2022 Introducing the global mind-set changing the way we do business. In this fascinating book, global entrepreneurship expert Daniel Isenberg presents a completely novel way to approach business building—with the insights and lessons learned from a worldwide cast of entrepreneurial characters. Not bound by a western, Silicon Valley stereotype, this group of courageous and energetic doers has created a global and diverse mix of companies destined to become tomorrow's leading organizations. Worthless, Impossible, and Stupid is about how enterprising individuals from around the world see hidden value in situations where others do not, use that perception to develop products and services that people initially don't think they want, and ultimately go on to realize extraordinary value for themselves, their customers, and society as a whole. What these business builders have in common is a contrarian mind-set that allows them to create opportunities and succeed where others see nothing. Amazingly, this process repeats itself in one form or another countless

times a day all over the world. From Albuquerque to Islamabad, you will travel with Isenberg to discover unusual yet practical insights that you can use in your own business. Meet the founders of Grameenphone in Bangladesh, PACIV in Puerto Rico, Sea to Table in New York, Actavis in Iceland, Studio Moderna in Slovenia, Hartwell Metals in Hong Kong and Southeast Asia, Given Imaging in Israel, WildChina in China, and many others. You'll be moved by the stories of these plucky start-ups—many of them fueled by adversity and, more often than not, by necessity. Great stories, stunning successes, crushing failures—they're all here. What can we, in the East and West, learn from them? What can you learn—and what will these entrepreneurial stories, so compellingly told, inspire you to do? Let this book open doors for you where you once saw only walls. If you've ever felt the urge to turn a glimmer of an idea into something extraordinary, these stories are for you.

Handbook of Research on Digitalization Solutions for Social and Economic Needs Jan 07 2022 Digital solutions are sufficiently

versatile and agile to shape business processes and enterprise architecture, answer the COVID-19 crisis, solve climate change, temper political conflict, generate new employment operating models, and solve health issues. These solutions benefit businesses as an integral part of the economy and society and therefore must be studied further to ensure they are utilized appropriately. The Handbook of Research on Digitalization Solutions for Social and Economic Needs introduces the agile operating model that has triggered digital transformation and the plethora of ways it has become of practical use recently. The book also argues the business rationale of digitalization. Covering key topics such as innovation, sustainability, and business transformation, this major reference work is ideal for business owners, managers, computer scientists, industry professionals, researchers, scholars, academicians, librarians, policymakers, practitioners, educators, and students.

***Natural and Anthropogenic Disasters* Sep 22 2020 The major challenges of the 21st century faced by human beings are how to**

achieve water security, food security, energy security and environmental security. Owing to enhanced natural/anthropogenic disasters worldwide, these challenges become much more complicated and daunting especially for developing countries. Therefore, it is important to highlight the risk of different disasters as well as the modern tools and techniques for minimizing disaster incidence and losses. Disaster management being highly multidisciplinary in nature, a comprehensive book dealing with different aspects of disaster management, and encompassing important disasters faced by humankind is presently not available. This book is an attempt to fulfill this gap. It provides clear, comprehensive, and up-to-date information about different facets of disaster management along with salient case studies. The book highlights the current status of disaster management focusing on developing nations, discusses vital issues such as climate change and sustainable development, modern approaches and tools/techniques, and the challenges of and future R&D needs for

sustainable disaster management.

