Homicide in Criminal Law The European Union as an Area of Freedom, Security and Justice
 Bringing criminal law to life. Criminal Law Today, Fifth Edition, brings criminal law to life by relating it to real stories from today's headlines. The text's approach is strongly influenced by the belief that the law has always been, and remains, a vital policy-making tool. As a topic for study and discussion, the nature and life of the law is more important today than ever before. The text highlights the challenges that face the law as it continues to adapt to the needs of a complex and rapidly changing society and features a balanced text/casebook approach that provides a lively introduction to criminal law. Effective in-text learning tools give students the resources they need to master the material presented in the text. MyCJLab was designed to meet the needs of today's instructors and students. MyCJLab provides instructors with a rich and flexible set of course materials, along with course management tools that make it easy to deliver all or a portion of your course online. MyCJLab provides students with a personalized interactive learning environment, where they can learn at their own pace and measure their progress.

We live in an era of mass mobility where governments remain committed to closing borders, engaging with securitisation discourses and restrictive immigration policies, which in turn nurture xenophobia and racism. It is within this wider context of social and political unrest that the contributors of

this collection reflect on their experiences of conducting criminological research. This collection focuses on the challenges of doing research on the intersections between criminal justice and immigration control, choosing and changing methodologies while juggling the disciplinary and interdisciplinary requirements of the work's audience. From research design, to fieldwork to writing-up, this book captures every part of the research process, drawing on a range of topics such as migration control, immigrant detention and border policing. It also reflects on more neglected areas such as the interpersonal and institutional contexts of research and the ontological and epistemological assumptions embedded within data analysis methods. It makes a significant contribution to our understanding of the major developments in current research in this field, how and why they occur and with what consequences. This book seeks to shake off the phantom of undisturbed research settings by bringing to the fore the researchers' involvement in the research process and its products. An interdisciplinary collection, it can be used as a reference not just for those interested in the criminology of mobility but also as a learning tool for anyone conducting research on a highly charged topic in contemporary policy and politics.

This report addresses the use of criminal sanctions to control corporate behavior—prosecutions both of corporations and of employees for actions taken on corporations' behalf. The authors describe the current state of the use of criminal sanctions in controlling corporate behavior, describe how the current regime developed, and offer suggestions about how the use of criminal sanctions to control corporate behavior might be improved.

In today's globalized society, an international exchange of ideas and views is indispensable within the field of social sciences, including criminology and criminal justice studies. The research group Governance of Security (GofS) fosters contemporary international discourses on issues of crime and crime control. In 2008, GofS started a research paper series, combining theoretical and empirical articles on issues reflecting the research activities of GofS. This research group is a collaboration between Ghent University and Ghent University College in Belgium. GofS concentrates its research around the study of administrative and judicial policy that have been developed with respect to new issues of crime and insecurity. The GofS series 'Governance of Security Research Papers (GofS)' is published by Maklu Publishing (Belgium). Readings on Criminal Justice, Criminal Law and Policing Volume 2 of GofS's series Governance of Security Research Papers includes the following: Punishment across Borders: The Rationales behind International Execution of Sentences; Interpreting the Concept of 'Discretionary Power' within the Execution of Sentences: A Comparison between the Belgian and French Situation; Esperanto for EU Crime Statistics: Towards Common European Offense Definitions in an EU-level Offense Classification System; Developing a Framework for the Legal Rights of Victims and Witnesses; What Can European Institutions and the International Criminal Court Learn from Each Other?; Purpose Limitation in EU-US Data Exchange in Criminal Matters: The Remains of the Day; Some Criminal Law Reflections on the Sexual Transmission of HIV; Reading about Crime in Post-Intervention Societies: A Critical Assessment; Policing and Leadership: The Case of the Belgian Chiefs of the Local Police; Reflections on the Possible Integration of Intelligence-Led Policing into Community Policing: The Belgian Case; Reliability and Correlational Validity of Police Interview Competences: Assessing the Stability of the Police Interview Competency Inventory; The Role of Europol in Joint Investigation Teams: A Foretaste of an Executive European Police Office?; Checking Aspects of a "Nodal Orientation" for Policing the Port of Antwerp.

