A timely look at how to build a more sustainable and regenerative business that is built to last Buying a new home can be an expensive endeavor. Many people dream of building their own home but mistakenly believe that doing so is not cost effective. However, you can save 20 to 40 percent or more by building your own home. In The Complete Guide to Building Your Own Home and Saving Thousands on Your New House you will discover that your dream can become reality. From basic planning to construction methods, this new book will take

you through all the steps of building your own home. You will learn how to: choose a site, draw up a construction time line, apply for construction loans and financing, obtain essential insurance information, buy or prepare inexpensive plans, find and negotiate with subcontractors, comply with building codes, select features and fixtures, choose the style of the house, decide on the size of the rooms, and get building permits. You will learn about building materials and foundations, floors, walls, paint, windows, decks, garage doors, roofing, flashings, chimneys, plumbing, wiring, ceilings, floors, railings, and attics. In addition, you will learn how to design a home that will meet your needs, perform constructions tasks safely, and build amenities. This book will inform you about common problems to watch for, including foundation, roofing, walls, stairs, sidewalks, driveways, heating and cooling, electrical capacity, and wiring. This book will detail money-saving options and environmentally friendly techniques, while at the same time allowing you to monitor the quality of the materials and the workmanship,

fine-tune the design, and make sure the results are exactly what you had envisioned. Atlantic Publishing is a small, independent publishing company based in Ocala, Florida. Founded over twenty years ago in the company president's garage, Atlantic Publishing has grown to become a renowned resource for non-fiction books. Today, over 450 titles are in print covering subjects such as small business, healthy living, management, finance, careers, and real estate. Atlantic Publishing prides itself on producing award winning, high-quality manuals that give readers up-to-date, pertinent information, real-world examples, and case studies with expert advice. Every book has resources, contact information, and web sites of the products or companies discussed. This book presents 18 in-depth case studies of net zero energy buildings—low-energy building that generate as much energy as they consume over the course of a year—for a range of project types, sizes, and U.S. climate zones. Each case study describes the owner's goals, the design and construction process, design strategies, measurement and verification activities and results, and project costs. With a year or more of post-occupancy performance data and other project information, as well as lessons learned by project owners and developers, architects, engineers, energy modelers, constructors, and operators, each case study answers the questions: What were the challenges to achieving net zero energy performance, and how were these challenges overcome? How

would stakeholders address these issues on future projects? Are the occupants satisfied with the building? Do they find it comfortable? Is it easy to operate? How can other projects benefit from the lessons learned on each project? What would the owners, designers, and constructors do differently knowing what they know now? A final chapter aggregates processes to engage in and pitfalls to avoid when approaching the challenges peculiar to designing, constructing, and owning a net zero energy building. By providing a wealth of comparable information, this book which will flatten the learning curve for designing, constructing, and owning this emerging building type and improve the effectiveness of architectural design and construction. Discover proven strategies for building powerful, world-class brands It's tempting to believe that brands like Apple, Nike, and Zappos achieved their iconic statuses because of serendipity, an unattainable magic formula, or even the genius of a single visionary leader. However, these companies all adopted specific approaches and principles that transformed their ordinary brands into industry leaders. In other words, great brands can be built—and Denise Lee Yohn knows exactly how to do it. Delivering a fresh perspective, Yohn's What Great Brands Do teaches an innovative brand-as-business strategy that enhances brand identity while boosting profit margins, improving company culture, and creating stronger stakeholder relationships. Drawing from twenty-five years

of consulting work with such top brands as Frito-Lay, Sony, Nautica, and Burger King, Yohn explains key principles of her brand-as-business strategy. Reveals the seven key principles that the world's best brands consistently implement Presents case studies that explore the brand building successes and failures of companies of all sizes including IBM, Lululemon, Chipotle Mexican Grill, and other remarkable brands Provides tools and strategies that organizations can start using right away Filled with targeted guidance for CEOs, COOs, entrepreneurs, and other organization leaders, What Great Brands Do is an essential blueprint for launching any brand to meteoric heights. Many teachers, support staff and school leaders are tired, stressed and overstretched. And even though this frequently makes the headlines, it isn't a new problem. In this book, Mark Solomons and Fran Abrams argue staff wellbeing should be rooted in the culture and climate of our schools. They provide a roadmap to recovery for struggling schools which should lead to improvements in staff morale, workload management and mental wellbeing. With a range of real-life examples, this book focuses on how school leaders can build workplace wellbeing in even the most challenging environments. It includes clear links to research evidence and summaries of the key steps necessary to deal with common issues such as: Identifying and mapping issues in your school Leading for wellbeing Creating and maintaining a happy workforce Developing

