"Perfect for parents who want to understand the different methods to do arithmetic their children are learning—and

why they are being taught that way."  
—Keith Devlin, award-winning Stanford University mathematician "Can you help me with my math homework?" If this question fills you with fear (or even panic), then Old Dogs, New Math is here to help! Gone are the days when elementary school students simply memorized their times tables and struggled through long division. Today,

students are expected not just to find the right answer, but also to use the best method—and to explain why it works. If your attempts to help your child are met with "That's not how the teacher does it," then it's time to take the stress out of math homework. Old Dogs, New Math demystifies Common Core math for parents, including: Number lines, place value and negative numbers Long multiplication

and division Fractions, percentages and decimals Shapes, symmetry and angles Data analysis, probability and chance Complete with sample questions, examples of children's errors, and over 25 games and activities, Old Dogs, New Math will not only help you and your child subtract on a number line or multiply on a grid—but also help you discover math all around you, and have fun doing it!

Homework Program 1 John Wiley & Sons Eureka Math is a comprehensive, content-rich PreK-12 curriculum that follows the focus and coherence of the Common

Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from

the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The

Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka
