ONE OF THE MOST LOVED NOVELS OF THE DECADE. A long-lost book reappears, mysteriously connecting an old man searching for his son and a girl seeking a cure for her widowed mother's loneliness. Leo Gursky taps his radiator each evening to let his upstairs neighbor know he's still alive. But it wasn't always like this: in the Polish village of his youth, he fell in love and wrote a book...Sixty years later and half a world away, fourteen-year-old Alma, who was named after a character in that book, undertakes an adventure to find her namesake and save her family. With virtuosic skill and soaring imaginative power, Nicole Krauss gradually draws these stories together toward a climax of "extraordinary depth and beauty" (Newsday).

Philosophy begins with questions about the nature of reality and how we should live. These were the concerns of Socrates, who spent his days in the ancient Athenian marketplace asking awkward questions, disconcerting the people he met by showing them how little they genuinely understood. This engaging book introduces the great thinkers in Western philosophy and explores their most compelling ideas about the world and how best to live in it. In forty brief chapters, Nigel Warburton guides us on a chronological tour of the major ideas in the history of philosophy. He provides interesting and often quirky stories of the lives and deaths of thought-provoking philosophers from Socrates, who chose to die by hemlock poisoning rather than live on without the freedom to think for himself, to Peter Singer, who asks the disquieting philosophical and ethical questions that haunt our own times. Warburton not only makes philosophy accessible, he offers inspiration to think, argue, reason, and ask in the tradition of Socrates. A Little History of Philosophy presents the grand sweep of humanity's search for philosophical understanding and invites all to join in the discussion.

In 1964, less than one year into his tenure as publisher of the Bogalusa Daily News, New Orleans native Lou Major found himself guiding the newspaper through a turbulent period in the history of American civil rights. Bogalusa, Louisiana, became a flashpoint for clashes between African Americans

advocating for equal treatment and white residents who resisted this change, a conflict that generated an upsurge in activity by the Ku Klux Klan. Local members of the KKK stepped up acts of terror and intimidation directed against residents and institutions they perceived as sympathetic to civil rights efforts. During this turmoil, the Daily News took a public stand against the Klan and its platform of hatred and white supremacy. Against the Klan, Major's memoir of those years, recounts his attempts to balance the good of the community, the health of the newspaper, and the safety of his family. He provides an in-depth look at the stance the Daily News took in response to the city's civil rights struggles, including the many fiery editorials he penned condemning the KKK's actions and urging peaceful relations in Bogalusa. Major's richly detailed personal account offers a ground-level view of the challenges local journalists faced when covering civil rights campaigns in the Deep South and of the role played by the press in exposing the nefarious activities of hate groups such as the Klan.

This new edition of an established text provides a succinct and up-to-date historical overview of the story of English literature. Focusing on how writing both reflects and challenges the periods in which it is produced, John Peck and Martin Coyle combine close readings of key texts with recent critical thinking on the interaction of literary works and culture. Providing a lively introductory guide to English literature from Beowulf to the present day, the authors write in their characteristically lucid and accessible style. A true masterpiece of

clarity and compression, this is essential reading for undergraduate students coming across the vast areas of English literature for the first time and looking for a way of making critical sense of the texts being studied. In addition, the concise nature and narrative structure of this book makes it excellent reading for general readers. New to this Edition: - Revised chapter on twentieth century literature - Complete new chapter on twenty-first century literature - Updated Chronology and Further Reading section

For curious readers young and old, a rich and colorful history of religion from humanity's earliest days to our own contentious times In an era of hardening

religious attitudes and explosive religious violence, this book offers a welcome antidote. Richard Holloway retells the entire history of religion—from the dawn of religious belief to the twenty-first century—with deepest respect and a keen commitment to accuracy. Writing for those with faith and those without, and especially for young readers, he encourages curiosity and tolerance, accentuates nuance and mystery, and calmly restores a sense of the value of faith. Ranging far beyond the major world religions of Judaism, Islam, Christianity, Buddhism, and Hinduism, Holloway also examines where religious belief comes from, the search for meaning throughout history, today's fascinations with Scientology and creationism, religiously motivated violence, hostilities between religious people and secularists, and more. Holloway proves an empathic yet discerning guide to the enduring significance of faith and its power from ancient times to our own.

