Between Emma Peel and tire Ministry of Silly Walks British television had a significant impact on American popular culture in the 1960s and 1970s. In *Something Completely Different*, Jeffrey Miller offers the first comprehensive study of British programming on American television, discussing why the American networks imported such series as *The Avengers* and Monty Python's *Flying Circus*; how American audiences received these uniquely British shows; and how the shows' success reshaped American television. Miller's lively analysis covers three genres: spy shows, costume dramas, and sketch comedies. In addition to his close readings of the series themselves, Miller considers the networks' packaging of the programs for American viewers and the influences that led to their acceptance, including the American television industry's search for new advertising revenue and the creation of PBS. Smart membranes that respond to environmental stimuli are gaining attention because of their potential use in a variety of applications, from drug delivery to water treatment. Their surface characteristics and/or permeation properties, including pressure-driven hydraulic permeability and concentration-driven diffusional permeability, can be adjusted in response to small chemical and/or physical stimuli in the environment. This book will cover topics such as novel design and fabrication strategies, approaches for controlling structure and performance, as well as cutting-edge applications of smart membranes. It will deliver new insights and fundamentals for both professionals and newcomers in related fields. Edited by an internationally renowned expert and with contributions from key researchers, *Smart Membranes* provides a comprehensive overview of the topic. It will appeal to students and researchers across materials science, chemistry, chemical engineering, pharmaceutical science and biomedical science. The films of Michael Powell (1905-90) and Emeric Pressburger (1902-88), among them *I Know Where I'm Going!* (1945), *A Matter of Life and Death* (1947) and *The Red Shoes* (1948), are landmarks in British cinema, standing apart from the realist and comic mainstream with their highly stylised aesthetic and their themes of romantic longing and spiritual crisis. Powell and Pressburger are revered by film lovers and film-makers (Martin Scorsese has called them 'the most successful experimental film-makers in the world'). In this first-ever collection of essays on Powell, an international group of critics and scholars map out his film-making skills, providing new readings of individual films, analysing recurrent techniques and themes, and relating them to contemporary debates about gender, sexuality, nationality and cinematic spectacle. Powell, with and without Pressburger, emerges as a film-maker of lasting originality and significance. A new idea can become an expensive flop for TV executives. So from the earliest days of television, the concept of a pilot episode seemed like a good idea. Trying out new actors; new situations and new concepts before making a series was good economical sense. It was also tax deductible. Sometimes these pilots were shown on television; sometimes they were so awful they were hidden from sight in archives; and sometimes they were excellent one-offs, but a series seemed elusive and never

materialised. Chris Perry has always been fascinated by the pilot episode. So many pilots are made annually, but never seen by audiences. Only a handful appear on screen. It's a hidden world of comedy, variety, drama and factual programming. This volume attempts to lift the lid on the world of the TV pilot by revealing the many transmitted and untransmitted episodes made through the decades. Simple Heuristics That Make Us Smart invites readers to embark on a new journey into a land of rationality that differs from the familiar territory of cognitive science and economics. Traditional views of rationality tend to see decision makers as possessing superhuman powers of reason, limitless knowledge, and all of eternity in which to ponder choices. To understand decisions in the real world, we need a different, more psychologically plausible notion of rationality, and this book provides it. It is about fast and frugal heuristics--simple rules for making decisions when time is pressing and deep thought an unaffordable luxury. These heuristics can enable both living organisms and artificial systems to make smart choices, classifications, and predictions by employing bounded rationality. But when and how can such fast and frugal heuristics work? Can judgments based simply on one good reason be as accurate as those based on many reasons? Could less knowledge even lead to systematically better predictions than more knowledge? Simple Heuristics explores these questions, developing computational models of heuristics and testing them through experiments and analyses. It shows how fast and frugal heuristics can produce adaptive decisions in situations as varied as choosing a mate, dividing resources among offspring, predicting high school drop out rates, and playing the stock market. As an interdisciplinary work that is both useful and engaging, this book will appeal to a wide audience. It is ideal for researchers in cognitive psychology, evolutionary psychology, and cognitive science, as well as in economics and artificial intelligence. It will also inspire anyone interested in simply making good decisions.

