The final volume in this significant series, this publication mirrors the broad scientific attention given to ideas and issues associated with the life-span perspective: constancy and change in human development; opportunities for and constraints on plasticity in structure and function across life; the potential for intervention across the entire life course (and thus for the creation of an applied developmental science); individual differences (diversity) in life paths, in contexts (or the ecology) of human development, and in changing relations

between people and contexts; interconnections and discontinuities across age levels and developmental periods; and the importance of integrating biological, psychological, social, cultural, and historical levels of organization in order to understand human development.

This study explores the politics of American Indian and Hispanic women leaders in New Mexico's environmental policymaking arena. Using non-random purposive sampling, 50 women were selected for participation who were political activists in grassroots organization or public officials, elected or appointed to local, state or tribal government. Personal interviews were employed to gather data on their political socialization, their leadership trajectories, their motives for engagement in public life, their political ideology, their racial-ethnic- and gender identity and their policy agendas and strategies for influencing public policymaking.

Can a Baby Be an Enemy? Our world is in a deep, prolonged crisis. The threat of global nuclear war, the chronic condition of local wars, the imperilled environment, and mass starvation are among the major forms this crisis takes. The dangers of massive overkill, overexploitation of the environment, and overpopulation are well known, but surprisingly little has been said about their potential interactions, their bearing upon each other. If there were to be a nuclear confrontation between today's superpowers, it might not take place in today's world, but in a far less friendly habitat, such as the world may be some decades hence. And it need hardly be added that the era of this particular super power configuration may be waning rapidly, its place to be taken by other international arrangements not necessarily less threatening. To understand and cope with our situation we need correspondingly serious reflection. This volume forms a welcome part of that process. Unavoidably, a large part of our thinking about the issues of human survival must be oriented to physical and biological aspects of the total danger. But it has not escaped the authors of this book that, coupled with these aspects, there are profound psychological dangers, such as loss of the sense of futurity, moral deterioration, and a fatalistic decline in the will to struggle to protect our home, the Earth.

Celebrates the 21st anniversary of The Politics Association and offers a reassessment of the continuities and changes in the governments led by Wilson, Heath, Callaghan and Thatcher. The book asks whether 1979 was a political watershed or an undistinguished step in Britain's economic decline.

www.sagepub.com/freetrial Via 99 entries or "mini-chapters," the SAGE 21st Century Reference Series volumes on political science highlight the most important topics, issues, questions, and debates any student obtaining a degree in this field ought to have mastered for effectiveness in the 21st century. 21st Century Political Science: A Reference Handbook serves as an authoritative reference source that meets students' research needs with more detailed information than encyclopedia entries but not so much jargon, detail, or density as a journal article or a research handbook chapter. An editorial advisory board comprised of eminent scholars from various subfields, many of whom are also award-winning teachers, selected the most important general topics in the discipline. The two volumes are divided into six major parts: 1) General Approaches of Political Science; 2) Comparative Politics; 3) International Relations; 4) Political Science Methodology; 5) Political Thought; and 6) American Politics. A section on identity politics includes chapters on topics such as Race, Ethnicity, and Politics; Gender and Politics; Religion and Politics; and LGBT Issues/ Queer Theory. This two-volume resource makes fairly complex approaches in political science accessible to advanced undergraduate and beginning graduate students.

Political Socialization of Youth in Fascist Italy, 1922-1943

Unprecedented attention has gone to researching young voters, and yet one segment of this age group has been largely ignored: non-college (or "working") youth. Because very little is known about them, the following paper advances three fundamental concerns: What types of political activities do young workers engage in? What can be learned about them by comparing their political attitudes and behaviors to their college attending peers? and, What are some strategies that might be effective to increase their political participation? In responding to these questions, the current article reports data from a telephone survey of over 1,000 19-23 year-old working and college youth. The findings confirm that young workers (1) report lower levels of political socialization and interest as well as fewer civic skills, group memberships and mobilization opportunities than college students, and (2) are less likely to engage in a set of political acts than their college attending peers. The data also reveal, however, heretofore unknown patterns for

this group, including that: political socialization and political interest are the most powerful predictors of participation for young workers; the cultivation of civic skills is a stronger predictor of participation for young workers than for college students; and workers who belong to groups and express an interest in politics may be the most ripe for mobilization efforts. The conclusion addresses how these findings could be used in efforts to engage young workers in the political system. (Contains 4 tables and 9 endnotes.) The Trouble with Leaving Political Education to the Coaches

