Explaining the History of American Foreign Relations Sep 18 2022 Originally published in 1991, *Explaining the History of American Foreign Relations* has become an indispensable volume not only for teachers and students in international history and political science, but also for general readers seeking an introduction to American diplomatic history. This collection of essays highlights a variety of newer, innovative, and stimulating conceptual approaches and analytical methods used to study the history of American foreign relations, including bureaucratic, dependency, and world systems theories, corporatist and national security models, psychology, culture, and ideology. Along with substantially revised essays from the first edition, this volume presents entirely new material on postcolonial theory, borderlands history, modernization theory, gender, race, memory, cultural transfer, and critical theory. The book seeks to define the study of American international history, stimulate research in fresh directions, and encourage cross-disciplinary thinking, especially between diplomatic history and other fields of American history, in an increasingly transnational, globalizing world.

Bringing Transnational Relations Back In May 14 2022 What difference do nonstate actors in international relations (such as Greenpeace, Amnesty International, IBM, or organizations of scientists) make in world politics? How do cross-national links interact with the world of states? Who controls whom? This book answers these questions by investigating the impact of nonstate actors on foreign policy in several issue areas and in regions around the world. It argues that the impact of such nonstate actors will depend on the institutional structure of states as well as international regimes and organizations.

Non-State Actors in Education in the Global South Nov 27 2020 Fuelled by social equity concerns, there have been vigorous debates on the appropriateness of certain non-state actors, particularly those with commercial and entrepreneurial motives, to meet universal education goals. There are further questions on the relative effectiveness of government and private schooling in delivering good learning outcomes for all. Within this debate, several empirical questions abound. Do students from poorer backgrounds achieve as well in private schools as their advantaged peers? What are the relative out-of-pocket costs of accessing private schooling compared to government schooling? Is fee-paying non-state provision 'affordable' to the poorest households? What is the nature of the education market at different levels? What are the relationships between different non-state actors and the state, and how should they conduct themselves? The chapters in this volume present new empirical evidence and conduct critical analysis on some of these

questions. This book was originally published as a special issue of the Oxford Review of Education. **New Threats and New Actors in International Security** May 22 2020 Non-state threats and actors have become key topics in contemporary international security as since the end of the Cold War the notion that state is the primary unit of interest in international security has increasingly been challenged. Statistics show that today many more people are killed by ethnic conflicts, HIV/AIDS or the proliferation of small arms than by international war. Moreover, non-state actors, such as non-governmental organizations, private military companies and international regimes, are progressively complementing or even replacing states in the provision of security. Suggesting that such developments can be understood as part of a shift from government to governance in international security, this book examines both how private actors have become one of the main sources of insecurity in the contemporary world and how non-state actors play a growing role in combating these threats.

Violent Non-State Actors in Africa Apr 13 2022 This book explores the rise and impact of violent non-state actors in contemporary Africa and the implications for the sovereignty and security of African states. Each chapter tackles a unique angle on violent organizations on the continent with the view of highlighting the conditions that lead to the rise and radicalization of these groups. The chapters further examine the ways in which governments have responded to the challenge and the national, regional and international strategies that they have adopted as a result. Chapter contributors to this volume examine the emergence of Islamist terrorists in Nigeria, Mali and Libya; rebels in DR Congo, Central African Republic, Ethiopia and Rwanda; and warlords and pirates in Somalia, Uganda and Sierra Leone.

Global Politics and Violent Non-state Actors Jul 24 2020 Moving beyond terror groups to examine non-state actors including warlords, gangs and private security companies, *Violent Non-State Actors: Guides you through the core theories and concepts, taking a multidisciplinary approach Examines different explanations for the emergence of violent non-state actors as well as strategies for dealing with them Weaves in international case studies from groups including the Islamic State, Los Zetas, Hamas, and Al Qaeda, as well as discussion questions, further reading and definitions of key terms A must read for upper-level undergraduate and postgraduate students in politics, international relations, security and terrorism studies.*