Karachi in the Twenty-First Century Sep 03 2021 The forces of globalisation are indiscriminate - they enable those who pursue good and those who pursue evil. The changes brought about by globalisation affect all segments of society, all walks of life, all political parties, all religions, all ethnic groups, and all countries. Sometimes they occur in the most unexpected ways and yield complex results that appear to be mystifying and intractable, at least on the surface. This book describes how the forces of globalisation have descended upon Karachi and exacerbated local and regional problems to the point where the city is teetering on the brink of chaos. Karachi is geographically, politically, and culturally situated in the context of modern Pakistan, but is a global city affected by global forces, many of which challenge the state's power and authority. The lessons of Karachi are important for both its present and its future, and they can serve as a cautionary tale for other global cities. Karachi is vitally important to Pakistan. While Islamabad is the country's capital, Karachi is the most

important financial centre in the country. It is the centre of banking, industry, economic activity and trade. Many of Pakistan's largest corporations are based in Karachi, including entertainment, arts, fashion, medical research, the automotive industry, shipping, textiles, advertising, publishing, and software development. Karachi is also home to Pakistan's main seaport and two of the largest ports in the region, the Port of Karachi and Port Bin Qasim.

South Asia and Climate Change Feb 08 2022 This book provides a comprehensive and interdisciplinary examination of the diverse aspects of climate change in South Asia. The region, home to almost 4% of the world's population, is under serious threat from climatic disasters. The volume underscores the urgency of addressing cataclysmic events related to climate change and their ramifications on the economy, agriculture and livelihoods of the region. The book discusses the reasons causing climate change as well as highlights normative and ethical considerations involved in the battle against climate change. With case studies from India, Sri

Lanka and Bangladesh, it explores issues such as extreme climatic events; energy use, fossil fuels, non-renewable resources and carbon dioxide emission in South Asia; internal migration and climate refugees; the ethical dilemma of sustainable development; technological advancements for extreme weather forecast; and responses to climate change in South Asia. Highlighting the need for striking a balance between developmental imperatives and environmental sustainability, the chapters also show the North-South divide in the research agenda and policies on climate change and the global politics that underlie climate policies. The volume juxtaposes a scientific analysis of factors responsible for climate change with an analysis of the human cost of climate change from the perspective of social sciences. It discusses the challenges faced by developing countries while also offering recommendations and solutions. This book will be of interest to scholars and researchers of climate studies, geography, public policy and governance, sustainable development, development studies,

environmental studies, political studies, international relations, political economy, economics and sociology. It will also be useful to practitioners, thinktanks, policymakers and civil society organisations working on environmental management.

STRATEGIC MANAGEMENT May 19 2020

Keeping in view the requirement of various management schools and professionals, this book presents dynamically changing policies, strategies, business models, frameworks and practices of corporate enterprises in India and abroad in an interesting and stimulating manner. The concepts are structured around the decision making process with suitable examples to enlighten students and managers with practices and techniques of making business strategies in today's competitive environment. The book includes 13 real-life Indian cases to provide an invaluable opportunity to the readers to apply their theoretical knowledge in solving business problems by analysing strategic issues of specific organizations. Besides management studies, the text will also prove useful to the students of commerce and allied areas.

KEY FEATURES : Discusses new paradigms of managing challenges in corporate enterprises. Includes a separate chapter on strategies of Mergers and Acquisitions. Highlights strategy execution and implementation factors. Emphasizes organizational culture and its relevance in organizational effectiveness.

Indian Ocean Tropical Cyclones and Climate Change Apr 17 2020 Tropical cyclones are topic that is not appropriately known to the public at large, but climate change has been on the public's mind since the last decade and a concern that has peaked in the new millennium. Like the television programs of Jean Yves Cousteau the 'plight of the oceans', have recent documentaries nurtured a consciousness that major climatological changes are in the offing, even have started to develop. The retreat of glaciers on mountain tops and in Polar Regions is 'being seen' on 'the small screen' and has favored an environmental awareness in all populations that are enjoying an average well-being on Planet Earth. The vivid images on screen of storms, floods, and tsunamis share the fear

provoking landscapes of deforestation, desertification and the like. Watching such as this one is seen are voices warning of what over is 'in store' if the causative problems are not remedied. Talking and discussing are useful, but action must follow. Understanding the full ramifications of climate change on tropical cyclones is a task that will take several decades. In Climate Change 2007, the Fourth Assessment Report of the United Nations Intergovernmental Panel on Climate Change (IPCC) a high probability of major changes in tropical cyclone activity across the various ocean basins is highlighted.

