Motoring unmasks the forces that shape the American driving experience--commercial, aesthetic, cultural, mechanical--as it takes a timely look back at our historically unconditional love of motor travel. Focusing on recreational travel between 1900 and 1960, John A. Jakle and Keith A. Sculle cover dozens of topics related to drivers, cars, and highways and explain how they all converge to uphold that illusory notion of release and rejuvenation we call the "open road." Jakle and Sculle have collaborated on five previous books on the history, culture, and landscape of the American road. Here, with an emphasis on the driver's perspective, they discuss garages and gas stations, roadside tourist attractions, freeways and toll roads, truck stops, bus travel, the rise of the convenience store, and much more. All the while, the authors make us think about aspects of driving that are often taken for granted: how, for instance, the

many lodging and food options along our highways reinforce the connection between driving and "freedom" and how, by enabling greater speeds, highway engineers helped to stoke motorists' "blessed fantasy of flight." Although driving originally celebrated freedom and touted a common experience, it has increasingly become a highly regulated, isolated activity. The motive behind America's first embrace of the automobile--individual prerogative--still substantially obscures this reality. "Americans did not have the automobile imposed on them," say the authors. Jakle and Sculle ask why some of the early prophetic warnings about our car culture went unheeded and why the arguments of its promoters resonated so persuasively. Today, the automobile is implicated in any number of environmental, even social, problems. As the wisdom of our dependence on automobile travel has come into serious question, reassessment of how we first became that way is more important than ever. An Englishman travels to the Mid-Atlantic and make observations on social customs, religious observance (including commentary on the Shakers), race relations, and legal matters. A history of immigration to America, from speculation about the earliest immigrants to the present day. This fascinating and moving book brings to life the industrial and immigrant experience

which gave birth to Manchester in the nineteenth century and continued to shape the city's destiny well into the twentieth century. More than a hundred years ago, thousands of immigrants from Europe and Canada were drawn to the mills of Manchester by the promise of a better life. In stirring photographs and text, Manchester: The Mill and the Immigrant Experience examines the aspirations, the struggles, and the everyday adventures of Manchester's immigrant families. Reaffirming the power of photography to move and inform us, Manchester: The Mills and the Immigrant Experience creates a vivid picture of life during nearly a century of rapid industrial change. We join the bustle of Elm and Hanover Streets in the 1880s, witness children working at the mighty Amoskeag Manufacturing Company, enter a Greek coffeehouse in the early 1900s, get caught up in the bitter labor strikes of the 1920s, and meet unusual local figures such as the Hermit of Mosquito Pond. Winner of the Pulitzer Prize. A study of the last 100 years of American history. Located not far from the Statue of Liberty, Ellis Island played a major role in American history. More than 16 million immigrants entered the United States through Ellis Island between 1892 and 1954. This curriculum-based eBook discusses Ellis Island and what it was like to be an immigrant in America during the period in which it was open. Bolstered by extensive photographs and a chronology, Ellis Island and the Immigrant Experience is ideal for students writing reports. Historical survey of America's self-discovery in the years between the Revolution and the Civil War. This powerful, provocative survey is organized around the key issues of Afro-American history: Africa and slavery, family, religion, sex and racism, politics, economics, education, criminal justice, discrimination and protest movements, and black nationalism. What does becoming American have to do with becoming religious? Many immigrants become more religious after coming to the United States. Taiwanese are no different. Like many Asian immigrants to the United States, Taiwanese frequently convert to Christianity after immigrating. But Americanization is more than simply a process of Christianization. Most Taiwanese American Buddhists also say they converted only after arriving in the United States even

