications

The existing telecommunications infrastructure in the Middle East and North Africa MENA suffers from various regulatory and market bottlenecks that are hampering the growth of the Internet in most countries and related access to information and to potential new job sources.

Understanding the Strategic Process Springer Nature

Demonstrate the nature of culture and its influence on people's lives. For over 40 years, the best-selling Conformity and Conflict has brought together original readings and cutting edge research alongside classic works as a powerful way to study human behavior and events. Its readings cover a broad range of theoretical perspectives and demonstrate basic anthropological concepts. The Fourteenth Edition incorporates successful articles from past editions and fresh ideas from the field to show fascinating perspectives on the human experience. Teaching and Learning Experience Personalize Learning - MyAnthroLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking - Articles, article introductions and review questions encourage students to examine their assumptions, discern hidden values, evaluate evidence, assess their conclusions, and more! Engage Students - Section parts, key

terms, maps, a glossary and subject index all spark student interest and illustrate the reader's main points with examples and visuals from daily life. Support Instructors - Teaching your course just got easier! You can create a Customized Text or use our Instructor's Manual, Electronic "MyTest" Test Bank or PowerPoint Presentation Slides. Additionally, Conformity and Conflict's part introductions parallel the basic concepts taught in introductory courses - which allow the book to be used alone as a reader or in conjunction with a main text. Note: MyAnthroLab does not come automatically packaged with this text. To purchase MyAnthroLab, please visit www.MyAnthroLab.com or you can purchase a valuepack of the text + MyAnthroLab (at no additional cost): VP ISBN-10: 0205176011/ISBN-13: 9780205176014

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.-- Publisher's description.