Leading the Way to Victory Mar 21 2023
Leading the Way to Victory is the official history of the 60th Troop Carrier Group, featuring unpublished first-person accounts by participating veterans and expertly written by retired USAF Colonel Mark C. Vlahos, combat veteran and former Vice Wing Commander of 314th Airlift Wing at the Little Rock Air Force Base. The December 7, 1941, surprise attack on Pearl Harbor thrust the United States into World War II. Just six months later in May 1942,

flying new C-47 transport aircraft, the 60th Troop Carrier Group led the way as the first U.S. TCG to deploy to England and the European Theater of Operations in World War II. Leading the way to victory, the 60th TCG's first mission—dropping U. S. paratroopers outside of Oran, North Africa—was not only the first combat airborne mission in U.S. Army history, but also the longest airborne mission of the entire war. This drop spearheaded Operation TORCH, also known as the Invasion of North Africa, by taking key Axis airfields just inland from the amphibious landing zones. The 60th TCG went on to fly some of the first combat aeromedical evacuation missions and the first combat mission towing CG-4A "Waco" gliders during Operation HUSKY—the Invasion of Sicily. As the new airborne, air land, aeromedical evacuation, and glider missions matured in World War II, the 60th TCG continued to play a major role, paying in blood for valuable lessons learned in the school of hard knocks. The group later flew dramatic missions into Yugoslavia, supporting Partisans as part of the secret

war in the Balkans, an episode of World War II history still all but unknown today and dropped British paratroops in the airborne invasion of Greece. The Group was inactivated at the end of the war. Drawing on official United States Army Air Forces microfilm records, operational records in the National Archives, photographs from both collections, published historical materials, and many personal accounts, author Mark C. Vlahos' expertly written and highly readable volume is certain to become the standard history and go-to reference for the 60th TCG. This work offers scholars and lay readers alike an authoritative, informative, and engaging saga of the Group's battles, adversity, hardships, and triumphs from inception through the Allied victory in Europe.

Handbook of Research on Advancing Cybersecurity for Digital Transformation

Apr 22 2023 Cybersecurity has been gaining serious attention and recently has become an important topic of concern for organizations, government institutions, and largely for people interacting with digital online systems. As many individual and organizational activities continue to grow and are conducted in the digital environment, new vulnerabilities have arisen which have led to cybersecurity threats. The nature, source, reasons, and sophistication for cyberattacks are not clearly known or understood, and many times invisible cyber attackers are never traced or can never be found. Cyberattacks can only be known once the attack and the destruction have already taken place long after the attackers have left. Cybersecurity for computer systems has increasingly become important because the government, military, corporate, financial, critical infrastructure, and medical organizations rely heavily on digital network systems, which process and store large volumes of data on computer devices that are exchanged on the internet, and they are vulnerable to “continuous” cyberattacks. As

cybersecurity has become a global concern, it needs to be clearly understood, and innovative solutions are required. The Handbook of Research on Advancing Cybersecurity for Digital Transformation looks deeper into issues, problems, and innovative solutions and strategies that are linked to cybersecurity. This book will provide important knowledge that can impact the improvement of cybersecurity, which can add value in terms of innovation to solving cybersecurity threats. The chapters cover cybersecurity challenges, technologies, and solutions in the context of different industries and different types of threats. This book is ideal for cybersecurity researchers, professionals, scientists, scholars, and managers, as well as practitioners, stakeholders, researchers, academicians, and students interested in the latest advancements in cybersecurity for digital transformation.