Banished by the emperor Augustus in AD 8 from Rome to the far-off shores of Romania, the poet Ovid stands at the head of the Western tradition of exiled authors. In his *Tristia* (Sad Things) and *Epistulae ex Ponto* (Letters from the Black Sea), Ovid records his unhappy experience of political, cultural, and linguistic displacement from his homeland. Two Thousand Years of Solitude: Exile After Ovid is an interdisciplinary study of the impact of Ovid's banishment upon later Western literature, exploring responses to Ovid's portrait of his life in exile. For a huge variety of writers throughout the world in the two millennia after his exile, Ovid has performed the rôle of archetypal exile, allowing them to articulate a range of experiences of disgrace, dislocation, and alienation; and to explore exile from a number of perspectives, including both the personal and the fictional. Enhancing your decision-making skills to make smarter decisions is the best way you can purposefully improve your life.

Little Shoppe of Horrors #33 - The Making of DRACULA PRINCE OF DARKNESS IT WAS 1965. AND DRACULA WAS FINALLY BACK!! The final scenes for HORROR OF DRACULA were shot at Christmas 1957, and since then Hammer had wondered how they would bring back their money-making Count again. Now in 1965, they were able to get Christopher Lee back on the Bray Studios lot, with a stellar cast and the director of the original film, Terence Fisher. For many fans, this is the first Hammer film they ever saw. It was a mammoth success and once again solidified Hammer as the "House of Horror" Featuring - "The Making of DRACULA PRINCE OF DARKNESS" by Bruce G. Hallenbeck. The Sculptor In The Sky, the new book by spiritual catalyst, Teal Scott takes you on a journey of rediscovery of the universe of god and of yourself. This extraordinary book challenges us to reconnect with the eternal essence of our being and to expand our ideas about the reality we live in It is a must have for the curious, the wanting and the ready. A provocative guide to answering the questions that every person asks at some point in their life. An extraordinarily visceral collection of posters that represent the progressive protest movements of the twentieth Century. Two of the most recognizable images of twentieth-century art are Pablo Picasso’s “Guernica” and the rather modest mass-produced poster by an unassuming illustrator, Lorraine Schneider “War is Not Healthy for Children and Other Living Things.” From Picasso’s masterpiece to a humble piece of poster art, artists have used their talents to express dissent and to protest against injustice and immorality. As the face of many political movements, posters are essential for fueling recruitment, spreading propaganda, and sustaining morale. Disseminated by governments, political parties, labor unions and other organizations, political posters transcend time and span the entire spectrum of political affiliations and philosophies. Drawing on the celebrated collection in the Tamiment Library’s Poster and Broadside Collection at New York University, Ralph Young has compiled an extraordinarily visceral collection of posters that represent the progressive protest movements of the twentieth Century: labor, civil rights, the Vietnam War, LGBT rights, feminism and other minority rights. Make Art Not War can be enjoyed on aesthetic grounds alone, and also offers fascinating and revealing insights into twentieth century cultural, social and political history. Features the hottest Disney Channel Stars like Miley Cyrus, Jonas Brothers, Ashley Tisdale, Corbin Bleu (from High School Musical), Aly & AJ, The Cheetah Girls, Monique Coleman (from High School Musical), Kyle Massey and more! The best way to improve your quality of life is through the decisions you make. This book teaches several fundamental decision-making skills, provides numerous applications and examples, and ultimately nudges you toward smarter decisions. These nudges frame more desirable decisions for you to face by identifying the objectives for your decisions and generating superior alternatives to those initially considered. All of the nudges are based on psychology and behavioral economics research and are accessible to all readers. The new concept of a decision opportunity is introduced, which involves creating a decision that you desire to face. Solving a decision opportunity improves your life, whereas resolving a decision problem only restores the quality of your life to that before the decision

