Life in Code Simon & Schuster

The never-more-necessary return of one of our most vital and eloquent voices on technology and culture, the author of the seminal *Close to the Machine* The last twenty years have brought us the rise of the internet, the development of artificial intelligence, the ubiquity of once unimaginably powerful computers, and the thorough transformation of our economy and society. Through it all, Ellen Ullman lived and worked inside that rising culture of technology, and in *Life in Code* she tells the continuing story of the changes it wrought with a unique, expert perspective. When Ellen Ullman moved to San Francisco in the early 1970s and went on to become a computer programmer, she was joining a small, idealistic, and almost exclusively male cadre that aspired to genuinely change the world. In 1997 Ullman wrote *Close to the Machine*, the now classic and still

definitive account of life as a coder at the birth of what would be a sweeping technological, cultural, and financial revolution. Twenty years later, the story Ullman recounts is neither one of unbridled triumph nor a nostalgic denial of progress. It is necessarily the story of digital technology's loss of innocence as it entered the cultural mainstream, and it is a personal reckoning with all that has changed, and so much that hasn't. *Life in Code* is an essential text toward our understanding of the last twenty years—and the next twenty.

A practical guide to how we can positively adapt to a changing world, from the internationally bestselling authors of *The 100-Year Life* 'The London Business School professors Andrew J. Scott and Lynda Gratton have been predicting how society must adapt for years. Now they have a post-pandemic road map for us all' Sunday Times Smart new technologies. Longer, healthier lives. Human progress has risen to great heights, but at the same time it has prompted anxiety about where we're heading. Are our jobs under threat? If we live to 100, will we ever really stop working? And how will this change the way we love, manage and learn from others? One thing is clear: advances in technology have not been matched by the necessary innovation to our social structures. In our era of unprecedented change, we haven't yet discovered new ways of living. Drawing from the fields of economics and psychology, Andrew J. Scott and Lynda Gratton offer a simple framework based on three fundamental principles (Narrate, Explore and Relate) to give you the tools to navigate the challenges ahead. Both a personal road-map and a primer for governments, corporations and colleges, *The New Long Life* is the essential guide to a longer, smarter, happier life. 'Wonderful . . . This thought-provoking book is a must-read' Daron Acemoglu, author of *Why Nations Fail* 'This thoughtful book explores how we can reimagine our days and our societies to make our lives better – not just longer' Adam Grant, New York Times bestselling author of *Originals* and *Give and Take* 'Stimulating, insightful and inspirational' Linda Yueh, author of *The Great Economists* 'This important book will help reframe the global debate about how to help every citizen to flourish' Matt Hancock, UK Secretary of State for Health and Social Care

A New York Times Book Review Editors' Choice. Long-listed for the Andrew Carnegie Medal for Excellence. Named a Best Book of 2018 by Esquire and Foreign Policy. An Amazon Best Book of November, the Guardian Bookshop Book of November, and one of the Evening Standard's Books to Read in November "Now, thanks to Hilsum's deeply reported and passionately written book, [Marie Colvin] has the full accounting that she deserves." --Joshua Hammer, *The New York Times* The inspiring and devastating biography of Marie Colvin, the foremost war reporter of her generation, who was killed in Syria in 2012, and whose life story also forms the basis of the feature film *A Private War*, starring Rosamund Pike as Colvin. When Marie Colvin was killed in an artillery attack in Homs, Syria, in 2012, at age fifty-six, the world lost a fearless and iconoclastic war correspondent who covered the most significant global calamities of her lifetime. In *Extremis*, written by her fellow reporter Lindsey Hilsum, is a thrilling investigation into Colvin's epic life and tragic death based on exclusive access to her intimate diaries from age thirteen to her death, interviews with people from every corner of her life, and impeccable research. After growing up in a middle-class Catholic family on Long Island, Colvin studied with the legendary journalist John Hersey at Yale, and eventually started working for *The Sunday Times* of London, where she gained a reputation for bravery and compassion as she told the stories of victims of the major conflicts of our time. She lost sight in one eye while in Sri Lanka covering the civil war, interviewed Gaddafi and Arafat many times, and repeatedly risked her life covering conflicts in Chechnya, East Timor, Kosovo, and the Middle East. Colvin lived her personal life in extremis, too: bold, driven, and complex, she was married twice, took many lovers, drank and smoked, and rejected society's expectations for women. Despite PTSD, she refused to give up reporting. Like her hero Martha Gellhorn, Colvin was committed to bearing witness to the horrifying truths of war, and to shining a light on the profound suffering of ordinary people caught in the midst of conflict. Lindsey Hilsum's *In Extremis* is a devastating and revelatory biography of one of the greatest war correspondents of

her generation.

