A Modern Introduction to Probability and Statistics A Brief Introduction to Probability & Statistics. Probability is starting with an animal, and figuring out what footprints it will make. Statistics is seeing a footprint, and guessing the animal. Probability is straightforward: you have the bear. Measure the foot size, the leg length, and you can deduce the footprints. A Brief Introduction to Probability & Statistics ... An Introduction to Basic Statistics and Probability - p. 4/40. Example. Suppose we roll two die and take their sum.  $S = \{2,3,4,5,\dots,11,12\}$   $Pr(\text{sum} = 5) = 4/36$ . Because we get the sum of two die to be 5 if we roll a (1,4),(2,3),(3,2) or (4,1).
