Rape in the Nordic Countries SAGE

This ebook is a selective guide designed to help scholars and students of criminology find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic

information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated related. A reader will discover, for instance, the most reliable introductions and overviews to the topic, and the most important publications on various areas of scholarly interest within this topic. In criminology, as in other disciplines, researchers at all levels are drowning in potentially useful scholarly information, and this guide has been created as a tool for cutting through that material to find the exact source you

need. This ebook is a static version of an article from Oxford Bibliographies Online: Criminology, a dynamic, continuously updated, online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study and practice of criminology. Oxford Bibliographies Online covers most subject disciplines within the social science and humanities, for more information visit www.aboutobo.com. [Beyond the Nuremberg Legacy](#) SAGE Publications
By showcasing international, European, and community-based projects, this

volume explores how online technologies and collaborative and blended learning can be used to bolster social cohesion and increase students' understanding of what it means to be a global citizen. With the pace of technology rapidly increasing, *Blended and Online Learning for Global Citizenship* draws timely attention to the global lessons being learned from the impact of these technologies on peace building, community development, and acceptance of difference. In-depth case studies showcasing successful projects in Europe, Northern Ireland, and Israel explore blended learning and illustrate how schools and educators have embraced online technologies to foster national and international links both within and beyond communities. This has, in turn, equipped students with experiences that have informed their attitudes to cultural and political conflicts, as well as racial, ethnic, and social diversity. Building on the authors' previous work *Online Learning and Community Cohesion* (2013), this thought-provoking text will be of interest to researchers, academics, and postgraduate students in the fields of international and comparative education.

Educators and school leaders concerned with how multiculturalism and technology play out in the classroom environment will also benefit from reading this text.

This book offers a critical appreciation of the nature and impact of coercive control in interpersonal relationships. It examines what this concept means, who is impacted by the behaviours it captures, and how academics, policy-makers and policy advocates have responded to the increasing recognition of the deleterious effects that coercive control has on especially women's lives. The book discusses the historical emergence of this concept, who its main proponents have been, and how its effects have been understood. It considers the role of coercive control in making sense of women's pathway into crime as well as their experiences of it as victims. Coercive control has been presented predominantly as a gendered process and consideration is given in this book to the efficacy of this assumption as well as the extent to which the concept makes sense for a wide constituency of marginalised women. In

recent years, much energy has been given to efforts to criminalise coercive control and the concerns that these efforts generate are discussed in detail, alongside what the limitations to such initiatives might be. In conclusion the book situates the rising pre-occupation with coercive control within the broader concerns with policy transfer, ways of taking account of victim-survivor voices, alongside the importance of working towards more holistic policy responses to violence(s) against women. The book will be of particular interest to academics, policy-makers and practitioners working in criminal justice who wish to both understand the nature and extent of coercive control, as well the importance of appreciating the role of nuance in translating that understanding into practice.

"The text is logically organized and easy to read and understand. Students will find the text intriguing as they move through the coverage of the controversies from the text."—Michelle L. Foster, Kent State University Updated with new content and

current controversies that facilitate critical thinking, debate, and application of the concepts, Mallicoat's *Crime and Criminal Justice, Second Edition*, provides accessible and concise coverage of all relevant aspects of the criminal justice system, as well as unique chapters on victims and criminal justice policy. Using an innovative format designed to increase student engagement and critical thinking, each chapter is followed by two Current Controversy debates that dive into a critical issue in criminal justice. These features challenge misconceptions by providing a balanced debate of both the pros and the cons of each issue and are followed by probing questions to help students think critically about timely topics. With contemporary examples that students can easily apply and a broad range of effective learning tools, this practical text helps students go beyond the surface toward a deeper understanding of the criminal justice system. —Bonny Mhlanga, Western Illinois

University An Introduction to Statistics in Criminology and Criminal Justice Statistics for Criminology and Criminal Justice, Third Edition demonstrates how statistics is relevant to a student's life and future career by illustrating the logical connections between basic statistical concepts and their real-world implications in criminology and criminal justice. Written for students with a limited mathematical background, author Jacinta Gau eases

student anxiety around statistics by simplifying the overarching goal of each statistical technique and providing step-by-step instructions for working through the formulas and numbers. Students use real data from the field to build a foundational knowledge of statistics, rather than merely memorizing key terms or formulas. New to the Third Edition NEW Thinking Critically feature encourages students to apply the concepts from the chapter to real-life scenarios, with open-ended questions that are designed to inspire students to think about the nuances of science, statistics, and their application to criminal justice. Additional illustrations and examples in every chapter keep students engaged with the content and offer ample opportunities for them to practice the techniques. New and updated data sets from a wide range of relevant sources, such as the NCVS and UCR, BJS, LEMAS, the Census of Jails, and much more have been incorporated to give students insights into the state of criminal justice research today. New research on critical topics encourages students to discuss changes happening in the field such as the Census of Jails,

inmate-on-staff assaults in prisons, and homicide rates. Practicing Statistics Whiteboard Videos, available in SAGE edge, walk students through statistical calculations to reinforce key concepts. Language Education and Emotions presents innovative, empirical research into the influence of emotions and affective factors in language education, both in L1 and in foreign language education. It offers a comprehensive overview of studies authored and co-authored by researchers from all over the world. The volume opens and ends with "backbone" contributions by two of the discipline's most reputed scholars: Jane Arnold (Spain) and Jean-Marc Dewaele

(United Kingdom). This book broadens our understanding of emotions, including well-known concepts such as foreign language anxiety as well as addressing the emotions that have only recently received scientific attention, driven by the positive psychology movement. Chapters explore emotions from the perspective of the language learner and the language teacher, and in relation to educational processes. A number of contributions deal with traditional, school-based contexts, whereas others study new settings of foreign language education such as migration. The book paints a picture of the broad scale of approaches used to study this topic and offers new and relevant insights for the field of language education and emotions. This book will be of great interest to academics, researchers and postgraduate students in the field of language education, psycholinguistics, sociolinguistics, and applied linguistics. While the Nordic countries are listed at the top in most international rankings of gender equality and citizens' feelings of security, studies on the prevalence of sexual victimisation present a different picture, suggesting that the very countries that have invested much in establishing gender equality actually see a high prevalence of sexual violence. This book sheds light on the phenomenon and construction of rape and other forms of sexual violence within the Nordic region, exploring the ways in which rape and sexual violence are dealt with through criminal law and considering governmental policies aimed at combatting it, with a special focus on legal regulations and developments. Thematically organised, it offers new research on perpetrators, victimhood, criminal justice and prevention. Multi-disciplinary in approach, it brings together the latest work from a range of scholars to offer insights into the situation in the five Nordic countries, asking how and why rape and other forms of sexual violence occur, whilst also addressing the timely issues of

online sexual cultures, BDSM and the grey areas of sexual offences. As such, it will appeal to scholars of sociology, criminology and law with interests in gender and sexual violence.

It is no secret that America's sentencing and corrections systems are in crisis, and neither system can be understood or repaired fully without careful consideration of the other. This handbook examines the intertwined and multi-layered fields of American sentencing and corrections from global and historical viewpoints, from theoretical and policy perspectives, and with close attention to many problem-specific arenas. Editors Joan Petersilia and Kevin R. Reitz, both leaders in their respective fields, bring together a group of preeminent scholars to present state-of-the-art research, investigate current practices, and explore the implications of new and varied approaches wherever possible. The handbook's contributors bridge the gap between research and policy across a range of topics including an overview of mass incarceration and its collateral effects, explorations of

sentencing theories and their applications, analyses of the full spectrum of correctional options, and first-hand accounts of life inside of and outside of prison. Individual chapters reflect expertise and source materials from multiple fields including criminology, law, sociology, psychology, public policy, economics, political science, and history. Proving that the problems of sentencing and corrections, writ large, cannot be addressed effectively or comprehensively within the confines of any one discipline, *The Oxford Handbook of Sentencing and Corrections* is a vital reference volume on these two related and central components of America's ongoing experiment in mass incarceration.

Essentials of Statistics for Criminology and Criminal Justice helps students understand the vital role that research and statistics play in the study of criminology and criminal justice by showing them how to conduct and interpret statistics in real-world settings with a step-by-step approach to solving problems. This practical, applied approach offers students

the fundamentals of descriptive and inferential statistics in a concise and easy-to-understand format—avoiding complicated proofs and discussions of statistical theory. The examples and case studies provide relevant examples for criminology and criminal justice students, and deal with contemporary issues related to crime, corrections, police, and the judicial system. Students will not only learn about the "how to" in statistics, but they will also recognize its importance in today's criminal justice system.