though Buddhism is a part of Taiwan's dominant religion. By examining the experiences of Christian and Buddhist Taiwanese Americans, Getting Saved in America tells "a story of how people become religious by becoming American, and how people become American by becoming religious." Carolyn Chen argues that many Taiwanese immigrants deal with the challenges of becoming American by becoming religious. Based on in-depth interviews with Taiwanese American Christians and Buddhists, and extensive ethnographic fieldwork at a Taiwanese Buddhist temple and a Taiwanese Christian church in Southern California, Getting Saved in America is the first book to compare how two religions influence the experiences of one immigrant group. By showing how religion transforms many immigrants into Americans, it sheds new light on the question of how immigrants become American. The American Dream is a popular concept. It is a celebrated mantra. But does it really exist? Even if it does, is it for everyone? The American experiment tells a different story. Examples abound of many for whom the American Dream is an empty rhetoric. Although America prides itself on liberal ideas of equity, social justice and equality for all, harnessing the potential benefits of the American Dream is far from true for many hardworking, educated Americans. Inasmuch as the American Dream may exist for some, white privilege, employment and educational discrimination, racism...may stand in the way of achieving one's fullest potential. This is compounded by the Eurocentric content of the American curriculum which denies equal representation to non-white Americans in the marketplace of ideas, reinforcing their sociopolitical and epistemic marginalization. "In a remarkably wide ranging and moving book Francis Kwarteng has provided us with one of the most honest and earnest assessments of what immigrants find in the United States. The book The America That I Didn't Know Existed reminds me of the complex reasons people are attracted to the American society and the disappointment that they find when they sometimes discover that what one reads about America is not truly the best way to know America. Kwarteng has lived, studied, and learned in America and he counts these experiences as blessings as anyone would who has

seen possibilities. However, this determined intellectual has shown us a path forward with acceptance and humanity. This riveting book has the making of an incredibly powerful drama as well." Molefi Kete Asante, author of Erasing Racism: The Survival of the American Nation "Francis Kwarteng's book recounts his personal journey to America by reliving the challenges and struggles he had to overcome to realize that the dream he once imagined was only a mirage. The author provides the rationale behind his decision to come to America and the subsequent disillusion with the gap between his aspirations and realities on American soil. Framed within the intellectual lens of Afrocentricity, Kwarteng exposes and critiques the prevailing dominance of Eurocentric constructs that systemically dehumanizes, and perforce disempowers, persons of African descent. The result of this is a readable, empowering page-turning memoir that will resonate with every African immigrant." Kwame Akonor is Associate Professor of Political Science at Seton Hall University (USA), founding director of the New York-based African Development Institute, and author of African Economic Institutions. Sorin argues that, from colonial times to the present, "acculturation" and not "assimilation" has best described the experience of Jewish Americans. Nine narratives by immigrants and their descendants illuminate the experience of becoming American. Contributors include Czeslaw Milosz, and Mario Puzo. Dream A World Anew is the stunning gift book accompanying the opening of the Smithsonian National Museum of African American History and Culture. It combines informative narratives from leading scholars, curators, and authors with objects from the museum's collection to present a thorough exploration of African American history and culture. The first half of the book bridges a major gap in our national memory by examining a wide arc of African American history, from Slavery, Reconstruction, the Harlem Renaissance, and the Great Migrations through Segregation, the Civil Rights Movement, and beyond. The second half of the book celebrates African American creativity and cultural expressions through art, dance, theater, and literature. Sidebars and profiles of influential figures--including Harriet Tubman, Robert Smalls,

