Manuscript Inscriptions in Early English Printed Music Feb 07 2022 Who were the first owners of the music published in England in the sixteenth and early seventeenth centuries? Who went to 'the dwelling house of ... T. East, by Paules wharfe' and bought a copy of Byrd's Psalmes, sonets, & songs when it appeared in 1588? Who purchased a copy of Dowland's First booke of songs in 1597? What other books formed part of their music library? In this survey of surviving books of music published before 1640, David Greer has gleaned information about the books' early and subsequent owners by studying the traces they left in the books themselves: handwritten inscriptions, including names and other marks of ownership - even the scribbles and drawings a child of the family might put into a book left lying about. The result is a treasure trove of information about musical culture in early modern England. From inscriptions and marks of ownership Greer has been able to re-assemble early sets of partbooks, as well as collections of books once bound together. The search has also turned up new music. At a time when paper was expensive, new pieces were copied into blank spaces in printed books. In these jottings we find a 'hidden repertory' of music, some of it otherwise undiscovered music by known composers. In other cases, we see owners altering the words of songs, to suit new and personal purposes: a love-song in praise of Daphne becomes a heartfelt song to 'my Jesus'; and 'Faire Leonilla' becomes Ophelia (perhaps the first mention of this character in Hamlet outside the play itself). On a more practical level, the users of the music sometimes made corrections to printing errors, and there are indications that some of these were last-minute corrections made in the printing-house (a useful guide for the modern editor). The temptation to 'scribble in books' was as irresistible to some Elizabethans as it is to some of us today. In doing so they left us clues to their identity, how they kept their music, how they used it, and the multifarious ways in which it played a part in their lives.

Publications of the Colonial Society of Massachusetts Feb 24 2021 Primarily consists of: Transactions, v. 1, 3, 5-8, 10-14, 17-21, 24-28, 32, 34-35, 38, 42-43; and: Collections, v. 2, 4, 9, 15-16, 22-23, 29-31, 33, 36-37, 39-41; also includes lists of members.

Bibliography of Lewis Research Center Technical Publications Announced in 1977 Jan 18 2023 This compilation of abstracts describes and indexes over 780 technical reports resulting from the scientific and engineering work performed and managed by the Lewis Research Center in 1977. All the publications were announced in the 1977 issues of STAR (Scientific and Technical Aerospace Reports) and/or IAA (International Aerospace Abstracts). Documents cited include research reports, journal articles, conference presentations, patents and patent applications, and theses.

The Impact of New Technologies on the Quality of Life of People with Disabilities Mar 28 2021 This report analyses the impact of new technologies on the quality of life of people with disabilities, including consumer technology and, of course, assistive technology. It takes into account the different types of disability, covering not only physical and sensorial impairments, but also intellectual disabilities, mental illnesses and restrictions in social participation due to personal or environmental factors. The study gives examples of good practice and indicates the strengths, weaknesses, opportunities and threats of new technologies for enhancing the quality of life of disabled people. Proposals are made for such enhancement through legislation, service delivery, design, standardisation and market development.

Rapid Solidification Technology Jun 30 2021 Rapid solidification processing results in increased strength, and fracture and fatigue resistance of alloys, with concurrent improvements in mechanical, physical and chemical properties. This volume provides a systematic examination of this technology, including metallurgical aspects, processing methods, alloy design, and applications. Each chapter was prepared by a specialist for this volume. The text is well illustrated with more than 400 micrographs and schematics. More than 75 tables provide important

reference data.

General Aviation Inspection Aids May 18 2020 Includes annual summary and 11 supplements.

Transactions of the American Society of Mechanical Engineers Jan 06 2022 Vols. 2, 4-11, 62-68 include the Society's Membership list; v. 55-80 include the Journal of applied mechanics (also issued separately) as contributions from the Society's Applied Mechanics Division.

User Interfaces for All Aug 25 2023 User Interfaces for All is the first book dedicated to the issues of Universal Design and Universal Access in the field of Human-Computer Interaction (HCI). Universal Design (or Design for All) is an inclusive and proactive approach seeking to accommodate diversity in the users and usage contexts of interactive products, applications, and services, starting from the design phase of the development life cycle. The ongoing paradigm shift toward a knowledge-intensive information society is already bringing about radical changes in the way people work and interact with each other and with information. The requirement for Universal Design stems from the growing impact of the fusion of the emerging technologies, and from the different dimensions of diversity, which are intrinsic to the information society. This book unfolds the various aspects of this ongoing evolution from a variety of viewpoints. It's a collection of 30 chapters written by leading international authorities, affiliated with academic, research, and industrial organizations, and non-market institutions. The book provides a comprehensive overview of the state of the art in the field, and includes contributions from a variety of theoretical and applied disciplines and research themes. This book can also be used for teaching purposes in HCI courses at the undergraduate as well as graduate level. Students will be introduced to the human-, organizational-, and technology-oriented dimensions that call for a departure from traditional approaches to user interface development. Students will also get an overview of novel methods, techniques, tools, and frameworks for the design, implementation, and evaluation of user interfaces that are universally accessible and usable by the broadest possible end-user population. This comprehensive book is targeted to a broad readership, including HCI researchers, user interface designers, computer scientists, software engineers, ergonomists and usability engineers, Human Factors researchers and practitioners, organizational psychologists, system/product designers, sociologists, policy- and decision makers, scientists in government, industry and education, as well as assistive technology and rehabilitation experts.

