Troubador Publishing Ltd

From the author of the Amazon bestselling Broken World series, comes book two in an exciting new Zombie Apocalypse series! There was something evil living in Andrew. I'd seen it in his eyes, reflecting back at me like a spotlight. It was the brightest darkness I'd ever seen, bright enough to snuff every one of us out... Still reeling from loss, Kellan and Regan set out to rescue Harper from Andrew and his men. Only now they aren't just fighting to free a teenage girl, they're fighting to keep a promise to the man who saved them, knowing if they fail, Harper won't be the only one at risk. Joining forces with a new group means having help and making friends, but it also brings new conflict and the risk of losing everything they've worked to build

over the last nine years. With zombies banging at their door and the threat of danger around every corner, Regan and Kellan will have to fight to keep their world secure and their secret from getting out.

Light After Dark 1 is a collection of well-established, but up-to-date, science, both from theory and observation, including material from Charles Francis' published papers. Francis considers arguments, both for and against, two of the most controversial ideas in modern cosmology. Based on established physics, he suggests that unobserved and exotic substances, cold dark matter and dark energy, can be replaced by an improved understanding of the creation of large scale structure following the Big Bang. The structures and the physics of the universe as we observe it are described and placed in the context of Big Bang cosmology. Further topics include large scale

structure, entropy and the arrow of time, the creation of the elements, the structure and evolution of galaxies and stars, Newtonian gravity, the structure of the Milky Way and other spiral galaxies, galaxy rotation curves and Friedmann cosmology. This fascinating exploration of the universe as it is revealed by physical theory and the observations of astronomers will appeal to students of astronomy and astrophysicists, and anyone intrigued by the universe in which we live. Written without equations and with helpful explanations of physical concepts, it is accessible to both scientists and non-specialist readers alike.

A deeply panoramic tour of the night, from its brightest spots to the darkest skies we have left. A starry night is one of nature's most magical wonders. Yet in our artificially lit world, three-

quarters of Americans' eyes never switch to night vision and most of us no longer experience true darkness. In *The End of Night*, Paul Bogard restores our awareness of the spectacularly primal, wildly dark night sky and how it has influenced the human experience across everything from science to art. From Las Vegas' Luxor Beam -- the brightest single spot on this planet -- to nights so starlit the sky looks like snow, Bogard blends personal narrative, natural history, science, and history to shed light on the importance of darkness -- what we've lost, what we still have, and what we might regain -- and the simple ways we can reduce the brightness of our nights tonight.

You don't know true darkness until you've felt light... Like a firecracker, showering her with colorful sparks of freedom, Ryland quickly sweeps Araya away from her grey existence. For the first time since the accident, living in

darkness is no longer something Araya wants to do willingly. Unleashed by the shadows of her reminder, being with Ryland, Araya touches light. Together they will learn what it's like to feel alive for the first time. At the edge of darkness, a ray of light will, DARE them to HOPE. DARE them to LOVE DARE them to LIVE *The Edge of Darkness* is book 1 in the darkness trinity novel. *Dark deeds of the papacy contrasted with the bright lights of the gospel* Penguin

Hawke's narrator is a young man in torment, disgusted with himself after the collapse of his marriage, still half-hoping for a reconciliation that would allow him to forgive himself and move on as he clumsily, and sometimes hilariously, tries to manage the wreckage of his personal life with whiskey and sex. What saves him is theater: in particular, the challenge of performing the role of Hotspur in a production of *Henry IV* under the leadership of a brilliant director, helmed by one of the most electrifying--and narcissistic--Falstaffs of all time. A novel about shame and beauty and faith, and the moral power

of art.

it's only with Violet that

Qibli knows Darkstalker  
must be stopped. And he  
knows he could stop him -  
- if he had magic. With  
even a sliver of the  
ancient dragon's all-  
powerful scroll, Qibli could  
rewrite history the right  
way: end war forever;  
make every dragon  
happy; perhaps even cast  
a very small spell so that  
everyone would like him .  
. . Instead, as  
Darkstalker's dangerous  
influence spreads across  
Pyrrhia, entrancing or  
killing every dragon in the  
seven tribes, Qibli can  
only grasp the small  
animus objects he's  
borrowed from Turtle.

With some clever  
thinking, Qibli's talons  
finally hold the power to  
make a difference. But  
prophecies are not easy  
to rewrite. Can Qibli be  
the magical force Pyrrhia  
needs, or will he be the  
one to bring Jade  
Mountain -- and his  
family, his friends, his  
whole world -- crashing  
down?

This is true in a literal sense, but also metaphorically: in theology, philosophy,

literature and the arts the light of day signifies life, safety, knowledge and all that is good, while the darkness of the night suggests death, danger, ignorance and evil. A closer inspection, however, reveals that things are not quite so clear cut and that light and darkness cannot be understood as simple binary opposites. On a biological level, for example, daylight and darkness are inseparable factors in the calibration of our circadian rhythms, and a lack of periodical darkness appears to be as contrary to health as a lack of exposure to sunlight. On a cultural level, too, night and darkness are far from being universally condemnable: in fiction, drama and poetry the darkness of the night allows not only nightmares but also dreams, it allows criminals to ply their trade and allows lovers to meet, it allows the pursuit of pleasure as well as deep thought, it allows metamorphoses, transformations and transgressions unthinkable in the light of day. But night is not merely darkness. The night gains significance as an alternative space, as

an 'other of the day', only when it is at least partially illuminated. The volume examines the interconnection of night, darkness and nocturnal illumination across a broad range of literary texts. The individual essays examine historically specific light conditions in literature, tracing the symbolic and metaphoric content of darkness and illumination and the attitudes towards them.

A boy on the run. A girl  
determined to find him. A  
compelling fantasy looks  
at issues of privilege,  
protest, and justice. All  
light in Chattana is  
created by one man —

the Governor, who  
appeared after the Great  
Fire to bring peace and  
order to the city. For  
Pong, who was born in  
Namwon Prison, the  
magical lights represent  
freedom, and he dreams  
of the day he will be able  
to walk among them. But  
when Pong escapes from  
prison, he realizes that  
the world outside is no  
fairer than the one behind  
bars. The wealthy dine  
and dance under bright  
orb light, while the poor  
toil away in darkness.  
Worst of all, Pong's prison  
tattoo marks him as a  
fugitive who can never be  
truly free. Nok, the prison  
warden's perfect  
daughter, is bent on  
tracking Pong down and  
restoring her family's  
good name. But as Nok  
hunts Pong through the  
alleys and canals of  
Chattana, she uncovers  
secrets that make her  
question the truths she  
has always held dear. Set  
in a Thai-inspired fantasy  
world, Christina  
Soontornvat's twist on  
Victor Hugo's Les  
Misérables is a dazzling,  
fast-paced adventure that  
explores the difference  
between law and justice  
— and asks whether one  
child can shine a light in  
the dark.
