[Green City, Clean Waters on Vimeo](#) Green City Clean Waters TheGreen City, Clean Waters is Philadelphia’s 25-year plan to transform the health of the City’s creeks and rivers primarily through a land-based approach. By implementing green stormwater infrastructure projects such as rain gardens and stormwater planters, the City can reduce water pollution impacts while improving our essential natural resources and making our neighborhoods more beautiful.City of Philadelphia: Green City, Clean WatersThe benefits of Green City, Clean Waters go beyond stormwater management. All the new trees and other green systems help clean and cool the air, reducing asthma and heat-related illnesses. The citywide network of green infrastructure is estimated to absorb or help the city avoid some 1.5 billion pounds of carbon dioxide annually, which is equal to removing 3,400 cars from the road.Green City, Clean Waters | ASLA Climate Change ExhibitionThe "Green City, Clean Waters" plan builds on Philadelphia's stormwater regulations and ordinances, which strive to employ new approaches to stormwater management that include controls to improve the quality of the receiving streams and to increase groundwater recharge within the areas of water quality, channel protection, flood control, and non-structural site design.C40: "Green City, Clean Waters"Green City, Clean Waters and Stormwater Regulations.