One of the world's most beloved and bestselling writers takes his ultimate journey -- into the most intriguing and intractable questions that science seeks to answer. In *A Walk in the Woods*, Bill Bryson trekked the Appalachian Trail -- well, most of it. In *In A Sunburned Country*, he confronted some of the most lethal wildlife Australia has to offer. Now, in his biggest book, he confronts his greatest challenge: to understand -- and, if possible, answer -- the oldest, biggest questions we have posed about the universe and ourselves. Taking as territory everything from the Big Bang to the rise of civilization, Bryson seeks to understand how we got from there being nothing at all to there being us. To that

end, he has attached himself to a host of the world's most advanced (and often obsessed) archaeologists, anthropologists, and mathematicians, travelling to their offices, laboratories, and field camps. He has read (or tried to read) their books, pestered them with questions, apprenticed himself to their powerful minds. *A Short History of Nearly Everything* is the record of this quest, and it is a sometimes profound, sometimes funny, and always supremely clear and entertaining adventure in the realms of human knowledge, as only Bill Bryson can render it. Science has never been more involving or entertaining.

The story of the Phantom of the Opera, a half-crazed musician hiding in the labyrinth of the famous Paris Opera House and creating a number of strange and mysterious events to further the career of a beautiful young singer, is today regarded as one of the most famous of all horror stories: widely mentioned in the same breath as *Frankenstein* and *Dracula*. Yet the fame of this novel is based almost entirely on the various film versions, while the original book has been largely ignored and is rarely in print. An Accelerated Reader® Title

*A Little History of Literature* Icon Books  
From Kevin Brockmeier, one of this generation's most inventive young writers, comes a striking new novel about death, life, and the mysterious place in between. *The City* is inhabited

by those who have departed Earth but are still remembered by the living. They will reside in this afterlife until they are completely forgotten. But the City is shrinking, and the residents clearing out. Some of the holdouts, like Luka Sims, who produces the City's only newspaper, are wondering what exactly is going on. Others, like Coleman Kinzler, believe it is the beginning of the end. Meanwhile, Laura Byrd is trapped in an Antarctic research station, her supplies are running low, her radio finds only static, and the power is failing. With little choice, Laura sets out across the ice to look for help, but time is running out. Kevin Brockmeier alternates these two storylines to create a lyrical and haunting story about love, loss and the power of memory.

How did a land and people of such immense diversity come together under a banner of freedom and equality to form one of the most remarkable nations in the world? Everyone from young adults to grandparents will be fascinated by the answers uncovered in James West Davidson's vividly told *A Little History of the United States*. In 300 fast-moving pages, Davidson guides his readers through 500 years, from the first contact between the two halves of the world to the rise of America as a superpower in an era of atomic perils and diminishing resources. In short, vivid chapters the book brings to life hundreds of individuals whose stories are part of the larger American story. Pilgrim William

Bradford stumbles into an Indian deer trap on his first day in America; Harriet Tubman lets loose a pair of chickens to divert attention from escaping slaves; the toddler Andrew Carnegie, later an ambitious industrial magnate, gobbles his oatmeal with a spoon in each hand. Such stories are riveting in themselves, but they also spark larger questions to ponder about freedom, equality, and unity in the context of a nation that is, and always has been, remarkably divided and diverse.

The thrilling history of archaeological adventure, with tales of danger, debate, audacious explorers, and astonishing discoveries around the globe What is archaeology? The word may bring to mind images of golden pharaohs and lost civilizations, or Neanderthal skulls and Ice Age cave art. Archaeology is all of these, but also far more: the only science to encompass the entire span of human history—more than three million years! This Little History tells the riveting stories of some of the great archaeologists and their amazing discoveries around the globe: ancient Egyptian tombs, Mayan ruins, the first colonial settlements at Jamestown, mysterious Stonehenge, the incredibly preserved Pompeii, and many, many more. In forty brief, exciting chapters, the book recounts archaeology's development from its eighteenth-century origins to its twenty-first-century technological advances, including remote sensing capabilities and satellite imagery techniques that have revolutionized the field. Shining light on the most intriguing events in the history of the field, this absolutely up-to-date book illuminates archaeology's controversies, discoveries, heroes and scoundrels, global sites, and newest

methods for curious readers of every age.

