MOORE MELANY

Real Science, Great Hacks, and Good Food Golden Books

Have you ever wondered why we eat wheat, rice, potatoes and cassava? Why we routinely domesticate foodstuffs with the power to kill us, or why we chose almonds over acorns? Answering all these questions and more in a readable and friendly style, this book takes you on a journey through our history with crop plants. Arranged into recurrent themes in plant domestication, this book documents the history and biology of over 50 crops, including cereals, spices, legumes, fruits and cash crops such as chocolate, tobacco and rubber.

Forest Baby Read-Along National Academies Press

It's easy to learn counting with this classic Little Golden Book! The rhythmic text, paired with heartwarming animal illustrations by Garth Williams, have made counting from one to ten a joy for nearly 60 years. A must for every toddler and preschooler's library. Little Golden Books have been loved by children for over 75 years. When they were first published in 1942, high-quality books for children hadn't been available at a price most people could afford. Little Golden Books changed that! Priced at just 25 cents and sold where people shopped every day, they caused an instant sensation and were soon purchased by the hundreds of thousands. Created by such talented writers as Margaret Wise Brown (author of Goodnight Moon) and Richard Scarry, Little Golden Books have helped millions of children develop a lifelong love of reading. Today, Little Golden Books feature beloved classics such as The Poky Little Puppy and Scuffy the Tugboat, hot licenses, and new original stories—the classics of tomorrow, ready to be discovered between their sturdy cardboard covers and gold-foil spines.

Milk Fed Macmillan

This is an enhanced ebook with a read-along function. From a carrier, a baby peers out at the trail. Leaves rustle overhead, and a turtle stretches toward the sun. Everything shimmers with light, including the jeweled wings of a dragonfly and the star-shaped lilies. This delightful board book takes the reader on a hike accented by the soft sound of footsteps on the trail and grounded by the rhythmic rocking of mother and baby moving through the forest. Travel along on their serene journey with Laurie Elmquist's lyrical verse and Shantala Robinson's warmly painted collages. A beautiful book that will be treasured by anyone who loves the outdoors.

My First Chinese New Year Penguin UK

A Publishers Weekly best book of 2015

Edible Colors Candlewick Press (MA)

#1 New York Times Bestseller from the author of How to Change Your Mind, The Omnivore's Dilemma, and Food Rules Food. There's plenty of it around, and we all love to eat it. So why should anyone need to defend it? Because in the so-called Western diet, food has been replaced by nutrients, and common sense by confusion—most of what we're consuming today is longer the product of nature but of food science. The result is what Michael Pollan calls the American Paradox: The more we worry about nutrition, the less healthy we see to become. With In Defense of Food, Pollan proposes a new (and very old) answer to the question of what we should eat that comes down to seven simple but liberating words: "Eat food. Not too much. Mostly plants." Pollan's bracing and eloquent manifesto shows us how we can start making thoughtful food choices that will enrich our lives, enlarge our sense of what it means to be healthy, and bring pleasure back to eating.

Consider the Fork Hachette UK

A lighthearted chronicle of how foods have transformed human culture throughout the ages traces the barley- and wheat-driven early civilizations of the near East through the corn and potato industries in America.

Things That Go Penguin

An irreverent, surprising, and entirely entertaining look at the little-known history surrounding the foods we know and love Is Italian olive oil really Italian, or are we dipping our bread in lamp oil? Why are we masochistically drawn to foods that can hurt us, like hot peppers? Far from being a classic American dish, is apple pie actually . . . English? "As a species, we're hardwired to obsess over food," Matt Siegel explains as he sets out "to uncover the hidden side of everything we put in our mouths." Siegel also probes subjects ranging from the myths—and realities—of food as aphrodisiac, to how one of the rarest and most exotic spices in all the world (vanilla) became a synonym for uninspired sexual proclivities, to the role of food in fairy- and morality tales. He even makes a well-argued case for how ice cream helped defeat the Nazis. *The Secret History of Food* is a rich and satisfying exploration of the historical, cultural, scientific, sexual, and, yes, culinary subcultures of this most essential realm. Siegel is an armchair Anthony Bourdain, armed not with a chef's knife but with knowledge derived from medieval food-related manuscripts, ancient Chinese scrolls, and obscure culinary journals. Funny and fascinating, *The Secret History of Food* is essential reading for all foodies.

[An Edible Exploration of the Mathematics of Mathematics](#) Macmillan

'A must-read ... satisfying, rich ... loaded with flavour' Sunday Telegraph This book is a celebration of food. By food, Michael Pollan means real, proper, simple food - not the kind that comes in a packet, or has lists of unpronounceable ingredients, or that makes nutritional claims about how healthy it is.

More like the kind of food your great-grandmother would recognize. In *Defence of Food* is a simple invitation to junk the science, ditch the diet and instead rediscover the joys of eating well. By following a few pieces of advice (Eat at a table - a desk doesn't count. Don't buy food where you'd buy your petrol!), you will enrich your life and your palate, and enlarge your sense of what it means to be healthy and happy. It's time to fall in love with food again. For the past twenty years, Michael Pollan has been writing about the places where the human and natural worlds intersect: food, agriculture, gardens, drugs, and architecture. His most recent book, about the ethics and ecology of eating, is *The Omnivore's Dilemma*, named one of the ten best books of 2006 by the New York Times and the Washington Post. He is also the author of *The Botany of Desire*, *A Place of My Own* and *Second Nature*.

[The BFG \(Colour Edition\)](#) HarperCollins

An enhanced edition of *Food Rules*—beautifully illustrated and packed with additional food wisdom Michael Pollan's *Food Rules* prompted a national discussion helping to change the way Americans approach eating. This new edition illustrated by celebrated artist Maira Kalman—and expanded with a new introduction and nineteen additional food rules—marks an advance in the national dialogue that *Food Rules* inspired. Many of the new rules, suggested by readers, underscore the central teachings of the original *Food Rules*, which are that eating doesn't have to be so complicated and that food is as much about pleasure and community as it is about nutrition and health. A beautiful book to cherish and share, *Food Rules* guides us with humor, joy, and common sense toward a happier, healthier relationship to food.
