The Forbidden Expedition Mar 12 2022 Stella and the gang travel to Witch Mountain to save Felix and what they find along the way could change the course of their adventures forever in this second novel in the whimsical Polar Bear Explorers' Club series. Stella Starflake Pearl has been eagerly awaiting her next adventure, ever since she and Felix returned from the Snowy Icelands. She fears, however, that she might never be sent on another expedition, especially since the president of the Polar Bear Explorers' Club himself is afraid of her ice princess powers. But when disaster strikes and Felix is snatched by a fearsome witch, Stella and the rest of the junior explorers—including a reluctant new ally from the Jungle Cat Explorers' Club—must set off into the unknown on a forbidden journey to the top of Witch Mountain. What awaits them there is a mystery. The only thing they know is this: No one ever returns from Witch Mountain. In the second installment of Alex Bell's magical The Polar Bear Explorers' Club series, Stella and the gang face villainous vultures, terrifying witch wolves, flying sharks, and eerie picnicking teddy bears on their daring quest to save one of their own.

A Geo-Big Year May 14 2022 A Geo-Big Year: Pandemic Retirement is for the Birds. This book recounts a year-long birding quest across Pennsylvania in 2021. The quest was to see at least 67 bird species in each of the state's 67 counties. During the quest year, the author (now Professor of Geography Emeritus from Penn State University) coped with the process of retiring after 42 years in academia and the challenges that the Covid-19 pandemic posed for safe travel. The book chronicles the birding experiences and birds seen as well as the travel and retirement challenges. The story, told chronologically, is focused on the search for birds. It includes an account of what birds were seen (or not seen) in specific counties and specific sites within those counties. It also recounts the quest itself as it unfolded. Written by a Geographer, places visited are also highlighted. The narrative conveys the adventure of experiencing the mix of both popular and seldom visited places. These places were mostly rural and included state and county parks, game lands, wildlife refuges, trails, and forests across the state together with less attractive places (for humans) that still attract birds (such as cemeteries, retention ponds, and county dumps). The book includes 471 black and white figures, most of which are photo composites of birds seen and/or of the places visited. In total, the 471 figures consist of more than 600 photos of birds plus more than 300 other images (that include landscape scenes, signage, non-bird creatures seen, maps, and graphs). The book is intended for a wide audience. Aspects of the account should resonate with readers who: are or want to be birders; are retired or contemplating retirement; like

to travel, particularly on back roads and to natural places that are off the beaten track; are academics thinking about work life balance; have tried (or thought about trying) camping after not doing any for a long time; have a bucket list to pursue; have experienced life changes or expect to have some soon; or have ever contemplated pursuing a birding big year or any other kind of year-long quest.

Oxford Handbook of Expedition and Wilderness Medicine Apr 01 2021 Fully revised for its third edition, the Oxford Handbook of Expedition and Wilderness Medicine continues to be the essential resource for all expedition medics and well-informed travellers, as well as nurses, paramedics, medical students, and other expedition members travelling in remote, wilderness areas of the world. Now containing more guidance about caving medicine, the third edition includes revised and additional illustrations and essential maps of the spread of diseases. Clear and concise, readers can rely on this handbook to provide the key knowledge and practical advice they need. It enables efficient preparation and planning before the journey, advises on camp logistics, risk management, and medical problems during the expedition, as well as highlighting rare but important risks to those visiting remote areas. Focusing on preventative measures, it also contains chapters dealing with crisis management, emergency care, and evacuation from challenging environments, with guidance about the obligations of a clinician joining an expedition, ethical approaches to such work, and medicine in various extreme environments. This edition will give you the confidence and skills you need to travel to any extreme or remote environment. Incorporating the combined knowledge and experience of a team of experienced clinicians and expeditioners, this is a practical, easy-to-use guide to all aspects of expedition and wilderness medicine.

Relics of the Franklin Expedition Jul 28 2023 Sir John Franklin's Arctic expedition departed England in 1845 with two Royal Navy bomb vessels, 129 men and three years' worth of provisions. None were seen again until nearly a decade later, when their bleached bones, broken instruments, books, papers and personal effects began to be recovered on Canada's King William Island. These relics have since had a life of their own--photographed, analyzed, cataloged and displayed in glass cases in London. This book gives a definitive history of their preservation and exhibition from the Victorian era to the present, richly illustrated with period engravings and photographs, many never before published. Appendices provide the first comprehensive accounting of all expedition relics recovered prior to the 2014 discovery of Franklin's ship HMS Erebus.

Riding on Air Dec 21 2022 Riding on Air covers the history of air suspension, from the earliest patents in the mid-19th century to more current developments. Beginning on buses, air suspension expanded into passenger rail vehicles, only to be followed by a crashing failure on passenger cars. But after several precarious years, air suspension began to win almost universal acceptance on trucks and trailers, and then in mass transportation, eventually making a successful return to passenger cars.