Measurement Problems in Criminal Justice Research Routledge

From the Master and Servant legislation to the Factories Acts of the 19th century, the criminal law has always had a vital yet normatively complex role in the regulation of work relations. Even in its earliest forms, it operated both as a tool to repress collective organizations and enforce labour discipline, while policing the worst excesses of industrial capitalism. Recently, governments have begun to rediscover criminal law as a regulatory tool in a diverse set of areas related to labour law: 'modern slavery', penalizing irregular migrants, licensing regimes for labour market intermediaries, wage theft, supporting the enforcement of general labour standards, new forms of hybrid preventive orders, harassment at work, and industrial protest. This volume explores the political and regulatory dimensions of the new 'criminality at work' from a wide range of disciplinary perspectives, including labour law, immigration law, and health and safety regulations. The volume provides an overview of the regulatory terrain of 'criminality at work', exploring whether these different regulatory interventions represent politically legitimate uses of the criminal law. The book also examines whether these recent interventions constitute a new pattern of criminalization that operates in preventive mode and is based upon character and risk-based forms of culpability. The volume concludes by reflecting upon the general themes of 'criminality at work' comparatively, from Australian, Canadian, and US perspectives. Criminality at Work is a timely, rich and ambitious piece of scholarship that examines the many intersections between criminal law and work relations from a historical and contemporary vantage-point.

Two centuries ago, American criminal justice was run primarily by laymen. Jury trials passed moral judgment on crimes, vindicated victims and innocent defendants, and denounced the guilty. But since then, lawyers have gradually taken over the process, silencing victims and defendants and, in many cases, substituting plea bargaining for the voice of the jury. The public sees little of how this assembly-line justice works, and victims and defendants have largely lost their day in court. As a result, victims rarely hear defendants express remorse and apologize, and defendants rarely receive forgiveness. This lawyerized machinery has purchased efficient, speedy processing of many cases at the price of sacrificing softer values, such as reforming defendants and healing wounded victims and relationships. In other words, the U.S. legal system has bought quantity at the price of quality, without recognizing either the trade-off or the great gulf separating lawyers' and laymen's incentives, values, and powers. In *The Machinery of Criminal Justice*, author Stephanos Bibas surveys the developments over the last two centuries, considers what we have lost in our quest for efficient punishment, and suggests ways to include victims, defendants, and the public once again. Ideas range from requiring convicts to work or serve in the military, to moving power from prosecutors to restorative sentencing juries. Bibas argues that doing so might cost more, but it would better serve criminal procedure's interests in denouncing crime, vindicating victims, reforming wrongdoers, and healing the relationships torn by crime.

Workshop Summary SAGE Publications

This report describes some of the National Institute of Justice's (NIJ) successful research projects, summarizes their findings, and discusses their influence on criminal justice policy and practice. The study considers whether the research has (1) addressed issues and problems that are central and critical to criminal justice policy and practice, (2) affected law enforcement and other functions of the system, and (3) ultimately helped improve the system's effectiveness in dealing with crime and criminals. The author asked NIJ staff to nominate research efforts that, in their opinion, had influenced policy and practice in the last two decades and then interviewed high-level managers and policymakers about their knowledge and use of the research. Finally, she reviewed the relevant criminal justice literature to see whether the changes in the field reflected or paralleled directions suggested by the research. The study indicates that research has indeed helped shape the way criminal justice policymakers and practitioners think about issues, how they identify problems that need attention, which alternatives they consider for dealing with their problems, and their sense of what can be accomplished.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

