AMIR CARLO

Things That Join the Sea and the Sky

Braided River

The Colorado Rockies are Ann Zwinger's subject in prose and drawing. There, 8,300 feet above sea level, summer is short and winter long and often harsh; it is a place where much of life exists on the margin. In good years the grasses are lush; in bad years, even the mice starve. But it is a land the Zwingers have lovingly explored and recorded, careful not to disrupt the balance of the land, the relationship of plant to animal and of each to its environment. These forty acres, called Constant Friendship after the Maryland land her ancestor settled in the early 1730s, are a place of all seasons, for even

in winter there is a promise of spring, and in spring the foretaste of summer. The white of snow becomes the white of summer clouds, the resonant green of spruce becomes the green head of drake mallard ... here part of each season is contained in every other. In beautiful and simple language and with 80 illustrations, *Beyond the Aspen Grove* tells of meadow, lake, marsh and forest, of algae and dragonflies, of deer and jays that live in the thin clear air of the mountain world. Conservation and Management of Forest Genetic Resources in Europe Llewellyn Worldwide Forests, lakes, mountains, caves—even your garden—are alive with nature's spirits. "Enchantment of the Faerie Realm" can help you commune with elves, devas, nymphs, gnomes, and other faerie folk. With just a little patience and persistence

you can learn to recognize the presence of these mysterious, magical creatures. New interior design

Transforming Leadership Sounds True

Mark Nepo—the #1 New York Times bestselling author and popular spiritual teacher—"has given us not only a much-needed message of hope and inspiration, but a practical guide on how to build a better tomorrow, together" (Arianna Huffington, founder of HuffPost). This poignant and timely meditation on the importance of community, demonstrates how we can live more enriching lives by cultivating connectedness. At once a moving meditation and an empowering guide, *More Together Than Alone* is a compelling testament to the power of community and why it's so essential in our lives, now more than ever. Mark Nepo draws from historical events, spiritual

leaders, and the natural world to show how, in every generation, our tendency is to join together to accomplish our greatest achievements, from creating education to providing clean drinking water, and preserving the arts. Nepo's historical snapshots, from ancient times to contemporary examples, show how community creates a light in the darkest of times. The book explores the heart of how we come together in varied and beautiful ways, whether forming resistance groups during the Holocaust or rebuilding after the nuclear devastation in Nagasaki. These inspiring stories teach us that even in the bleakest days, we have the power to create connections and draw strength from one another. Featuring thought-provoking analysis and practical takeaways, *More Together Than Alone* will help us inhabit a stronger sense of togetherness where we live and in the world so we can achieve our highest potential, as individuals, and as communities. "In an age of racial divisions, school shootings, and international conflict, this book's message about the necessity of coming together is timely, and its examples of human compassion and unity are often comforting" (Publishers Weekly).

Lois Hole's Favorite Trees & Shrubs

Heyday Books

Easy to use field guide provides detailed information about plants in the region extending from Alaska to western Ontario. 800 colour photographs and 900 line drawings.

Among the Aspen Mango Media Inc.

A haunting and compelling novel set one thousand years ago in the remote northwest Highlands of Scotland, *The Last Bear* recounts a tale of ecological and spiritual crisis from the viewpoint of one extraordinary woman.

Oregon Wild Timber Press (OR)

From Aspen Matis, author of the acclaimed true story *Girl in the Woods*, comes a bold and atmospheric memoir of a woman who—in searching for her vanished husband—discovers deeper purpose. Aspen's and Justin's paths serendipitously aligned on the Pacific Crest Trail when both were walking from Mexico to Canada, separately and alone—both using thru-hiking in hopes of escaping their pasts. Both sought to redefine themselves beneath the stars. By the time they made it to the snowy Cascade Range of British Columbia—the trail's end—Aspen and Justin were in love. Embarking on a new pilgrimage the next summer, they returned to those same mossy mountains where they'd met, and they married. They built a world together, three years of a

happy marriage. Until a cold November morning, when, after kissing Aspen goodbye, Justin left to attend the funeral of a close friend. He never came back. As days became weeks, her husband's inexplicable absence left Aspen unmoored. Shock, grief, fear, and anger battled for control—but nothing prepared her for the disarming truth. A revelation that would lead Aspen to reassess not only her own life but that of the disappeared as well. The result is a brave and inspiring memoir of secrets kept and unearthed, of a vanishing that became a gift: a woman's empowering reclamation of unmitigated purpose in the surreal wake of mystifying loss.

