This "clever opener likely to leave readers breathless both with laughter and anticipation" (Kirkus Reviews, starred review) is the first in the New York Times bestselling series from the author of the

Half Upon a Time trilogy. Life is boring when you live in the real world, instead of starring in your own book series. Owen knows that better than anyone, what with the real world's homework and chores. But everything changes the day Owen sees the impossible happen—his classmate Bethany climb out of a book in the library. It turns out Bethany's half-fictional and has been searching every book she can find for her missing father, a fictional character. Bethany can't let anyone else learn her secret, so Owen makes her a deal: All she has to do is take him into a book in Owen's favorite Kiel Gnomesfoot series, and he'll never say a word. Besides, visiting the book might help Bethany find her father... ..Or it might just destroy the Kiel Gnomesfoot series, reveal Bethany's secret to the entire world, and force Owen to live out Kiel Gnomesfoot's final (very final) adventure.

Excerpt from *The Path to Rome* And why (you will say) is all this put by itself in what anglo-saxons call a Foreword, but gentlemen a Preface? Why, it is because I

have noticed that no book can appear without some such thing tied on before it; and as it is folly to neglect the fashion, be certain that I read some eight or nine thousand of them to be sure of how they were written and to be safe from generalising on too frail a basis. The Wild Road The Porcupine's Quill
The epic first novel in the allegorical fantasy series about the romance and adventures of a community of moles is "a breathtaking achievement" (The Washington Post). The moles of Duncton Wood live in the shadow of Mandrake, a cruel tyrant corrupted by absolute power. A solitary young mole, Bracken, leads the fight to free them. Only by putting his trust in the ancient Stone, a forgotten symbol of a great spiritual past, can Bracken find the strength to challenge Mandrake's darkness. When Bracken falls in love with Rebecca, Mandrake's daughter, the moles must make life and death choices as their extraordinary search for freedom and truth begins. Together, Bracken and Rebecca will embark on moving journey that will challenge them in ways they could never have imagined. But can they save Duncton before it's too late? "A passionate, lyrical, appealing tale . . . Consistently absorbing . . . Enchanting." —Cosmopolitan "A great big mole-epic with a great big theme." —Daily Mail

Book of Silence Ravenstone
In this epic grimdark conclusion to the Godblind Trilogy, heroes, armies, and gods both good and evil will battle one last time, with the fate of the world itself at stake. . . . The great city of Rilpor has fallen. Its walls have crumbled under the siege by the savage Mireces; its defenders have scattered, fleeing for their lives; its new rulers plot to revive the evil Red Gods using the city's captured, soon-to-be-sacrificed citizens. Now, with the Fox God leading the shattered remnants of the Rilporian defence and the Mireces consolidating their claim on the rest of the

country, it's up to Crys, Tara, Mace, Dom and the rest to end the Red Gods' scourge once and for all. While the Rilporians plan and prepare for one final, cataclysmic battle to defeat their enemies, the Blessed One and the king of the Mireces have plans of their own: dark plans that will see gods resurrected and the annihilation of the Dancer for all time. Key to their plan is Rillirin, King Corvus's sister, and the baby—the Bloodchild—she carries. As both sides face their destinies and their gods, only one thing is clear: death waits for them all.

"Applied Cross-Coupling Reactions" provides students and teachers of advanced organic chemistry with an overview of the history, mechanisms and applications of cross-coupling reactions. Since the discovery of the transition-metal-catalyzed cross-coupling reactions in 1972, numerous synthetic uses and industrial applications have been developed. The mechanistic studies of the cross-coupling reactions have disclosed that three fundamental reactions: oxidative addition, transmetalation, and reductive elimination, are involved in a catalytic cycle. Cross-coupling reactions have allowed us to produce a variety of compounds for industrial purposes, such as natural products, pharmaceuticals, liquid crystals and conjugate polymers for use in electronic devices. Indeed, the Nobel Prize for Chemistry in 2010 was awarded for work on cross-coupling reactions. In this book, the recent trends in cross-coupling reactions are also introduced from the point of view of synthesis design and catalytic activities of transition-metal catalysts.

God only knows what possessed Bill Bryson, a reluctant adventurer if ever there was one, to undertake a gruelling hike along the world's longest continuous footpath—The Appalachian Trail. The 2,000-plus-mile trail winds through 14 states, stretching along the east coast of the United States, from Georgia to Maine. It snakes through some of the wildest and most spectacular landscapes in North America, as well as through some of its most poverty-stricken and primitive backwoods areas. With his offbeat sensibility, his eye for the absurd, and his laugh-out-loud sense of humour, Bryson recounts his confrontations with nature at its most uncompromising over his five-month journey. An instant classic, riotously funny, *A Walk in the Woods* will add a whole new audience to the legions of Bill Bryson fans.

Though moles are rarely seen, they live in close proximity to humans around the world. Gardeners and farmers go to great lengths to remove molehills from their

fields and gardens; mole-catching has been a profession for the past two millennia. Moles are also close to our imagination, appearing in myths, fairy tales, and comic books as either wealthy, undesirable grooms or seekers of enlightenment. In *Mole*, Steve Gronert Ellerhoff examines moles in nature as well as their representation throughout history and across cultures. Balancing evolution and ecology with photographs and artworks, Ellerhoff provides a veritable mountain of new insight into this exceedingly private mammal.