This book presents a collection of essays on key topics and new perspectives on the EU's Area of Freedom, Security and Justice (AFSJ) and has a Foreword by the President of the Court of Justice of the European Union, Prof. Dr. Koen Lenaerts. Europe's area of freedom, security and justice is of increasing importance in contemporary EU law and legislation. It is worthy of special research attention because of its high-stakes content (particularly from an individual and a state perspective) and because its development to date has tangentially thrown up some of the most important and contentious constitutional questions in EU law. As the AFSJ becomes more and more intertwined with 'mainstream' EU law, this edited collection provides a timely analysis of the merger between the two. Showcasing a selection of work from key thinkers in this field, the book is organised around the major AFSJ themes of crime, security, border control, civil law cooperation and important 'meta' issues of governance and constitutional law. It also analyses the major constitutional and governance challenges such as variable geometry, institutional dynamics, and interface with rights around data protection/secretcy/spying. In the concluding section of the book the editors consider the extent to which the different facets of the AFSJ can be construed in a coherent and systematic manner within the EU legal system, as well as identifying potential future research agendas. The European Union as an Area of Freedom, Security and Justice will be of great interest to students and scholars of European law and politics.

The Oxford Handbook of Criminal Law reflects the continued transformation of criminal law into a global discipline, providing scholars with a comprehensive international resource, a common point of entry into cutting edge contemporary research and a snapshot of the state and scope of the field. To this end, the Handbook takes a broad approach to its subject matter, disciplinarily, geographically, and systematically. Its contributors include current and future research leaders representing a variety of legal systems, methodologies, areas of expertise, and research agendas. The Handbook is divided into four parts: Approaches & Methods (I), Systems & Methods (II), Aspects & Issues (III), and Contexts & Comparisons (IV). Part I includes essays exploring various methodological approaches to criminal law (such as criminology, feminist studies, and history). Part II provides an overview of systems or models of criminal law, laying the foundation for further inquiry into specific conceptions of criminal law as well as for comparative analysis (such as Islamic, Marxist, and military law). Part III covers the three aspects of the penal process: the definition of norms and principles of liability (substantive criminal law), along with a less detailed treatment of the imposition of norms (criminal procedure) and the infliction of sanctions (prison or corrections law). Contributors consider the basic topics traditionally addressed in scholarship on the general and special parts of the substantive criminal law (such as jurisdiction, mens rea, justifications, and excuses). Part IV places criminal law in context, both domestically and transnationally, by exploring the contrasts between criminal law and other species of law and state power and by investigating criminal law's place in the projects of comparative law, transnational, and international law.

Should prostitution be legalized? Are stalking laws effective? Is medical treatment a useful way to deal with criminal offenders? Are restorative justice

processes too lenient toward offenders? These are some of the most hotly debated questions in the field of criminology, often sparking discomfort and anger among those who wish to know more about these issues. Now, *Controversial Issues in Criminology* attempts to provide factual information and a much-needed forum for discussion, utilizing a unique debate format to discuss controversial issues in the field of criminology. KEY TOPICS: Topics addressed in this book were chosen with a conscious effort to include those that are the most controversial. The contributing authors, each solicited because of their expertise in this area, come from a variety of backgrounds, academic disciplines and perspectives. In addition to such hot topics as prostitution, stalking, and the rehabilitation of criminals, the book also covers issues such as the "supersizing" of murder, government research on terrorism, stricter law enforcement for "techno-crimes," and the role of "community corrections." Law enforcement officers, corrections officers, educators, students of law enforcement, and anyone interested in issues of criminal justice and the correctional process.

Criminal Justice and Criminology connects key concepts to real field research and practices using contemporary examples and recurring case studies that demonstrate how concepts relate to students' lives. Authors Callie M. Rennison and Timothy C. Hart introduce practical research strategies used in criminal justice to show students how a research question can become a policy that changes or influences criminal justice practices. The book's student-driven approach addresses both the why and the how as it covers the research process and focuses on the practical application of data collection and analysis. By demonstrating the variety of ways research can be used and reinforcing the need to discern quality research, the book prepares students to become critical consumers and ethical producers of research.
