RANDOLPH AMY

Congressional Record Springer
Advertising expenditure data across
multiple forms of media, including:
consumer magazines, Sunday
magazines, newspapers, outdoor,
network television, spot television,
syndicated television, cable television,
network radio, and national spot radio.

Lists brands alphabetically and shows
total expenditures, media used, parent
company and PIB classification for each
brand. Also included in this report are
industry class totals and rankings of the
top 100 companies in each of the media.

The Annual Asian Semantic Web
Conference is one of the largest regional
events in Asia with focused topics
related to the Semantic Web. With the

decade-round endeavor of Semantic Web believers, researchers and practitioners, the Semantic Web has made remarkable progress recently. It has raised significant attention from US and UK governments, as well as the European Commission who are willing to deploy Semantic Web technologies to enhance the transparency of eGovernment. The Linked Open Data initiative is on its way to convert the current document Web into a data Web and to further enabling various data and service mashups. The fast adoption of Semantic Web technologies in medical and life sciences has created impressive showcases to the world. All these efforts are a crucial step toward enabling the take-off and the success of the Semantic Web. The First Asian Semantic Web

Conference was successfully held in China in 2006. With the following editions in Korea in 2007 and Thailand in 2008, it fostered a regional forum for connecting researchers and triggering innovations. This year, the 4th Asian Semantic Web Conference was held in Shanghai, China. We received 63 submissions from Asia, Europe, and North America, and 25 papers were accepted (the acceptance rate is around 40%). Each submission was reviewed by at least three members of the Program Committee. The Chairs moderated the discussion of conflict reviews or invited external reviewers to reach the final decisions.