a culture of everyday wellbeing
Overseeing change. Written in an entertaining yet informative manner, this is the go-to guide for school leaders who want to support staff by building a more positive and supportive workplace. More than half-a-million business leaders have discovered the power of the StoryBrand Framework, created by New York Times best-selling author and marketing expert Donald Miller. And they are making millions. If you use the wrong words to talk about your product, nobody will buy it. Marketers and business owners struggle to effectively connect with their customers, costing them and their companies millions in lost revenue. In a world filled with constant, on-demand distractions, it has become near-impossible for business owners to effectively cut through the noise to reach their customers, something Donald Miller knows first-hand. In this book, he shares the proven system he has created to help you engage and truly influence customers. The StoryBrand process is a proven solution to the struggle business leaders face when talking about their companies. Without a clear, distinct message, customers will not understand what you can do for them and are unwilling to engage, causing you to lose potential sales, opportunities for customer engagement, and much more. In *Building a StoryBrand*, Donald Miller teaches marketers

and business owners to use the seven universal elements of powerful stories to dramatically improve how they connect with customers and grow their businesses. His proven process has helped thousands of companies engage with their existing customers, giving them the ultimate competitive advantage. Building a StoryBrand does this by teaching you: The seven universal story points all humans respond to; The real reason customers make purchases; How to simplify a brand message so people understand it; and How to create the most effective messaging for websites, brochures, and social media. Whether you are the marketing director of a multibillion-dollar company, the owner of a small business, a politician running for office, or the lead singer of a rock band, Building a StoryBrand will forever transform the way you talk about who you are, what you do, and the unique value you bring to your customers. *Anyone Can Do It* chronicles the start and evolution of a successful business dream. Beginning with the Hashemi siblings' first conversations (when the seed of the idea was planted) it follows the progress of Coffee Republic from business plan to the present day. You have realized that your business needs change--that's the first step. Andy Bailey knows entrepreneurs. Now the Founder of Petra Coach, Andy started his career as an entrepreneur himself, founding NationLink Wireless while still in college and growing it into an Inc. 500 corporation. After burning the candle at both ends for years, however, Andy realized that he was working "for" his job, not "on" his business. He began searching for ways to achieve his ultimate entrepreneurial dream and began implementing a specific methodology, based on the Rockefeller Habits. After years of strategic plans, systematized procedures and goal-setting, Andy successfully sold and exited NationLink in 2011. With the next chapter on the horizon, he realized that all of the lessons he learned and the business habits he had adopted to further his own career could be taught to organizations, entrepreneurs and business leaders to improve accountability, camaraderie, culture and results. Fast forward to the present day, and Andy now has logged more than 10,000 hours coaching CEOs, executives and leaders across the globe on these principles. No Try, Only Do is about how to avoid "the weak option," why entrepreneurs often fall back on it, and the lessons Andy learned via his own bloody experiences over the years. If you're a business owner or

entrepreneur, there's no room for "try" in your vocabulary. Reports, Documents, and Journals of the U.S. Senate and House of Representatives. This book examines the architectural achievements of the Egyptian pyramid builders

and how they may have accomplished those deeds. Many of their building techniques we today cannot explain. The baffling puzzle of how the stones were raised is one of these. The big puzzle aside, many minor mysteries are for the first time explained. Egyptologists agree that those performing the heavy labor were conscripted citizens, not slaves. The builders were inventive, motivated, daring, and superbly organized. They made mistakes, the price of innovation. Still, they persevered, and created some of the most impressive monuments in history. This book should help the reader understand the problems the builders faced, and instill admiration of their work. 1st-72nd include the annual report of the Secretary of the Board. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as an addendum to vol. 26, no. 7. Capacity-building:where has it come from? What is capacity-building? Whose capacities? Investing in people. Investing in organisations. Investing in networks. Building capacity in crisis. Building the capacities of others: questions for donors. Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises

to the top ranks of urgent, widespread public problems. To Err Is Human breaks the silence that has surrounded medical errors and their consequence—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, "How can we learn from our mistakes?" Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. To Err Is

Human asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates—as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine Shipping container homes can really save money, it's cost-effective and there are so many advantages.
