Excerpt from Advanced English Grammar Through Composition The present book completes a course of English Grammar for schools according to the methods laid down in the Elementary English Grammar Through Composition, by the same author. The title explains the object in view. It is to treat Grammar, not as an end in itself, divorced from immediate utility, but as arising out of everyday forms of speech, and as giving practical help in their mastery and in the completeness of their study. In the Elementary Book, designed for pupils from 9 to 13 years old, the method of teaching through practice in oral composition was emphasised; in this Advanced Course chief stress is laid on completeness in the presentation of the subject. A preliminary Grammar Course, such as that in the Elementary Book of this series, is assumed to have been gone through already by those using the present book: and therefore the author has not hesitated, for the sake of brevity and completeness, to refer by anticipation to such well known points as the Plural when dealing with Abstract Nouns in Chapter II., or the Active Voice when dealing with the Tenses. Most of the Notes should be omitted in a first reading. A great step in advance towards efficiency in Grammar teaching has recently been taken by the laying down of a uniform grammatical terminology for all school languages by a Committee representing all the chief Associations interested in language teaching in schools. "REA: the test prep AP teachers recommend." Excerpt from Advanced English Grammar and Composition This book has been prepared especially for use in the intermediate and higher schools in the Philippine Islands. It presents a thorough study of the essentials of English Grammar and the elements of English Composition. The book is characterized by its use of the inductive method, the large number of illustrations, the extent and variety of application of each grammatical fact developed, the emphasis placed upon the verb and upon other features of special difficulty to the foreign learner of the language, and the development of the elements of composition with, and based upon, the topics in grammar. Exercises in word formation, also, are a valuable feature of the book, showing the relation of the more important parts of speech and the formation of important groups of words, and greatly aiding the pupil in learning and correctly using an extensive vocabulary. The book consists of three parts: Part I contains a brief review of the parts of speech and the elements of the sentence, with a variety of exercises in composition. Excerpt from Advanced English Grammar Through Composition The fact that most of those who will use this book will probably be studying one or more foreign languages, has caused more than usual attention to be paid to the points of most importance for that work, such as the Prepositions, the Cases, the Subjunctive Mood, and Clause constructions and their equivalents. The subject of Prosody has also been treated in considerable detail, as the author has found by experience that practically all pupils can attain considerable facility in versifying, and that such exercises are most useful for gaining command over language and for training the taste of the pupils at an age when paraphrasing, etc, are beginning to be outgrown. For this, however, some thing much more thorough than the usual treatment Of Prosody in Grammars is necessary, and this the author has endeavoured to supply. The Historical Sketch of the English Language contains sufficient anglo-saxon and Chaucerian grammar to serve as reference for the explanations of grammatical forms throughout the book; and the account of the Vocabulary and of Word Building will, it is hoped, be found sufficient and self-contained. A chapter on Figures of Speech has also been added, so that information and practice on all the subjects usually included under English Grammar may be found in a single text-book.