problem occurred. We all can improve our decision-making and reap the better quality of life that results. This book shows you how. Ralph Nader has fought for over fifty years on behalf of American citizens against the reckless influence of corporations and their government patrons on our society. Now he ramps up the fight and makes a persuasive case that Americans are not powerless. In *Unstoppable*, he explores the emerging political alignment of the Left and the Right against converging corporate-government tyranny. Large segments from the progressive, conservative, and libertarian political camps find themselves aligned in opposition to the destruction of civil liberties, the economically draining corporate welfare state, the relentless perpetuation of America's wars, sovereignty-shredding trade agreements, and the unpunished crimes of Wall Street against Main Street. Nader shows how Left-Right coalitions can prevail over the corporate state and crony capitalism. He draws on his extensive experience working with grassroots organizations in Washington and reveals the many surprising victories by united progressive and conservative forces. As a participator in, and keen observer of, these budding alliances, he breaks new ground in showing how such coalitions can overcome specific obstacles that divide them, and how they can expand their power on Capitol Hill, in the courts, and in the decisive arena of public opinion. Americans can reclaim their right to consume safe foods and drugs, live in healthy environments, receive fair rewards for their work, resist empire, regain control of taxpayer assets, strengthen investor rights, and make bureaucrats more efficient and accountable. Nader argues it is in the interest of citizens of different political labels to join in the struggle against the corporate state that will, if left unchecked, ruin the Republic, override our constitution, and shred the basic rights of the American people. This book describes several novel applications currently under investigation that exploit the unique actuator and sensor capabilities of smart material compounds. In addition to present and projected applications, this book provides comprehensive coverage of both linear and nonlinear modeling techniques necessary to characterize materials in a manner that facilitates transducer design and control development. The author focuses on ferroelectric, magnetic, and shape memory compounds and also addresses applications exploiting amorphous and ionic polymers, magnetorheological compounds, and fiber optic sensors. By providing a unified treatment of both linear and nonlinear characterization frameworks, *Smart Material Systems: Model Development* encompasses both low to moderate drive levels, which constitute the primary focus of most present texts, and the high drive regimes dictated by present and future applications. This will significantly enhance the design of transducers and control systems which exploit the unique actuator and sensor capabilities provided by smart material compounds. What is a mixed movie? A film to which artists of various nationalities contribute. Popular examples are "Land of the Pharaohs," "The Bridge on the River Kwai," "Casino Royale" and "The Sundowners." British players like Errol Flynn, Stewart Granger, Rex Harrison and James Mason have always been welcome in Hollywood. Not so well known are the numerous examples of American actors who lent their talents to British films, such as Robert Ayres, Phyllis Kirk, Mona Freeman, Frank Sinatra, Carol Lynley, William Bendix, Russ Tamblyn, William Holden, Raquel Welch, Joan Crawford, Gene Tierney, Van Johnson, Vincent Price, Tab Hunter, Alex Nicol, Zachary Scott, and Wayne Morris, to mention but a few such appearances that are detailed in this book. Become confident in your choices. Where should I live? Is it time to get a new job? Which job candidate should I hire? What business strategy should I pursue? We spend the majority of our lives making decisions, both big and small. Yet, even though our success is largely determined by the choices that we make, very few of us are equipped with useful decision-making skills. Because of this, we often approach our choices tentatively, or even fearfully, and avoid giving them the time and thought required to put our best foot forward. In *Smart Choices*, John Hammond, Ralph Keeney, and Howard Raiffa—experts with over 100 years of experience resolving complex decision problems—offer a proven, straightforward, and flexible roadmap for making better and more impactful decisions, and offer the tools to achieve your goals in every aspect of your life. Their step-by-step, divide-and conquer approach will teach you how to:

- Evaluate your plans
- Break your potential decision into its key elements
- Identify the key drivers that are most relevant to your goals
- Apply systematic thinking
- Use the right information to make the smartest choice