The Innocent and the Criminal Justice System Routledge

Since President Nixon coined the phrase, the "War on Drugs" has presented an important change in how people view and discuss criminal justice practices and drug laws. The term evokes images of militarization, punishment, and violence,

as well as combat and the potential for victory. It is no surprise then that questions such as whether the "War on Drugs" has "failed" or "can be won" have animated mass media and public debate for the past 40 years. Through analysis of 30 years of newspaper content, *Debating the Drug War* examines the social and cultural contours of this heated debate and explores how proponents and critics of the controversial social issues of drug policy and incarceration frame their arguments in mass media. Additionally, it looks at the contemporary public debate on the "War on Drugs" through an analysis of readers' comments drawn from the comments sections of online news articles. Through a discussion of the findings and their implications, the book illuminates the ways in which ideas about race, politics, society, and crime, and forms of evidence and statistics such as rates of arrest and incarceration or the financial costs of drug policies and incarceration are advanced, interpreted, and contested. Further, the book will bring to light how people form a sense of their racial selves in debates over policy issues tied to racial inequality such as the "War on Drugs" through narratives

that connect racial categories to concepts such as innocence, criminality, free will, and fairness. Debating the Drug War offers readers a variety of concepts and theoretical perspectives that they can use to make sense of these vital issues in contemporary society.

This book addresses the growing demand for collaborative and reflexive scholarly engagement in the Arctic directed at providing relevant insights to tackle local challenges of arctic communities. It examines how arctic research can come to matter in new ways by combining methods and engagement in the field of inquiry in new and meaningful ways. Research informs decisions affecting the futures of arctic communities. Due to its ability to include local concerns and practices, collaborative research could play a greater role in this process. By way of example of how to bring new voices to the fore in

research, this edited collection presents experiences of researchers active in collaborative arctic research. It draws multidisciplinary perspectives from a broad range of academics in the fields such as law and medicine over tourism and business studies, planning and development, cultural studies, ethnology and anthropology. It also shares personal experiences of working in Greenland and with Greenlanders, whether communities, businesses and entrepreneurs, public officials and planners, patients or students. Offering useful insights into the current problems of Greenland representative of the arctic region, this book will be beneficial for researchers and scientists involved in arctic research.

Language Education and Emotions Routledge

The study of crime has focused primarily on why particular people commit crime or why specific communities have higher crime levels than others. In The Criminology of Place, David Weisburd, Elizabeth Groff, and Sue-Ming Yang

present a new and different way of looking at the crime problem by examining why specific streets in a city have specific crime trends over time. Based on a 16-year longitudinal study of crime in Seattle, Washington, the book focuses our attention on small units of geographic analysis-micro communities, defined as street segments. Half of all Seattle crime each year occurs on just 5-6 percent of the city's street segments, yet these crime hot spots are not concentrated in a single neighborhood and street by street variability is significant. Weisburd, Groff, and Yang set out to explain why. The *Criminology of Place* shows how much essential information about crime is inevitably lost when we focus on larger units like neighborhoods or communities. Reorienting the study of crime by focusing on small units of geography, the authors identify a large group of possible crime risk and protective factors for street segments and an array of interventions that could be implemented to address them. The *Criminology of Place* is a groundbreaking book that radically alters traditional thinking about the crime

problem and what we should do about it. **A Critical Introduction to International Criminal Law** Criminals and Their Scientists The History of Criminology in International Perspective A history of criminology as a history of science and practice. Research into Emotions and Language Learners, Language Teachers and Educational Processes University of California Press *Crime, Justice and Social Democracy* is a provocative and thoughtful collection of timely reflections on the state of social democracy and its inextricable links to crime and justice. Authored by some of the world's leading thinkers from the UK, US, Canada and Australia, this volume provides a powerful social democratic critique of neoliberal regimes of governance and crime control. Social democratic values raise broad questions about government, ethics, and the exercise of power in criminal justice institutions; each chapter here engages with how this might occur and with what consequences. The contributions to this

volume, while critical and hard hitting, also boldly envision a more socially just criminal justice politic. This collection is essential reading for activists, scholars, legislators, politicians and policy makers concerned with promoting, imagining and understanding socially sustaining societies.

Essentials of Statistics for Criminology and Criminal Justice Palgrave Macmillan *Criminal Justice Ethics, Fourth Edition* examines the criminal justice system through an ethical lens by identifying ethical issues in practice and theory, exploring ethical dilemmas, and offering suggestions for resolving ethical issues and dilemmas faced by criminal justice professionals. Bestselling author Cyndi Banks draws readers into a unique discussion of ethical issues by exploring moral dilemmas faced by professionals in the criminal justice system before examining the major theoretical foundations of ethics. This distinct organization allows readers to understand real life ethical issues before grappling with philosophical approaches to the resolution of those issues.