Cases on International Business Logistics in the Middle East Dec 06 2021 The importance of supply chain and logistics knowledge has been growing significantly with the beginning of the new millennium,

especially after the COVID-19 pandemic outbreak, as logistics and international transport perform one of the most essential services of the modern globalized and interconnected world. This influence of the new dynamic world brings both challenges and motivation for researchers and practitioners with interests in this field. Further study on the opportunities and difficulties of business logistics is essential to protect the future of international business. Cases on International Business Logistics in the Middle East provides innovative information on logistics and supply chain management and delivers insights into contemporary findings of logistics and supply chain based on real case studies. Covering critical topics such as manufacturing, warehousing, air transport, and big data, this reference work is ideal for managers, executives, business owners, researchers, scholars, academicians, practitioners, instructors, and students.

Retribution Jul 13 2022 David Hagberg's New York Times bestselling Kirk McGarvey series continues in Retribution, with a

deadly mission to take down a monstrous serial killer On May 1, 2011, a team of twenty-four members of US SEAL Team Six swooped down on the compound of Osama bin Laden in Abbottabad, Pakistan. Their mission, code-named Neptune Spear, was to find and kill the terrorist leader. The mission was a success. Since that day, elements of the government of Pakistan have harbored a deep hatred for the SEALs who violated their sovereign territory. Now they've hired a team of German assassins to kill all twenty-four of the ST6 operators...and only one man stands a chance of stopping them: legendary former Director of the CIA Kirk McGarvey. High-Impact Weather Events over the SAARC Region May 11 2022 This book is a compilation of papers contributed by researchers and scientists from SAARC nations and deals with high-impact weather conditions, their prediction and potential consequences for populations in the SAARC region. There have been a number of recent

advances in our understanding and prediction of cyclones, severe thunderstorms, squalls, heat and cold waves, droughts and heavy rainfall, based on the latest observational data and NWP modeling platform. The SAARC region is vulnerable to high-impact weather events because of geophysical features like high mountains, plateaus and vast oceans. As our climate continues to change over the coming years, the likelihood of extreme and potentially high-impact weather and climate events will be at its highest when natural and anthropogenic effects combine. All chapters were written by leading experts in their respective research and operational fields. The book reviews the latest research, future needs, forecasting skills and societal impacts of extreme weather events and offers high-quality reference material for weather forecasters, disaster managers and researchers.

Pakistan - Culture Smart! Jun 19 2020

Pakistan is a land with a unique history, formed by migrating peoples who have left their footprint in its diverse cultures, languages, literature, food, dress, and folklore. The country is besieged by bad news, but despite the political turmoil the everyday life of its people is more stable, rich, and rewarding than the media headlines would lead you to believe. A myriad local festivals and celebrations and a vibrant cultural life go unremarked.

Pakistan has the eighth-largest standing army in the world and is the only Muslim-majority nation to possess nuclear weapons, but few know that it is also the

home of two unique schools of art. This complex nation consists of various ethnic groups, each with its own individual cultures and subcultures, but which are unified by the common values of hospitality, honor, and respect for elders. Pakistani society has extremes of wealth and poverty, and daily life for most people is full of difficulties, yet everyone knows how to cope with crises. Creative and adaptable, Pakistanis are among the most self-reliant people in the world, bouncing back after major catastrophes. Culture Smart! Pakistan takes you behind the headlines and introduces you to many of the country's little-known traditions. It describes the vitally important cultural and historical background, shows you how modern Pakistanis live today, and offers crucial advice on what to expect and how to behave in different circumstances. This is an extraordinary country of enterprising, tough, and passionate people. Earn their trust and you will be rewarded many times over.

***Sustainability and Poverty Alleviation* Nov 24 2020 In 2009, more than 40,000 people died prematurely in Sindh, Pakistan because of an illness associated with an environmental health risk. This means that almost one of every five deaths that occurred that year was caused by environmental factors. Loss of natural resources and impacts from natural disasters also represent development challenges. Increased salinity and waterlogging result in loss of agricultural crops. In addition, hydro-meteorological hazards recurrently affect Sindh, as**

