Cold War & 1950s Univ of California Press

Hours after the USSR collapsed in 1991, Congress began making plans to establish the official memory of the Cold War. Conservatives dominated the proceedings, spending millions to portray the conflict as a triumph of good over evil and a defeat of totalitarianism equal in significance to World War II. In this provocative book, historian Jon Wiener visits Cold War monuments, museums, and memorials across the United States to find out how the era is being remembered. The author's journey provides a history of the Cold War, one that turns many

conventional notions on their heads. In an engaging travelogue that takes readers to sites such as the life-size recreation of Berlin's "Checkpoint Charlie" at the Reagan Library, the fallout shelter display at the Smithsonian, and exhibits about "Sgt. Elvis," America's most famous Cold War veteran, Wiener discovers that the Cold War isn't being remembered. It's being forgotten. Despite an immense effort, the conservatives' monuments weren't built, their historic sites have few visitors, and many of their museums have now shifted focus to other topics. Proponents of the notion of a heroic "Cold War victory" failed; the public didn't buy the official story. Lively, readable, and well-informed, this book expands current discussions about memory and history, and raises intriguing questions about popular skepticism toward official ideology.

Glenn Hastedt's clear and succinct introduction to the field prepares students to think about America's changing role in the world and to develop the critical thinking skills needed to participate in the debate about the conduct and content of American foreign policy. He begins by asking "What do we mean by foreign policy and what is the national interest?" Next, Hastedt looks to the past and examines the defining experiences that have helped to shape American foreign policy today. Third, he looks at how American foreign policy is made in the current hyperpartisan political climate. Here Hastedt examines the various institutions and how they come together to make policy, as well as the policy instruments available to decision makers. And finally, he encourages students to wonder, "What's next?" The eleventh edition reflects the latest headlines, including more extensive discussions of hybrid warfare, cyber wars, drones, and an assessment of Obama's foreign policy. There are new case studies on ISIS, authorization of force resolutions, women in combat, the climate agreement, the Iran nuclear agreement, Obama's opening to Cuba, and the future of COIN. And new

During the 1950s and 1960s, the U.S. Army conducted atmospheric dispersion tests in many American cities using fluorescent particles of zinc cadmium sulfide (ZnCdS) to develop and verify meteorological models to estimate the dispersal of aerosols. Upon learning of the tests, many citizens and some public health officials in the affected cities raised concerns about the health consequences of the tests. This book assesses the public health effects of the Army's tests, including the toxicity of ZnCdS, the toxicity of surrogate cadmium compounds, the environmental fate of ZnCdS, the extent of public exposures from the dispersion tests, and the risks of such exposures.