The editors of the Philosophy and Medicine series recognize with gratitude the foresight, understanding, hard labor, and patience of Prof. Kazumasa Hoshino. It is his perseverance that has made this volume a reality. It was his faith in ideas that brought together a cluster of scholars in Tokyo on September 2-4, 1994, at Sophia University for a U. S. -Japan Bioethics Congress. With the support of the Foundation for Advancement of International Science, the Japan Foundation Center for Global Partnership, the Foundation of Thanatology, the Japanese Center for Quality of Life Studies, and Sophia University, scholars from Canada, Germany, Japan, and the United States were able to explore the differences and similarities in their approaches to bioethics and health care policy. That conference first produced a volume through Shibunkaku Publishers of Kyoto that appeared in 1995 in Japanese: *The Dignity of Death*, edited by Kazumasa Hoshino. Selections from those materials have been reworked for an English audience and now appear, along with new essays, in this volume. The field of comparative bioethics is only in its infancy. We are deeply grateful to Prof. Kazumasa Hoshino, one of the fathers of Japanese bioethics, for having made this volume possible. H. Tristram Engelhardt, Jr. Stuart F. Spicker VII ACKNOWLEDGEMENTS This volume's editors and Kluwer Academic Publishers wish to thank Shibunkaku Press, Kyoto, Japan, for permission to publish, without charge, essays derived from the U. In this unprecedented survey of British cinema from the 1930s to the New Wave of the 1960s, Marcia Landy explores how cinematic representation and social history converge. Landy focuses on the genre film, a product of British mass culture often dismissed by critics as "unrealistic," showing that in England such cinema subtly dramatized unresolved cultural conflicts and was, in fact, more popular than critics have claimed. Her discussion covers hundreds of works—including historical films, films of empire, war films, melodrama, comedy, science-fiction, horror, and social problem films—and reveals their relation to changing attitudes toward class, race, national identity, sexuality, and gender. Landy begins by describing the status and value of genre theory, then provides a history of British film production that illuminates the politics and personalities connected with the major studios. In vivid accounts of the films within each genre, she analyzes styles, codes, and conventions to show how the films negotiate history, fantasy, and lived experience. Throughout Landy creates a dynamic sense of genre and of how the genres shape, not merely reflect, cultural conflicts. Originally published in 1991. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

A vision—and detailed road map to power—for a new party that will champion America's rational center. From debt ceiling standoffs to single-digit Congress approval ratings, America's political system has never been more polarized—or paralyzed—than it is today. As best-selling author and public policy expert Charles Wheelan writes, now is the time for a pragmatic Centrist party that will identify and embrace the best Democratic and Republican ideals, moving us forward on the most urgent issues for our nation. Wheelan—who not only lectures on public policy but practices it as well (he ran unsuccessfully for Congress in 2009)—brings even more than his usual wit and clarity of vision to *The Centrist Manifesto*. He outlines a realistic ground game that could net at least five Centrist senators from New England, the Midwest, and elsewhere. With the power to deny a red or blue Senate majority, committed Centrists could take the first step toward giving voice and power to America's largest, and most rational, voting bloc: the center.

'This extraordinarily lucid book demonstrates that women from all walks of life get the short end of the stick because of their gender. From welfare mothers to corporate executives, Albelda and Tilly show and why the powers-that-be benefit from scapegoating and marginalizing women.' Professor Mimi Abramowitz, author, *Regulating the Lives of Women* A cogent analysis of the economic and social realities for women in the United States, across class lines. In an age when the right wing manipulates the dialogue around women's issues to separate middle- and upper-class women from their poorer sisters this book's facts, figures, and analysis provide a much needed antidote.

This collection offers an expansive, multiplatform exploration of the rapidly-expanding area of motion design and motion graphics, taking into account both theoretical questions and creative professional practice. Spanning interaction design, product interfaces, kinetic data visualizations, typography, TV and film title design, brand building, narrative storytelling, history, exhibits and environments, editors R. Brian Stone and Leah Wahlin offer an interdisciplinary range of academic essays and professional interviews that together form a dialogue between motion design theory and professional practice. Written for both those critically engaged with motion design as well as those working or aspiring to work professionally in the field, the book features a range of international contributors and interviews with some of the best-known designers in the field, including Kyle Cooper, Karin Fong, and Daniel Alenquer. *The Theory and Practice of Motion Design* seeks to illuminate the diverse, interdisciplinary field of motion design by offering a structured examination of how motion design has evolved, what forces define our current understanding and implementation of motion design, and how we can plan for and imagine the future of motion design as it unfolds.

Zero Dark Thirty meets *The Social Network* in this “clever...gritty” (Ken Liu, author of *The Grace of Kings*) science fiction thriller about artificial intelligence, sentience, and labor rights in a near future dominated by the gig economy—from Hugo Award nominee S.B. Divya. Welga Ramirez, executive bodyguard and ex-special forces, is about to retire early when her client is killed in front

of her. It's, 2095 and people don't usually die from violence. Humanity is entirely dependent on pills that not only help them stay alive but allow them to compete with artificial intelligence in an increasingly competitive gig economy. Daily doses protect against designer diseases, flow enhances focus, zips and buffs enhance physical strength and speed, and juvers speed the healing process. All that changes when Welga's client is killed by The Machinehood, a new and mysterious terrorist group that has simultaneously attacked several major pill funders. The Machinehood operatives seem to be part human, part machine, something the world has never seen. They issue an ultimatum: stop all pill production in one week. Global panic ensues as pill production slows and many become ill. Thousands destroy their bots in fear of a strong AI takeover. But the US government believes the Machinehood is a cover for an old enemy. One that Welga is uniquely qualified to fight. Welga, determined to take down the Machinehood, is pulled back into intelligence work by the government that betrayed her. But who are the Machinehood, and what do they really want? A “fantastic, big-idea thriller” (Malka Older, Hugo Award finalist for *The Centenal Cycle* series) that asks: if we won't see machines as human, will we instead see humans as machines?