Ida B. Wells, Mordecai Johnson, Louis Armstrong, Nina Simone, and many others--provide additional context and interest throughout the book. Dream a World Anew is a powerful book that provides an opportunity to explore and revel in African American history and culture, as well as the chance to see how central African American history is for all Americans. A stirring, witty, and poignant glimpse into the bewildering American immigrant experience from someone who has lived it. Hakakian's "love letter to the nation that took her in [is also] a timely reminder of what millions of human beings endure when they uproot their lives to become Americans by choice" (The Boston Globe). Into the maelstrom of unprecedented contemporary debates about immigrants in the United States, this perfectly timed book gives us a portrait of what the new immigrant experience in America is really like. Written as a "guide" for the newly arrived, and providing "practical information and advice," Roya Hakakian, an immigrant herself, reveals what those who settle here love about the country, what they miss about their homes, the cruelty of some Americans, and the unceasing generosity of others. She captures the texture of life in a new place in all its complexity, laying bare both its beauty and its darkness as she discusses race, sex, love, death, consumerism, and what it is like to be from a country that is in America's crosshairs. Her tenderly perceptive and surprisingly humorous account invites us to see ourselves as we appear to others, making it possible for us to rediscover our many American gifts through the perspective of the outsider. In shattering myths and embracing painful contradictions that are unique to this place, A Beginner's Guide to America is Hakakian's candid love letter to America. This second volume in "The Americans" trilogy deals with the crucial period of American history from the Revolution to the Civil War. Here we meet the people who shaped, and were shaped by, the American experience—the versatile New Englanders, the Transients and the Boosters. Winner of the Francis Parkman Prize. The Italian/American Experience represents a meaningful attempt to inform Italian Americans about their group's varied experiences in America. This collection of eleven works offers readers an in-depth view of Italian American culture and

heritage. Life in America: Identity and Everyday Experience is a fascinating collection of readings that explores how people negotiate identity in the United States today. Brings together readings that provide a thoroughly engaging and fascinating look at central issues of identity and what it means to be American. Explores the tension between identity and identification to help readers begin to understand how people creatively confront the perks and perils of identity in the United States. Offers a look at a wide range of subjects including: violence and video games, queer pilgrimages to San Francisco, Filipina critiques of "sleeping around," and the significance of "lowriders" in Hispano/Chicano culture. "Immigrant groups were not treated equally when they arrived in America... Compare and contrast immigrant experiences and how those experiences changed the United States. First- and second-generation immigrants to the US from all around the world collaborate with renowned photographer Wendy Ewald to create a stunning, surprising catalog of their experiences from A to Z. In a unique collaboration with photographer and educator Wendy Ewald, eighteen immigrant teenagers create an alphabet defining their experiences in pictures and words. Wendy helped the teenagers pose for and design the photographs, interviewing them along the way about their own journeys and perspectives. America Border Culture Dreamer presents Wendy and the students' poignant and powerful images and definitions along with their personal stories of change, hardship, and hope. Created in a collaboration with Al-Bustan Seeds of Culture, this book casts a new light on the crucial, under-heard voices of teenage immigrants themselves, making a vital contribution to the timely national conversation about immigration in America. *Confounding the Color Line is an essential, interdisciplinary introduction to the myriad relationships forged for centuries between Indians and Blacks in North America. Since the days of slavery, the lives and destinies of Indians and Blacks have been entwined—thrown together through circumstance, institutional design, or personal choice. Cultural sharing and intermarriage have resulted in complex identities for some members of Indian and Black communities today. The contributors to this volume examine the origins, history, various manifestations, and long-term consequences of the different connections that have been established between Indians and Blacks. Stimulating examples of a range of relations are offered, including the challenges faced by Cherokee freedmen, the lives of Afro-Indian whalers in New England, and the ways in which Indians and Africans interacted in Spanish colonial New Mexico. Special attention is given to slavery and its continuing legacy, both in the Old South and in Indian Territory. The intricate nature of modern Indian-Black relations is showcased through discussions of the ties between Black athletes and Indian mascots, the complex identities of Indians in southern New England, the problem of Indian identity within the African American community, and the way in which today's Lumbee Indians have creatively engaged with African American church music. At once informative and provocative, *Confounding the Color Line* sheds valuable light on a pivotal and not well understood relationship between these communities of color, which together and separately have affected, sometimes profoundly, the course of American history. *Paradise Lost* demonstrates the consequences to education, public services and political institutions in California of the increasing resort to the hyper-democracy of the ballot initiative process. *An American Experience* is one of the most insightful books published about life in 2018.