Biennial Report of the Kansas State Board of Agriculture, to the Legislature of the State Aug 13 2022

"Containing the decennial census, for ..., illustrated; descriptive statements, statistics, maps, and general information relating to each county, and the geographical and topographical features of the state ..." (varies)

Food Additives Data Book Sep 02 2021 This major new reference work covers all the "must-have" technical data on food additives. Compiled by food industry experts with a proven track record of producing high quality reference work, this volume is the definitive resource for technologists in small, medium and large companies, and for workers in research, government and academic institutions. Coverage is of Preservatives, Enzymes, Gases, Nutritive additives, Emulsifiers, Flour additives, Acidulants, Sequestrants, Antioxidants, Flavour enhancers, Colour, Sweeteners, Polysaccharides, Solvents. Entries include information on: Function and Applications, Safety issues, International legal issues, Alternatives, Synonyms, Molecular Formula and mass, Alternative forms, Appearance, Boiling, melting, and flash points, density, purity, water content, solubility, Synergists, Antagonists, and more with full and easy-to-follow-up references.

Wind Tunnel/flight Data Correlation (u). Oct 23 2020 A program was conducted to obtain data, both steady state and dynamic, from wind tunnel models and full scale flight tests of the RA-5C aircraft. Data were acquired on 0.228 and 0.125 scale RA-5C inlet models and on a fully instrumented flight test RA-5C aircraft. Interim data reports presenting the data acquired during each test have been published. These data were utilized in this report to develop scaling techniques for correlating small scale model wind tunnel data with full scale flight data. Data presented

include duct steady state operating characteristics and pressure distributions in the inlet and at the engine face. Dynamic data are presented in the form of engine face turbulence contour plots, radial turbulence distributions and selected spectral data functions. Data are presented for variations of angle of attack, angle of yaw, Reynolds number, ramp angle, secondary flow rates and inlet diverter width. Brief descriptions of the model and test methods are also presented.

Luck's In My Corner Dec 25 2020 Luck's in My Corner is a comprehensive biography of one of the most compelling jazz musicians of the Swing Era, Oran "Hot Lips" Page. Page was the greatest of the Kansas City trumpeters, whose crackling, growling solos made him the go-to man during Count Basie's earliest days as a bandleader. Page went on to be a featured trumpeter with Artie Shaw, a star of New York's 52nd street, and a pioneer of the R & B scene of the 1950s. This book presents an in-depth chronology of Page's career, with special attention paid to the development of his trumpet style. Luck's in My Corner examines the life and music of a forgotten figure of the Swing Era and returns him to his rightful place as a leading light in the world of jazz. Todd Bryant Weeks has combined genealogical, musicological, discographical and historical research, resulting in a revealing and entertaining examination of a life that spanned major changes in American popular music. This book includes a new and complete discography by the author and dozens of unpublished photos.

Design, Specification and Verification of Interactive Systems '96 Jun 18 2020 Making systems easier to use implies an ever increasing complexity in managing communication between users and applications. Indeed an increasing part of the application code is devoted to the user interface portion. In order to manage this complexity, it is important to have tools, notations, and methodologies which support the designer's work during the refinement process from specification to implementation. Selected revised papers from the Eurographics workshop in Namur review the state of the art in this area, comparing the different existing approaches to this field in order to identify the principle requirements and the most suitable notations, and indicate the meaningful results which can be obtained from them.

The FLP Microsatellite Platform Jun 23 2023 This book represents the Flight Operations Manual for a reusable microsatellite platform – the "Future Low-cost Platform" (FLP), developed at the University of Stuttgart, Germany. It provides a basic insight on the onboard software functions, the core data handling system and on the power, communications, attitude control and thermal subsystem of the platform. Onboard failure detection, isolation and recovery functions are treated in detail. The platform is suited for satellites in the 50-150 kg class and is baseline of the microsatellite "Flying Laptop" from the University. The book covers the essential information for ground operators to controls an FLP-based satellite applying international command and control standards (CCSDS and ECSS PUS). Furthermore it provides an overview on the Flight Control Center in Stuttgart and on the link to the German Space Agency DLR Ground Station which is used for early mission phases. Flight procedure and mission planning chapters complement the book.