Extracting Accountability from Non-State Actors in International Law Sep 06 2021 The human rights of communities in many resource-rich, weak governance States are adversely affected, not only by the acts of States and their agents, but also by powerful non-State actors. Contemporary phenomena such as globalisation, privatisation and the proliferation of internal armed conflict have all contributed to the increasing public influence of these entities and the correlative decline in State power. This book responds to the persistent challenges stemming from non-State actors linked to extractive industries. In light of the intersecting roles of multinational enterprises and non-State armed groups in this context, these actors are adopted as the primary analytical vehicles. The operations of these entities highlight the practical flaws of existing accountability regimes and permit an exploration of the theoretical challenges that preclude their direct legal regulation at the international level. Drawing insights from discursive democracy, compliance theories and the Pure Theory of Law, the book establishes a conceptual foundation for the creation of binding international obligations addressing non-State actors. Responding to the recent calls for a binding business and human rights treaty at the UN Human Rights Council, and the growing influence of armed non-State actors, the book makes a timely contribution to debates surrounding the direction of future developments in the field of international human rights law.

Games for Actors and Non-Actors Jul 28 2023 *Games for Actors and Non-Actors* is the classic and best selling book by the founder of Theatre of the Oppressed, Augusto Boal. It sets out the principles and practice of Boal's revolutionary Method, showing how theatre can be used to transform and liberate everyone - actors and non-actors alike! This thoroughly updated and substantially revised second edition

includes: two new essays by Boal on major recent projects in Brazil Boal's description of his work with the Royal Shakespeare Company a revised introduction and translator's preface a collection of photographs taken during Boal's workshops, commissioned for this edition new reflections on Forum Theatre.

Violent Non-State Actors Sep 25 2020 Given the importance of violent non-state actors (VNSA) and their evolving role in global politics, dynamic frameworks of analysis are needed both to trace historical trajectories in the evolution of violent non-state actorness and to identify emerging patterns by examining modern day cases. This book examines the defining characteristics and evolutionary dynamics of VNSAs, and introduces a framework based on their autonomy, representation and influence providing a comparative analysis of the late 19th and early 20th centuries' Anarchist movement and the modern-day Jihadist network. It explores the distinct characteristics of the Anarchists and Jihadists as VNSAs with global potential, not just describing them, but also seeking to understand what they are instances of. With a longitudinal analysis, the book also considers the types of changes that have occurred in the past 150 years and the possible role VNSAs may play in current and future power polity shifts away from states toward non-state actors. It concludes with both theoretical implications for the study of non-state actors and transnational relations, and practical implications for government agencies or private groups tasked with finding ways of countering such violent non-state actors. This important book will be of interest to students and scholars of international relations, political science, and terrorism/security studies. It will also be of interest to practitioners in the security services including think-tank analysts and government security analysts.

Self-Defence against Non-State Actors Mar 12 2022 Provides a multi-perspective study of the international law on self-defence against non-State actors.

Warlords Rising Oct 19 2022 As non-state armed groups gain greater access to resources and networks through global interconnectivity, they have come to dominate the terrain of illegal trade in drugs, guns, and humans. Warlords Rising arms those confronting the mounting non-state challenge by delivering an innovative, interdisciplinary framework of analysis designed to improve understanding of non-state adversaries in order to affect their development and performance.

The Ashgate Research Companion to Non-state Actors Dec 09 2021 After an introductory part on current qualitative and quantitative sources, this comprehensive collection of state-of-the-art essays is comprised of four main thematic parts: Part II examines actors other than governments, such as transnational religious actors, business representatives and experts, and also parliamentarians and agencies set up by IGOs. Part III studies the perceptions and understandings in political philosophy, international law and international relations theory. It questions concepts used (civil society, NGO, governance) and covers the limitations to be kept in mind. Part IV analyses the nature and impact of non-state actors. Chapters discuss processes within international bureaucracies (diplomacy, dynamism, bureaucratic power, contribution to democracy) and the quintessence of deliberation and decision making within NGOs and IGOs and of implementation, accountability and dispute settlement. Part V studies specific worlds of non-state actors: humanitarian aid, human rights, security, the North-South divide, health, trade and environment. Accessible and articulately written, The Ashgate Research Companion to Non-State Actors is aimed at a wide readership of scholars and practitioners in international relations.