The Tree Ogham Birlinn

A Reader for Navigating the Depths of Our Lives The Universe holds us and tosses us about, only to hold us again. With *Things That Join the Sea and the Sky*, Mark Nepo brings us a compelling treasury of short prose reflections to turn to when struggling to keep our heads above water, and to breathe into all of our sorrows and joys. Inspired by his own journal writing across 15 years, this book shares with us some of Mark's most personal work. Many passages arise from accounts of his own life events—moments of "sinking and being lifted"—and the insights they yielded. Through these passages, we're encouraged to navigate our own currents of sea and sky, and to discover something fundamental yet elusive: How, simply, to be here. To be enjoyed in many ways—individually, by topic, or as an unfolding sequence—*Things That Join the Sea and the Sky* presents 145 contemplations gathered into 17 themes, each intended to illuminate specific situations. The themes include: *Unraveling Our Fear*, *Beyond What Goes Wrong*, *The Gift of Deepening*, *The Practice of Relationship*, *What Holds Us Up*, *Right-Sizing Our Pain*, *The Reach of Kindness*, *Burning Off What's Unnecessary*, *How We Make Our Way* and many more. For those interested in either beginning or expanding their own journaling explorations, this reader also provides a guide to the practice of daily writing, with 100 compelling questions to get us started. "Joy is the sea that holds all," writes Mark, "the Unity of Being where feelings don't separate, but surface like waves to remind us we are alive." Here, he helps us swim in those waters until we are held in the mystery of their buoyancy.

Michigan Trees, Revised and Updated

Bloomsbury Publishing USA

With the aid of 40 maps based on new research and stunning color photographs, a noted conservation advocate describes

the small fraction of wild forests that remain intact.

Fruitless Fall North Country Books

Combining a fresh examination of Jesus' ministry with the insights of the best recent discussions of leadership, Leighton Ford challenges readers to become transformational leaders on the job, in the church and in the public arena. Includes a study guide.

Girl in the Woods Portland : Timber Press

Many people will remember that Rachel Carson predicted a silent spring, but she also warned of a fruitless fall, a time with no pollination and no fruit. The fruitless fall nearly became a reality when, in 2007, beekeepers watched thirty billion bees mysteriously die. And they continue to disappear. The remaining pollinators, essential to the cultivation of a third of American crops, are now trucked across the country and flown around the world, pushing them ever closer to collapse. *Fruitless Fall* does more than just highlight this growing agricultural catastrophe. It emphasizes the miracle of flowering plants and their pollination partners, and urges readers not to take the abundance of our Earth for granted. A new afterword by the author tracks the most recent developments in this ongoing crisis.

Aspen Lerner Publications

Information about the biology, ecology, and management of quaking aspen on the mountains and plateaus of the interior western United States, and to a lesser extent, Canada, is summarized and discussed. The biology of aspen as a tree species, community relationships in the aspen ecosystem, environments, and factors affecting aspen forests are reviewed. The resources available within and from the aspen forest type, and their past and potential uses are examined. Silvicultural methods and other approaches to managing aspen for various resources and uses are presented.

The Personality of Jesus John Wiley & Sons

A examination of time-tested methods used by artists since the Renaissance to make realistic pictures of imagined things.

Be a Friend to Trees Capstone

Describes over 300 of the author's favorite trees and shrubs, all selected for their size, shape, seasonal color, and hardiness. Includes: notes on the best features of each species; what tree or shrub is appropriate for a specific location; how to plant; soil, moisture and sunlight requirements; year-round maintenance; and more!

The Study of Plants in a Whole New Light

"Matt Candeias succeeds in evoking the

wonder of plants with wit and wisdom.”
 —James T. Costa, PhD, executive director, Highlands Biological Station and author of Darwin's Backyard #1 New Release in Nature & Ecology, Plants, Botany, Horticulture, Trees, Biological Sciences, and Nature Writing & Essays In his debut book, internationally-recognized blogger and podcaster Matt Candeias celebrates the nature of plants and the extraordinary world of plant organisms. A botanist's defense. Since his early days of plant restoration, this amateur plant scientist has been enchanted with flora and the greater environmental ecology of the planet. Now, he looks at the study of plants through the lens of his ever-growing houseplant collection. Using gardening, houseplants, and examples of plants around you, In Defense of Plants changes your relationship with the world from the comfort of your windowsill. The ruthless, horny, and wonderful nature of plants. Understand how plants evolve and live on Earth with a never-before-seen look into their daily drama. Inside, Candeias explores the incredible ways plants live, fight, have sex, and conquer new territory. Whether a blossoming botanist or a professional plant scientist, In Defense of Plants is for anyone who sees plants as more than just static backdrops to more charismatic life forms. In this easily accessible introduction to the incredible world of plants, you'll find: • Fantastic botanical histories and plant symbolism • Passionate stories of flora diversity and scientific names of plant organisms • Personal tales of plantsman discovery through the study of plants If you enjoyed books like The Botany of Desire, What a Plant Knows, or The Soul of an Octopus, then you'll love In Defense of Plants.
The Last Bear Westcliffe Publishers
 "Young people need someone who is crazy about them." - Walter Brueggemann
 "Originally authored by Francis Clark a hundred years ago, Ashley Denton has overhauled the first writing, taking care to update and revise the text to make it more readable for a modern audience of young people. The book will be especially helpful to youth pastors, student ministry leaders and parents of young people." - Robert E. Coleman (Author of Master Plan of Evangelism) "Francis Clark believed that Jesus was the embodiment of everything that young people longed for. The challenge of every generation is simply to give young people an accurate picture of Jesus Christ. Clark believed that if young