Rowman & Littlefield

This report describes how an innovative curriculum promoted the civic development of high school students along with parents by stimulating news media attention and discussion in families. Evidence is based on a three-year evaluation of Kids Voting USA, an interactive, election-based curriculum. Political communication in the home increased the probability of voting for students when they reached voting age during the 2004 election. Thus, the interplay of influences from school and family magnified curriculum effects in the short term and sustained them in the long term. This bridging of the classroom with the living room suggests how Kids Voting offers a model for reforming civic education in the United States. Data are derived from a series of natural field experiments, beginning with interviews of 491 student-parent pairs in 2002. The authors evaluate the curriculum as it was taught in the fall of that year in El Paso County, Colorado, with Colorado Springs as the largest city; Maricopa County, Arizona, which includes the Phoenix region; and Broward/Palm Beach counties, Florida, the epicenter for the ballot-recount saga of 2000. Students who were juniors or seniors in 2002 were interviewed in the fall/winter of 2002, 2003, and 2004. They were all of voting age by the fall of 2004, allowing the authors to determine whether participation in the curriculum in 2002 affected turnout in the presidential election two years later. The authors also interviewed one parent from each family each year. The voting records in the four counties were examined to provide a definitive assessment of whether the curriculum increased the likelihood of voting. Finally, the panel survey data was supplemented with qualitative insights

obtained from focus group interviews. An appendix provides: (1) Electoral Contexts; (2) Data Collection Procedures; (3) Item Wording & Coding for All Measures; and (4) three supplemental tables. (Contains 7 tables and 7 figures.) [This Working Paper was produced by CIRCLE (The Center for Information and Research on Civic Learning and Engagement). For CIRCLE Working Paper 48, see ED494024.].

Two Decades in British Politics Routledge
This international Encyclopaedia provides a balanced, comprehensive account of contemporary trends in world, regional and nation-state government and politics. In 84 in-depth essays, in two scholarly volumes, it captures the global changes, both theoretical and factual, of the past three decades - to give an unprecedented overview of political science and political affairs on the eve of the new century. An essential resource, the Encyclopaedia of Government and Politics provides accessible, authoritative coverage of the disciplines, examining for example, political theory, processes and behaviour, policy-making, pressure groups, contemporary ideologies, international relations, and major issues in world affairs, such as nationalism, arms control and disarmament, human rights and democratisation. Written by experts in each field, the entries analyse traditional approaches (including access to non-Western sources), assess recent developments and chart the directions for future research; each topic includes extensive bibliographies and suggestions for further reading. The volumes are introduced and placed in context in an essay by Mary Hawkesworth, which advances the conceptual treatment of political science to a new level. The articles which follow are thematically arranged under nine main headings: Political Theory: Central Concepts, Contemporary Ideologies, Contemporary Political Systems, Political Institutions, Political Forces and Political Processes, Centripetal and Centrifugal Forces in the Nation-State, Policy-Making and Policies, International Relations, and Major Issues in Contemporary Politics. Key Features * 84 in-depth essays provide a current, balanced guide to international government and politics * Prestigious editors lead a worldwide team of specialists in each field * Clearly and incisively written to meet the needs of students, lecturers and practitioners at all levels * Helpful bibliographies - of new and classic material and suggestions for further reading * Extensive index of Topics and People