Non-State Actors in the Protection of Cultural Heritage Apr 01 2021 This book provides a comprehensive overview of international cultural heritage law from the perspectives of non-state actors (NSAs). In keeping with the significant developments concerning the status and roles of NSAs in international law over the last century, NSAs such as communities, experts, NGOs, and international organizations have become important participants in the implementation of international cultural heritage conventions. Indeed, due to the emergence of new ideas on common heritage and cultural rights in the 20th century, international cultural heritage law has become inconsistent with States' claim to sole authority regarding the protection of cultural heritage. The author analyzes the texts of international cultural heritage conventions, as well as their operational texts, to track essential changes in the rights, obligations, and roles of NSAs since the mid-20th century. Practical cases on the status and roles of NSAs are introduced to glean empirical ideas and facilitate an in-depth understanding of their effectiveness. The analysis reveals that NSAs do have certain rights and responsibilities concerning the implementation of

cultural heritage conventions, and their roles have been increasingly recognized. At the same time, however, discrepancies between text and practice can be observed when it comes to the status and roles of NSAs. They have emerged for various reasons, one of which is the politicization of conventions' governance. Adopting the standpoint of the NSAs, the book emphasizes the need to explore innovative and practical mechanisms that will allow NSAs to attain their proper status and take on practical roles under international cultural heritage law, which will in turn ensure the sustainable protection of cultural heritage. This message becomes more pertinent to the current conflicts where various tensions between states and NSAs have arisen and the roles of NSAs have become more important. Given its scope, the book will be of special interest to students, researchers and professionals at government and non-government organizations in the fields of heritage, the arts, law, administration, and development.

Non-State Actors and Authority in the Global System Nov 20 2022 Traditionally in International Relations, power and authority were considered to rest with states. But recently, in the light of changes associated with globalisation, this has come under scrutiny both empirically and theoretically. This book analyses the continuing but changing role of states in the international arena, and their relationships with a wide range of non-state actors, which possess increasingly salient capabilities to structure global politics and economics.

Changing Actors in International Law Apr 20 2020 "The 15 essays in this book began as papers presented at the Seventh Four Societies Conference hosted at Waseda University, Tokyo, in June 2018, by the Japanese Society of International Law (JSIL). The 'Four Societies' conferences are a collaborative initiative of the American Society of International Law (ASIL), the Australian New Zealand Society of International Law (ANZSIL), the Canadian Council on International Law (CCIL) and JSIL. The biannual conferences, which began in 2006, provide an opportunity for emerging scholars to foster a collaborative network around a common theme"--

Non-State Actors in World Politics Jun 27 2023 The involvement of non-state actors in world politics can hardly be characterized as novel, but intensifying economic and social exchange and the emergence of new modes of international governance have given them much greater visibility and, many would argue, a more central role. Non-State Actors in World Politics analyzes a diverse range of economic, social, legal (and illegal), old and new actors, such as the Catholic Church, trade unions, diasporas, religious movements, transnational corporations and organized crime.

Power, Interdependence, and Nonstate Actors in World Politics Jun 03 2021 Since they were pioneered in the 1970s by Robert Keohane and others, the broad range of neoliberal institutionalist theories of international relations have grown in importance. In an increasingly globalized world, the realist and neorealist focus on states, military power, conflict, and anarchy has more and more given way to a recognition of the importance of nonstate actors, nonmilitary forms of power, interdependence, international institutions, and cooperation. Drawing together a group of leading international relations theorists, this book explores the frontiers of new research on the role of such forces in world politics. The topics explored in these chapters include the uneven role of peacekeepers in civil wars, the success of human rights treaties in promoting women's rights, the disproportionate power of developing countries in international environmental policy negotiations, and the prospects for Asian regional cooperation. While all of the chapters demonstrate the empirical and theoretical vitality of liberal and institutionalist theories, they also highlight weaknesses that should drive future research and influence the reform of foreign policy and international organizations. In addition to the editors, the contributors are Vinod Aggarawal, Jonathan Aronson, Elizabeth DeSombre, Page Fortna, Michael Gilligan, Lisa Martin, Timothy McKeown, Ronald Mitchell, Layna Mosley, Beth Simmons, Randall Stone, and Ann Tickner.

