Opportunity Cost Problems And Solutions
 The production possibilities curve (PPC) is a model used in economics to illustrate tradeoffs, scarcity, opportunity costs, efficiency, inefficiency, and economic growth. Opportunity cost and the PPC (practice) | Khan Academy
 With the same amount of resources, Country A can produce 25 tons of chicken or 50 tons of wheat. What is Country A's opportunity cost of producing 1 ton of wheat?
 1. Assuming there are only two countries, Country A can produce 10 tons of wheat or 20 tons of rice, while Country B can produce 5 tons of wheat or 15 tons of rice.
 Quiz & Worksheet - Calculating Opportunity Cost | Study.com
 Since, Opportunity Cost = Cost of Selected Alternative - Cost of Next Best Alternative Therefore, Opportunity Cost = $-38,000 - 45,000 = -83,000$ Hence, his opportunity cost not only includes the cost his Desired Alternative would incur but also the value of the Next Best Alternative which he gives up.
 Opportunity Cost Examples - WealthHow
 Opportunity Cost problem. College tuition and books cost \$10,000 annually. If he went to college, he would have to live near the college where the average monthly rent would be \$700. If he worked, he could make \$30,000 annually and would live in a less expensive area where the average monthly rent would be \$500.
 Opportunity Cost problem | Wyzant Ask An Expert
 So, you're planning for your lessons for the start of the new term (because teachers do not take 6 weeks off during the summer, do they?) and your first topic is the Economic Problem and opportunity cost. Of course, what makes this year different is that the Economics A Level teacher is now thinking about the use of quantitative methods all of the time (aren't you?).
 Opportunity Cost - Some Numerical Examples as a ... - tutor2u
 Notice anything? You are right, the opportunity costs of the different goods are inverses of each other, meaning that if the opportunity cost of one good is 2, the opportunity cost for the other is $\frac{1}{2}$. If it is 3 for one, it is $\frac{1}{3}$ for the other. If 5 for one, $\frac{1}{5}$ for the other and so on.
 Calculating the opportunity cost in a gains from trade ...
 ECON 1101 - Midterm #2 Practice Problems Solutions Question #1
 Suppose that there is a small country known as Econland. Now let's open up Econland to the world economy. Suppose the world price of widgets is \$2. Since we are assuming that Econland is small relative to the world market, its trade policy will have no effect on the world price.
 ECON 1101 - Midterm #2 Practice Problems Solutions Question #1
 If you ask Adam to make posters, the opportunity cost of each poster is 400 entries. In the case of Becci, each poster costs $1200:2 = 600$ entries. If Cliff switches to making posters, then each poster costs your team $900:3 = 300$ entries. The last option is the most attractive, so Cliff should be the first who is assigned to do the posters.
 c.
 EC 200 Practice Problems - Opportunity Cost
 (a) opportunity costs are always positive. (b) resources are not equally well suited to the production of all goods and services. (c) the problem of scarcity is ever-present. (d) producing more of one good always entails producing less of another.
 Quiz on the PPC, Opportunity Cost, and the Gains from Trade
 Generally, opportunity costs involve tradeoffs associated with economic choices. Specifically the opportunity cost is the value of the best available alternative (that you have given up).
 How to calculate opportunity costs
 Practice Quiz 1 - Fall 11 with ANSWERS
 1. Using the table given below, what is the opportunity cost per unit of increasing leisure from 0 to 5 hours? GRADE AVERAGE HOURS OF LEISURE
 100 0 90 3 80 5 A. 80 points B. 20 points C.* 4 points D. $5/20 = .25$ points
 2. Practice Quiz 1 - Fall 11 with ANSWERS
 Problem 10: Present value discounted monthly. What is the present value of an offer of \$15,000 one year from now if the opportunity cost of capital (discount rate) is 12% per year nominal annual rate compounded monthly? Solution: $15,000 / (1 + 0.12/12)^{1*12}$.

Answer: \$13,311.74