people could just see the winsome personality of Christ, they would naturally be drawn to him, like a magnet is to metal." -Ashley Denton
Imaginative Realism Big Earth Publishing
 The only book that brings together: an authoritative, stunningly illustrated field guide; a how-to book for identifying, collecting, and reserving plants; the fascinating story of the legends and lore of medicinal plants; and a do-it-yourself guide to planting and using herbs in cooking, cosmetics, and health. Illustrated.
Sanctuaries in the Snow Atria Books
 Presents profiles of 650 species and varieties and over five hundred cultivars, with text and photographs of flowers and fruit, native and adaptive range, culture, problems, and best seasonal features.
Your Blue Is Not My Blue InterVarsity Press
 Jack Turner grew up with an image of the Tetons engraved in his mind. As a young man, he climbed the peaks of this singular range with basic climbing gear and friends. Later in life, he led treks in India, Pakistan, Nepal, China, Tibet, and Peru, but he always returned to the mountains of his youth: the Tetons. Teewinot is his ode to forty years in the mountains that he loves. this is a book about a mountain range, its climbs, its weather, and the glory of the wild. It is also about a small group of climbers-nomads who inhabit the Teton Range each summer, and who know it as intimately as it will ever be known. Teewinot is a remarkable account of what it is like to live and work in these spectacular mountains. It has something for everyone-spellbinding accounts of dangerous and deadly climbs, unbridled awe at the beauty of nature, and an extreme passion for the environmental issues facing America today. In this series of recollections, one of America's most beautiful national parks comes alive with beauty, mystery, and power.
New England Wildlife Texas A&M University Press
 Winner, 2019 National Cowboy and Western Heritage Museum Western Heritage Award for the Best Nonfiction Book Winner, 2019 Colorado Book Awards History Category, sponsored by Colorado Center for the Book In The Woolly West, historian Andrew Gulliford describes the sheep industry's place in the history of Colorado and the American West. Tales of cowboys and cattlemen dominate western history—and even more so in popular

culture. But in the competition for grazing lands, the sheep industry was as integral to the history of the American West as any trail drive. With vivid, elegant, and reflective prose, Gulliford explores the origins of sheep grazing in the region, the often-violent conflicts between the sheep and cattle industries, the creation of national forests, and ultimately the segmenting of grazing allotments with the passage of the Taylor Grazing Act of 1934. Deeper into the twentieth century, Gulliford grapples with the challenges of ecological change and the politics of immigrant labor. And in the present day, as the public lands of the West are increasingly used for recreation, conflicts between hikers and dogs guarding flocks are again putting the sheep industry on the defensive. Between each chapter, Gulliford weaves an account of his personal interaction with what he calls the "sheepscape"—that is, the shepherders' landscape itself. Here he visits with Peruvian immigrant herders and Mormon families who have grazed sheep for generations, explores delicately balanced stone cairns assembled by shepherds now long gone, and ponders the meaning of arborglyphs carved into unending aspen forests. The Woolly West is the first book in decades devoted to the sheep industry and breaks new ground in the history of the Colorado Basque, Greek, and Hispano shepherding families whose ranching legacies continue to the present day.
The Great Wood Little A
 The Great Wood of Caledon - the historic native forest of Highland Scotland - has a reputation as potent and misleading as the wolves that ruled it. The popular image is of an impassable, sun-snuffing shroud, a Highlandwide jungle infested by wolf, lynx, bear, beaver, wild white cattle, wild boar, and wilder painted men. Jim Crumley shines a light into the darker corners of the Great Wood, to re-evaluate some of the questionable elements of its reputation, and to assess the possibilities of its partial resurrection into something like a national forest. The book threads a path among relict strongholds of native woodland, beginning with a soliloquy by the Fortingall Yew, the one tree in Scotland that can say of the hey-day of the Great Wood 5,000 years ago: 'I was there.' The journey is enriched by vivid wildlife encounters, a passionate and poetic account that binds the slow dereliction of the past to an optimistic future.