Strategic Culture and Violent Non-State Actors Jul 04 2021 This book applies strategic culture concepts to violent non-state actors (VNSAs) in a comparative analysis. In recent years, Al-Qaida in the Islamic Maghreb (AQIM) has become notorious for kidnapping Western hostages in north-western Africa and for its role in the short-lived Islamist takeover of Mali. The group, formerly known as the Salafist Group for Preaching and Combat, rebranded itself as an Al-Qaida franchise in 2007, leading to speculation of a change from its Algeria-centric agenda to an anti-Western one. This study compares and contrasts the ideas and behaviour of these two groups, using a strategic-cultural approach, and finds that, despite some

commonalities, AQIM has a distinct strategic culture from Al-Qaida central, thereby debunking the notion of Al-Qaida as a monolithic movement. This is the first comparative analysis of violent non-state actors to employ a strategic-cultural approach and the first such study on AQIM. While strategic culture has traditionally been applied to states, this work adds to the emerging literature applying such approaches to non-state armed groups, and employs a novel conception of strategic culture consisting of narratives and practices. This book will be of much interest to students of strategic culture, political violence, Middle Eastern politics, and Security Studies in general.

Global Politics and Violent Non-state Actors Aug 25 2020 With inclusion of theories and causal factors for context, plenty of case studies for real-world application, and pedagogical features to encourage engagement, this book's coverage also goes far beyond the traditional focus on terrorist groups to provide readers with a stimulating and wide-ranging introduction to the subject

Negotiations Between State Actors and Non-state Actors Feb 23 2023 With the end of the Cold War came a proliferation of actors partaking in disputes, be they at local, regional, national or international levels. This book takes a step closer to the reality of international conflicts by adding a special focus on the relations between state and non-state actors.

Armed Non-State Actors and the Politics of Recognition Jun 15 2022 This edited volume examines asymmetric conflict dynamics through the politics of recognition vis-à-vis armed non-state actors. It explores a diverse range of case studies and considers the risks and opportunities that (non-)recognition may involve for transforming armed conflicts.

Non-State Actors in the Middle East Oct 27 2020 As the recent revolutions in the Middle East have demonstrated, civil society in this part of the world is on the move. The increasingly important role of non-state actors - a phenomenon of globalization- has characterized developments throughout the region, affecting the struggle for democracy and for peace. This volume brings together scholars primarily from the region to analyse the varied activities and contributions of NGOs, the private sector and the new media, from Morocco to Iran, along with the involvement of diaspora groups. The chapter on facebook in the recent Egyptian revolution captures the role of this new media while the study on similar technology in Iran outlines the barriers raised by the authorities in the current struggles there. Even the fledgling process of democratization in Saudi Arabia is driven by non-state actors while the veteran women's movements in the Maghreb serve as an example for the post-Arab spring era in those countries. Providing one of the first assessments of the role of non-state actors in the Middle East, this book will be essential reading for students of Political Science, Sociology and Civil Society, amongst others.

Games for Actors and Non-actors May 26 2023 A genuinely inspiring handbook packed with games, exercises, methods and techniques from the world-famous author of Theatre of the Oppressed. This first English translation includes new examples and fresh ideas.

Non-State Actors in Conflicts Feb 11 2022 *Non-State Actors in Conflicts: Conspiracies, Myths, and Practices* explores some of the most pressing topics in political science and media studies. The contributions gathered here provide alternative perspectives on various non-state actors and their functions in global politics, in addition to providing case studies and theoretical approaches towards non-state actors, such as armed non-state actors and international non-governmental organizations. The volume also covers the topic of conspiracy theories and conspiracies formed in relation to the functions and existence of these actors.

Non-State Actors' Rights in Maritime Delimitation May 02 2021 Most of the world's maritime boundary disputes involve privately held rights - relating to such matters as fishing, petroleum exploration and scientific research - that states have unilaterally granted to non-state actors in areas of overlapping national claims. An international lawyer would typically investigate the legality of a state's decision to create such rights without notifying or consulting its neighbour, and the legal consequences this action would have for the interests of the states concerned. Departing from this approach, Dr Marianthi Pappa examines such situations from the perspective of the non-state actors: what will happen to private rights in a disputed maritime area if it changes hands from state A to state B due to a subsequent delimitation treaty or judgment? Does the legal framework of maritime delimitation protect those rights effectively against a potential reallocation? To address these questions, the book considers the place that private rights have in

land boundary-making.

