\*WINNER OF THE UK BLACK PRIDE LITERARY PRIZE FOR NON-FICTION DIVA AWARDS 2017\* \*AS SEEN ON TRANSFORMATION STREET\* 'Opens minds, breaks down myths and vaporises prejudice - I loved it!' Rebecca Root,

star of Boy Meets Girl 'Funny, thoughtful and honest' Stylist 'It's a boy!' or 'It's a girl!' are the first words almost all of us hear when we enter the world. Before our names, before we have likes and dislikes - before we, or anyone else, has any idea who we are. And two years ago, as Juno Dawson went to tell her mother she was (and actually, always had been) a woman, she started to realise just how wrong we've been getting it. Gender isn't just screwing over trans people, it's messing with everyone. From little girls who think they can't be doctors to teenagers who come to expect street harassment. From exclusionist feminists to 'alt-right' young men. From men who can't cry to the women who think they shouldn't. As her body gets in line with her mind, Juno tells not only her own story, but the story of everyone who is shaped by society's expectations of gender - and what we can do about it. Featuring insights from well-known gender, feminist and trans activists including Rebecca Root, Laura Bates, Gemma Cairney, Anthony Anaxagorou, Hannah Witton, Alaska

Thunderfuck and many more, *The Gender Games* is a frank, witty and powerful manifesto for a world in which everyone can truly be themselves. *The Gender Games* has been optioned by SunnyMarch Productions to be turned into an original television series, written by Rose Lewenstein.

### **Peppa at the Petting Farm**

Ladybird The increasing popularity of digitally-mediated communication is prompting us to radically rethink literacy and its role in education; at the same time, national policies have promulgated a view of literacy focused on the skills and classroom routines associated with print, bolstered by regimes of accountability and assessments. As a result, teachers are caught between two competing discourses: one upholding a traditional conception of literacy re-iterated by politicians and policy-makers, and the other encouraging a more radical take on 21st century literacies driven by leading edge thinkers and researchers. There is a pressing need for a book which engages researchers in international dialogue around new literacies, their implications for policy and practice, and how they might articulate across national boundaries. Drawing on cutting edge research from the USA, Canada, UK, Australia and South

Africa, this book is a pedagogical and policy-driven call for change. It explores studies of literacy practices in varied contexts through a refreshingly dialogic style, interspersed with commentaries which comment on the significance of the work described for education. The book concludes on the 'conversation' developed to identify key recommendations for policy-makers through a Charter for Literacy Education. .

Understanding Digital Technologies and Young Children explores the possibilities digital technology brings to enhance the learning and developmental needs of young children. Globally, the role of technology is an increasingly important part of everyday life. In many early childhood education frameworks and curricula around the world, there is an expectation that children are developing skills to become effective communicators and are using digital technology to investigate their ideas and represent their thinking. This means that educators throughout the world are expected to actively enhance children's learning in ways that provide learning experiences with technology that are

balanced and purposeful to allow the transformation of traditional authentic learning experiences. Digital technologies can be used to explore, manipulate, discover, play and interact with real and imaginative worlds to allow active meaning making. With a wide range of expert

contributors, this book provides a comprehensive examination of the current research on technology and young children and the importance of engagement for learning. This approach encourages the reader to rethink the possibilities and potential of digital technologies for learning in the early years, especially in the

years before formal schooling when children might be attending early childhood settings. This will be a valuable reference for anyone looking for an international perspective on digital technology and young children, and is particularly aimed at current and future teachers.