illustrated by the devastating effects of the 2010 and 2011 floods. For Sindh's population, these problems mean pain and suffering, and reduced opportunities for economic advancement. The costs of all these phenomena are equivalent to 10% of Sindh's Gross Domestic Product. Climate change may exacerbate these challenges. Sindh's environmental and climate change problems call for urgent responses. A number of feasible interventions could be carried out to address the categories of environmental degradation that have the highest impacts on Sindh's population. Many of those interventions have positive benefit-cost ratios, meaning that every rupee invested in them would result in health and social benefits worth more than one rupee. Addressing these challenges also calls for targeted institutional strengthening and policy improvements, particularly after the 18th Constitutional Amendment devolved environmental management responsibilities to provincial governments. The underlying goal of this book is to facilitate and stimulate sharing of information on these phenomena, and to

provide an interdisciplinary framework for bringing about improved environmental conditions in Sindh. It includes a methodology that enables the identification of environmental and climate change priority problems; the analysis of interventions to address such problems; the establishment of a social learning mechanism to continuously improve Sindh's responses and build resilience in the face of climate variability and change; and opportunities for the potential involvement of different stakeholder groups to decisively tackle climate change and deteriorating environmental conditions.

Non-Timber Forest Products Jul 21 2020

Forests cover thirty-one percent of the world's land surface, provide habitats for animals, livelihoods for humans, and generate household income in rural areas of developing countries. They also supply other essential amenities, for instance, they filter water, control water runoff, protect soil erosion, regulate climate, store nutrients, and facilitate countless non-timber forest products (NTFPs). The main

NTFPs comprise herbs, grasses, climbers, shrubs, and trees used for food, fodder, fuel, beverages, medicine, animals, birds and fish for food, fur, and feathers, as well as their products, like honey, lac, silk, and paper. At present, these products play an important role in the daily life and well-being of millions of people worldwide. Hence the forest and its products are very valuable and often NTFPs are considered as the 'potential pillars of sustainable forestry'. NTFPs items like food, herbal drugs, forage, fuel-wood, fountain, fibre, bamboo, rattans, leaves, barks, resins, and gums have been continuously used and exploited by humans. Wild edible foods are rich in terms of vitamins, protein, fat, sugars, and minerals. Additionally, some NTFPs are used as important raw materials for pharmaceutical industries. Numerous industry-based NTFPs are now being exported in considerable quantities by developing countries. Accordingly, this sector facilitates employment opportunities in remote rural areas. So, these developments also highlight the role of NTFPs in poverty alleviation in different

regions of the world. This book provides a wide spectrum of information on NTFPs, including important references. We hope that the compendium of chapters in this book will be very useful as a reference book for graduate and postgraduate students and researchers in various disciplines of forestry, botany, medical botany, economic botany, ecology, agroforestry, and biology. Additionally, this book should be useful for scientists, experts, and consultants associated with the forestry sector.

***Transformatl Theory Aesthetics* Mar 29 2021 First Published in 1990. How we perceive and respond to the visual image has been a traditional concern of**

psychologists, philosophers and art historians. Today, where the visual image increasingly permeates our everyday life and consciousness, the question becomes ever more relevant. How do we, for instance, instinctively 'know' what it is that a picture represents without having to be taught? How is it that we experience (aesthetic) pleasure in looking at certain pictures? How is it that we often want to talk about the pictures we look at? Such questions are currently asked by a wide range of disciplines, including: semiotics, psychoanalysis, anthropology, neuropsychology, and in general, contemporary critical analysis of the visual arts. In *A Transformational Theory of Aesthetics*, Michael Stephan breaks new ground by linking the findings of these areas. Drawing on their common area of knowledge, he has developed a radically new theory of picture perception and aesthetic response, arguing that images can generate in us a complex pattern of mental changes, or transformations. This is because the left and right hemispheres of the brain do not always work in harmony,

hence the wide-ranging nature of aesthetic response to distinct art forms. A Transformational Theory of Aesthetics is essential reading to those seriously involved in linking the arts and cognitive sciences.