Non-State Actors as Standard Setters Jul 16 2022 This analysis of 'globalised' standard-setting processes draws together insights from law, political sciences, sociology and social anthropology to assess the authority and accountability of non-state actors and the legitimacy and effectiveness of the processes. The essays offer new understandings of current governance problems, including environmental and financial standards, rules for military contractors and complex public-private partnerships, such as those intended to protect critical information infrastructure. The contributions also evaluate multi-stakeholder initiatives (such as the Extractive Industries Transparency Initiative), and discuss the constitution of public norms in stateless areas. A synopsis of the latest results of the World Governance Indicator, arguably one of the most important surveys in the area today, is included.

Nonstate Actors in International Politics Jan 10 2022 This book provides students with a comprehensive analytical survey of the organizations that help shape today's events. It examines what nonstate actor does, how it organizes to achieve its ends, and how it makes multilateral/international decisions.

Non-State Armed Actors in the Middle East Dec 29 2020 This volume investigates the nature and changing roles of the non-state armed groups in the Middle East with a special focus on Kurdish, Shia and Islamic State groups. To understand the nature of transformation in the Middle Eastern geopolitical space, it provides new empirical and analytical insights into the impact of three prominent actors, namely ISIS, YPG and Shia Militias. With its distinctive detailed and multi-faceted analyses, it offers new findings on the changing contours of sovereignty, geopolitics and ideology, particularly after the Arab Uprisings. Overall this volume contributes to the study of violent geopolitics, critical security studies and international relations particularly by exploring the ideologies and strategies of the new non-state armed actors.

Working with Actors & Non-Actors in Video Production Aug 17 2022 Learn how to get the best performances from your actors?professional and non-professional alike. Get tips for casting talent, rehearsing scenes, and directing actors on set.

Legislative Theatre Jun 22 2020 Augusto Boal's reputation is now moving beyond the realms of theatre and drama therapy, bringing him to the attention of a wider public. Legislative Theatre is the latest and most remarkable stage in his work. 'Legislative Theatre' is an attempt to use Boal's method of 'Forum Theatre' within a political system to create a truer form of democracy. It is an extraordinary experiment in the potential of theatre to affect social change. At the heart of his method of Forum Theatre is the dual meaning of the verb 'to act': to perform and to take action. Forum Theatre invites members of the audience to take the stage and decide the outcome, becoming an integral part of the performance. As a politician in his native Rio de Janeiro, Boal used Forum Theatre to motivate the local populace in generating relevant legislation. In Legislative Theatre Boal creates new, theatrical, and truly revolutionary ways of involving everyone in the democratic process. This book includes: * a full explanation of the genesis and principles of Legislative Theatre * a description of the process in operation in Rio * Boal's essays, speeches and lectures on popular theatre, Paulo Freire, cultural activism, the point of playwrighting, and much else besides.

Acting for Non-Actors Mar 24 2023 how acting can help people better present themselves in business & social life

Researching Non-state Actors in International Security Aug 29 2023 This volume provides researchers and students with a discussion of a broad range of methods and their practical application to the study of non-state actors in international security. All researchers face the same challenge, not only must they identify a suitable method for analysing their research question, they must also apply it. This volume prepares students and scholars for the key challenges they confront when using social-science methods in their own research. To bridge the gap between knowing methods and actually employing them, the book not only introduces a broad range of interpretive and explanatory methods, it also discusses their practical application. Contributors reflect on how they have used methods, or combinations of methods, such as narrative analysis, interviews, qualitative comparative analysis (QCA), case studies, experiments or participant observation in their own research on non-state actors in international security. Moreover, experts on the relevant methods discuss these applications as well as the merits and limitations of the various methods in use. Research on non-state actors in international security provides ample challenges