The Making of an Alienated

Generation Transaction Publishers
In the wake of World War II, the issues of political stability in general and the survival of stable democracies in particular captured the attention of American political scientists. An inevitable offshoot of this interest was the study of political behavior—how it is acquired and how and why it persists. In its early stages, work on political socialization focused exclusively on childhood and adolescence, as if the learning process ends when adulthood begins. Only recently has adult socialization emerged as a legitimate field of study within political science. In *Political Learning in Adulthood*, social scientists for the first time examine the changes in political outlook and behavior that take place during the adult years, providing an invaluable overview of the problems, theories, and methodological approaches that characterize the field of political socialization. They consider which political values remain constant and which are subject to change, and they explore the ways in which both ordinary and extraordinary life events affect adults' political worldviews. Among specific topics considered are the effects of age and aging, the relation between participation in the work force and the development and expression of political views, continuity and change in the wake of revolutionary social and political movements, and the effects of such traumatic and life-threatening situations as war and terrorist activity.

A Sourcebook of Theory and Research
Michael Riccards
This volume is a collection of ideas of the past, present and future interrelationships among political science, education, socialization and public policy analysis, using both American and international perspectives and research findings. In addition to a thorough discussion of political socialization findings in a cross-national context, this book also uses a taxonomic approach in conceptualizing U.S. civic education during the 1960s and 1970s, with an update on the state of U.S. citizenship education in the 1980s. What is proposed here is a practical new model for organizing our political education curricula; one which is analytical, allows for a dynamic synthesis and stresses the importance of active decision-making and policy analysis as key elements in participatory democracy and citizenship

education. Concluding recommendations, comments, interpretations and challenges to political educators and researchers complete this unique theoretical and empirical approach to political education. [Papers Available](#) Springer Science & Business Media

This thought-provoking book illustrates how the interaction of childhood socialization and the reality of the adult woman's life produces variations in political attitudes and in perceptions of available options for political behavior. Important suggestions for facilitating resocialization to feminism and increasing political participation are included.

This book increases the awareness of youth political agency and how it relates to adults, governments, communities, and local and global discourse. It reveals the complexity of youth's political lives as it

intersects with social identifiers such as location, gender, and political status, and interacts with neoliberal discourse embedded in media, local politics, education, and religious idioms. This book fills a gap in existing research to provide a body of literature on the political socialization and its manifestation in youth political agency. The research findings aid in understanding the abilities of youth to reason, reflect upon, articulate, and act upon their political views. This research is not only pertinent to children in Palestine, but can also be applied to children living everywhere as global discourse of oppression is not limited to a location, age or a group.

This influence does not fit into neat "conservative" and "liberal" patterns, but instead interacts with parental and peer influence in heretofore unexamined ways. By-and-large, the entertainment media help to reinforce pre-existing values. However, this book takes a close look at many of the ways in which the entertainment media influence young Americans to hold socio-political beliefs that are different from these of their parents, schools, and teachers."--BOOK JACKET.

[The Political Socialization of Secondary School Students in Transitional Hong Kong](#) Routledge

Focusing on the forces underlying

headlines, this volume examines the processes and outcomes of political socialization—the ways in which an individual acquires the attitudes, beliefs, and values of the political culture from the surrounding environment, and takes on a role as citizen within that political framework. Political Socialization vividly points out the contradiction currently existing between the optimism found in the traditional literature of this field and the reality of dramatic present-day incidents. This book offers a selection of papers that advance the recognized approach and set forth the new thinking on the subject. It provides a survey of both sides of this thought-provoking debate and, as such, remains as valid today as when it was first published in 1970. An incisive introduction by the editor defines and outlines the issues and problems involved, and places the various contributions in perspective. Greenberg voices the belief that "a significant number of the young and highly educated are beginning to bring into question the legitimacy of political, social, and economic arrangements" and that the Vietnam War and the civil rights movement were socializing events, playing as powerful a role as did the Depression for the parents of the younger generation. The debate format will provide the reader with a variety of commentary and lead them to form their own judgment on these major historical intellectual disputes.