Smart Choices

doesn't tell you what to decide; it tells you how. As you routinely use the process, you'll become more confident in your ability to make decisions at work and at home. And, more importantly, by applying its time-tested methods, you'll make better decisions going forward. Be proactive. Don't wait until a decision is forced on you—or made for you. Seek out decisions that advance your long-term goals, values, and beliefs. Take charge of your life by making Smart Choices a lifetime habit. Explains how to adapt and implement the metrics-based approach developed by the Robin Hood Foundation for ensuring that money donations received by an organization are used as effectively as possible. Presents the further adventures of a motorcycle-riding mouse who goes to school and becomes the instigator of an investigation of rodents and the peacemaker for two lonely boys. *Feel Alive* by Ralph Smart explores the infinite potential in human beings, and discovers how we can awaken our infinite power. We talk on relationships, mind control, organic food and becoming the greatest version of yourself. To feel alive is to be free, being free is our birthright. For more than a decade, Gianakos' comprehensive chronicles of American television dramatic programming have been considered classic references. Following a descriptive and critical review for each period, an exhaustive Days and Times section includes detailed listings for all dramatic specials. Program sections for all seasons provide writer and director credits. This is the fourth volume in the 6-volume series. A farmer dreams of what his life might be like if his dog were a celebrity, only to discover that he likes his life just the way it is. The classic study of human nature which depicts the degeneration of a group of schoolboys marooned on a desert island. A message appears on the moon. It is legible from Earth, and almost no one knows how it was created. Markus West leads the government's investigation to find the creator. The message is simple and familiar. But those three words, written in blazing crimson letters on the lunar surface, will foster the strangest revolution humankind has ever endured and make Markus West wish he was never involved. The message is 'Drink Diet Coke.' When Coca-Cola denies responsibility, global annoyance with the beverage-industrial complex becomes indignation. And when his investigation confirms Coca-Cola's innocence, Markus West becomes one of the most hated men on Earth. Later, five miles above the White House, a cylinder is discovered floating in the night. It is 400 feet tall, 250 feet in diameter, and exactly resembles a can of Campbell's Chicken Noodle Soup. Nearly everyone thinks the cylinder is a promotional stunt gone wrong, just like the lunar advertisement. And this is exactly what the alien in the cylinder wants people to think. Ralph, an eccentric extraterrestrial who's been hiding on the moon, needs Markus's help to personally deliver a dark warning to the White House. Ralph has a big heart, a fetish for Andy Warhol, and a dangerous plan to save the world. Looking upon the cylinder, Markus realizes we are not the ones in control. The unexpected guest becomes the host, and somehow humans never belonged: "We are the homeless orphans peeking through the banquet window. We are the frills of the universe gazing upon something unspeakably more central than ourselves." Using the media's coverage of the death of Princess Diana as a starting point, the author draws on the effects of new technologies, the role of the star system, the nature of public surveillance, and the development of media conglomerates to explain why Hollywood has become so repetitive. Discussing films such as *Titanic* the author argues that current films replay the same plotlines with greater wizardry and less humanity than those of fifty years ago and that our culture is fascinated with images of disaster. A "captivating" (The Washington Post) true story of "courage, resolve, and determination" (Christian Science Monitor), author Ralph White's successful effort to save nearly the entire staff of the Saigon branch of Chase Manhattan bank and their families before the city fell to the North Vietnamese Army. In April 1975, Ralph White was asked by his boss to transfer from the Bangkok branch of the Chase Manhattan Bank to the Saigon Branch. He was tasked with closing the branch if and when it appeared that Saigon would fall to the North Vietnamese army and ensure the safety of the senior Vietnamese employees. But when he arrived, he realized the situation in Saigon was far more perilous than he had imagined. The senior staff members there urged him to evacuate the entire staff of the branch and their families, which was far more than he was authorized to do. Quickly he realized that no one would be safe when the city fell, and it was no longer a question of whether to evacuate but how. *Getting Out of Saigon* is an

“edge-of-your-seat” (Oprah Daily) story of a city on the eve of destruction and the colorful characters who respond differently to impending doom. It’s a remarkable account of one man’s quest to save innocent lives not because he was ordered but because it was the right thing to do.