and opportunities to probe different methodological approaches. It is thus particularly instructive for students and scholars seeking insights on how to best use particular methods for their research projects in International Relations (IR), security studies and neighbouring disciplines. It also offers an innovative laboratory for developing new research techniques and engaging in unconventional combinations of methods. This book will be of much interest to students of non-state security actors such as private military and security companies, research methods, security studies and International Relations in general. The Open Access version of this book, available at <https://www.routledge.com/Researching-Non-state-Actors-in-International-Security-Theory-and-Practice/Kruk-Schneiker/p/book/9780367141561>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Non-State Actors in Education in the Global South Oct 07 2021 Fuelled by social equity concerns, there have been vigorous debates on the appropriateness of certain non-state actors, particularly those with commercial and entrepreneurial motives, to meet universal education goals. There are further questions on the relative effectiveness of government and private schooling in delivering good learning outcomes for all. Within this debate, several empirical questions abound. Do students from poorer backgrounds achieve as well in private schools as their advantaged peers? What are the relative out-of-pocket costs of accessing private schooling compared to government schooling? Is fee-paying non-state provision 'affordable' to the poorest households? What is the nature of the education market at different levels? What are the relationships between different non-state actors and the state, and how should they conduct themselves? The chapters in this volume present new empirical evidence and conduct critical analysis on some of these questions. This book was originally published as a special issue of the Oxford Review of Education.

Rethinking Violence Jan 30 2021 An original argument about the causes and consequences of political violence and the range of strategies employed.

Non-State Actor Dynamics in International Law Dec 21 2022 Non-state actors have always been treated with ambivalence in the works of international law. While their empirical existence is widely acknowledged and their impact and influence uncontested, non-state actors are still not in the centre of international legal research. The idea that non-state actors are not law-makers, however, stands in sharp contrast with the growing notion of non-state actors as law-takers. This book examines the position of non-state actors in international law as law-makers and law-takers and questions whether these different positions can or should be separated from each other. Each contribution reveals both the political and normative aspects of the question as well as the positivistic possibilities and constraints to accommodate non-state actors as law-takers and law-makers in the contemporary international legal system. Altogether, each expert reveals that the position of non-state actors in international law is not a fixed one but changes with the functional and theoretical perspectives of the observer. Non-State Actor Dynamics in International Law is a welcomed addition to an under researched field of legal study. An indispensable read to scholars and policy makers wishing to gain new insights into general discourse on non-state actors in international law and the process of norm formation in the international realm.

Non-state Actors and International Obligations Nov 08 2021 This collection studies the contribution of non-state actors to international obligations. Chapters by academics and practitioners address the role that these actors play in the sources of obligations, their implementation, human rights aspects, dispute settlement, responsibility and legal accountability.

Non-State Actors in International Law Aug 05 2021 The role and position of non-state actors in international law is the subject of a long-standing and intensive scholarly debate. This book explores the participation of this new category of actors in an international legal system that has historically been dominated by states. It explores the most important issues, actors and theoretical approaches with respect to these new participants in international law. It provides the reader with a comprehensive and state-of-the-art overview of the most important legal and political developments and perspectives. Relevant non-state actors discussed in this volume include, in particular, international governmental organisations, international non-governmental organisations, multinational companies, investors and armed opposition groups. Their legal position is considered in relation to specific issue-areas, such as humanitarian law, human rights, the use of force and international responsibility. The main legal theories on non-state actors'

position in international law – neo-positivism, the policy-oriented approach and transnational law – are covered at the beginning of the book, and the essential political science perspectives – on non-state actors' role in international politics and globalisation, as well as their soft power – are presented at the end.

Extraterritorial Use of Force Against Non-State Actors Feb 28 2021 This book examines the legality of the use of force by states against individuals and non-state groups located beyond its borders, in light of applicable international law. The issues discussed include force used in the 'war on terror', pre-emptive self defence, and targeted killings of individuals.

Non-state Actors in International Relations Apr 25 2023 Assessing the influence of non-governmental organizations on international and transnational politics, as well as examining the importance of non-state actors in a world of nation-states, this theoretically rich text also discusses approaches that deal with the interplay between domestic and international politics. Thorough and insightful, this text draws on perspectives and theories from political science, policy studies and international law. Using topical and original case studies which cover the fields of security, trade, social clauses, environment, development aid, civil rights and crime, this volume constitutes one of the first vigorous theoretical analyses of this important contemporary phenomenon.

Human Rights and Non-state Actors Jan 22 2023 The question of whether non-state actors have human rights obligations is ultimately dependent on what we mean when we speak of human rights and what entities we consider to be non-state actors. Focusing the debate, this important collection presents an essential set of contributions which address these questions. An original introduction provides the context for the selection of papers that, first offer a general overview, and then a focus on the roles and impact of national legal orders, international organizations, corporations and rebel groups. This volume is essential reading for anyone interested in the fast-moving developments related to the ways human rights law now applies to non-state actors.
