In a campaign for state or
local office these days,
you're as likely today to
hear accusations that an
opponent advanced

Obamacare or supported Donald Trump as you are to hear about issues affecting the state or local community. This is because American political behavior has become substantially more nationalized. American voters are far more engaged with and knowledgeable about what's happening in Washington, DC, than in similar messages whether they are in the South, the Northeast, or the Midwest. Gone are the days when all politics was local. With The Increasingly United

States, Daniel J. Hopkins explores this trend and its implications for the American political system. The change is significant in part because it works against a key rationale of America's federalist system, which was built on the assumption that citizens would be more strongly attached to their states and localities. It also has profound implications for how voters are represented. If voters are well informed about state politics, for example, the governor has an incentive to deliver

what voters—or at least a pivotal segment of them—want. But if voters are likely to back the same party in gubernatorial as in presidential elections irrespective of the governor's actions in office, governors may instead come to see their ambitions as tethered more closely to their status in the national party.

<p>Prentice Hall Super PACs American Government The passage of Citizens United by the Supreme Court in 2010 sparked a renewed debate about campaign spending by large political action committees, or Super PACs. Its ruling said that it is okay for corporations and labor unions to spend as much as they want in advertising and other methods to convince people to vote for or against a candidate. Among the most prized and revered democratic institutions are elections. Few other actions typify

what it means to participate in the democratic process in the same way that turning up, casting a ballot, and then having that ballot be part of determining who will control power has. Indeed, elections are at the center of what we view as democracy and much ink has been spilled in attempting to explain just how essential the electoral action is to democracy. In this volume our authors explore elections both from an understanding of the systems that govern

elections across both the developed and developing world, and from the perspective of the individual voter who participates in that system. Taken together these analyses provide an intriguing look into this core aspect of democracy. *Reports of Contested Election Cases in the Senate and House of Representatives of the Commonwealth of Massachusetts for the Years 1886-1890* Simon and Schuster
Since the election of Scott Walker, Wisconsin has

been seen as ground zero for debates about the appropriate role of government in the wake of the Great Recession. In a time of rising inequality, Walker not only survived a bitterly contested recall that brought thousands of protesters to Capitol Square, he was subsequently reelected. How could this happen? How is it that the very people who stand to benefit from strong government services not only vote against the candidates who support those services but are

vehemently against the very idea of big government? With *The Politics of Resentment*, Katherine J. Cramer uncovers an oft-overlooked piece of the puzzle: rural political consciousness and the resentment of the “liberal elite.” Rural voters are distrustful that politicians will respect the distinct values of their communities and allocate a fair share of resources. What can look like disagreements about basic political principles are therefore actually

rooted in something even more fundamental: who we are as people and how closely a candidate’s social identity matches our own. Using Scott Walker and Wisconsin’s prominent and protracted debate about the appropriate role of government, Cramer illuminates the contours of rural consciousness, showing how place-based identities profoundly influence how people understand politics, regardless of whether urban politicians and their supporters really do

shortchange or look down on those living in the country. The Politics of Resentment shows that rural resentment—no less than partisanship, race, or class—plays a major role in dividing America against itself.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer

malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship

between you and your clients, colleagues and the courts.

Charles Maier, one of the most prominent contemporary scholars of European history, published *Recasting Bourgeois Europe* as his first book in 1975. Based on extensive archival research, the book examines how European societies progressed from a moment of social

vulnerability to one of political and economic stabilization. Arguing that a common trajectory calls for a multi country analysis, Maier provides a comparative history of three European nations and argues that they did not simply return to a prewar status quo, but achieved a new balance of state authority and interest group representation. While most previous accounts presented the decade as a prelude to the

Depression and dictatorships, Maier suggests that the stabilization of the 1920s, vulnerable as it was, foreshadowed the more enduring political stability achieved after World War II. The immense and ambitious scope of this book, its ability to follow diverse histories in detail, and its effort to explain stabilization—and not just revolution or breakdown—have made it a classic of European history.