A thrilling journey through 100,000 years of art, from the origins of mark making to art's pivotal role in culture today Why did our ancestors make art? What did art mean to them and what does their art mean for us today? Why is art even important at all? Charlotte Mullins brings art to life by focusing on those who made it, from teenage prodigies to nonagenarians. This little history introduces us to overlooked artists, busts a few art history myths, and celebrates global networks of art, from Japan and India to South America and the Middle East. Mullins shows us the first artworks ever made and early masterpieces such as the Terracotta Army and Nok sculptures. She tells the story of the Renaissance, from Giotto to Michelangelo, and introduces us to subsequent leading artists such as Artemisia Gentileschi, Rembrandt, and Hokusai. Through the turbulence of the twentieth century, we see artists group together and break apart and meet trailblazers including Käthe Kollwitz, Pablo Picasso, Frida Kahlo, and Jacob Lawrence. More recently contemporary artists such as Ai Weiwei and Shirin Neshat create art as resistance as they address today's urgent issues. This extraordinary journey through 100,000 years celebrates art's crucial place in understanding our collective culture and history.

Politics affects us all and the same questions reverberate across history. Who should rule? Is property theft? What's mightier - the bullet or the ballot? Discover 80 of the world's greatest thinkers and their political big ideas that continue to shape our lives today. Humankind has always asked profound questions about how we can best govern ourselves and how rulers should behave. The Politics Book charts the development of long-running themes, such as attitudes to democracy and violence, developed by thinkers from Confucius in ancient China to Mahatma Gandhi in 20th-century India. Justice goes hand in hand with politics, and in this comprehensive guide, you can explore the championing of people's rights from the Magna Carta to Thomas Jefferson's Bill of Rights and Malcolm X's call to arms. Ideologies inevitably clash and The Politics Book takes you through the big ideas such as capitalism, communism, and fascism exploring their beginnings and social contexts in step-by-step diagrams and illustrations, with clear explanations that cut through the jargon. Filled with thought-provoking quotes from great thinkers such as Nietzsche, Karl Marx, and Mao Zedong, The Politics Book is a thought-provoking and unmissable read for both students and everyone interested in how the world of government and power works. Series Overview: Big Ideas Simply Explained series uses creative design and innovative graphics along with straightforward and engaging writing to make complex subjects easier to

understand. With over 7 million copies worldwide sold to date, these award-winning books provide just the information needed for students, families, or anyone interested in concise, thought-provoking refreshers on a single subject.

*Problems of Dostoevsky's Poetics* Yale University Press

No previous author has attempted a book such as this: a complete history of novels written in the English language, from the genre's seventeenth-century origins to the present day. In the spirit of Dr. Johnson's *Lives of the Poets*, acclaimed critic and scholar John Sutherland selects 294 writers whose works illustrate the best of every kind of fiction—from gothic, penny dreadful, and pornography to fantasy, romance, and high literature. Each author was chosen, Professor Sutherland explains, because

his or her books are well worth reading and are likely to remain so for at least another century. Sutherland presents these authors in chronological order, in each case deftly combining a lively and informative biographical sketch with an opinionated assessment of the writer's work. Taken together, these novelists provide both a history of the novel and a guide to its rich variety. Always entertaining, and sometimes shocking, Sutherland considers writers as diverse as Daniel Defoe, Henry James, James Joyce, Edgar Allan Poe, Virginia Woolf, Michael Crichton, Jeffrey Archer, and Jacqueline Susann. Written for all lovers of fiction, *Lives of the Novelists* succeeds both as introduction and re-introduction, as Sutherland presents favorite and familiar novelists in new ways and transforms the less favored and less familiar through his relentlessly fascinating readings.
